Subject Index

The page numbers shown in bold indicate the place where the corresponding item is defined. Multiple bold numbers for the same item mean that the term is used in multiple related senses.

Alphanumeric

- (2, 1)-monad, 342, 383, **746**, 762
- (p, q)-monad, **747**
- 0~bicommutative bimonoid, **120**

 noncommutative Möbius function, **36**,
 54, 200, 302, 388, 391, 392,
 424, 427, 549, 557, 589, 590,
 592, 606
 noncommutative Möbius inversion, 51,
 425
 noncommutative Weisner formula, **36**,
 303, 390, 425, 426, 590, 605
 noncommutative Zaslavsky formula, **51**,
 63, 72, 436, 506, 519, 595
- noncommutative zeta function, **35**, 54,
 63, 200, 302, 388, 391, 424,
 427, 519, 547, 556, 588, 589,
 591, 606, 680, 681
- O**
 op and cop constructions, **104**, 150,
 501, 506, 526
 operad, **171**
 opposite
 cone, **23**
 exponential, 395
 face, **20**
 logarithm, 395, 505
 lune, **26**
 transformation, **147**
 opposite bimonad on a category, **748**
 orientation functor on dispecies, **182**
 orientation operad, **181**
 orientation space of an arrangement,
 64, 69, 71, 181, 288
 orientation species, **288**
 oriented partner of a dispecies, **182**
 oriented quadratic dual, **186**
- P**
 panel, **20**
 partial commutativity axiom, **119**
 partial-biflat, **29**, 480
 partial-flat, **28**, 71, 118, 152, 293, 505,
 560, 587, 612
 partial-support of a face, **28**
 partial-support relation on chambers, **27**
 partial-support relation on faces, **28**
 partially commutative monoid in
 species, 119, 133
 partition of a set, **70**, 331, 358
 permutation bi-ring, 331
 Poincaré–Birkhoff–Witt isomorphism,
 682
 Poincaré–Birkhoff–Witt theorem, **682**,
 699, 711
 Poisson monoid, 677
 Poisson operad, 204, 677
 positive dispecies, **175**
 positive Joyal Lie comonoid, **707**
 positive Joyal Lie monoid, **706**
 positive Joyal species, **125**
 positive operad, **175**
 positively graded bialgebra, 130
 power for an enriched category, 364,
 729, 737
 power maps, 468
 preorder, 334
 presheaves on posets, 133
 primitive filtration

- of a comonoid, **215**
 - of the cofree comonoid, 261
- primitive part functor, **215**, 221, 251, 535, 539, 564, **645**, 658, **663**, 664, 698
- primitive part of a comonoid, **214**
- primitive series
 - of a cocommutative comonoid, 428
 - of a comonoid, 422
 - of a Joyal comonoid, 437
- primitive series of modules over the Tits algebra, 478
- primitively generated bimonoid, **227**
- projective lune-incidence algebra, **35**
- projective noncommutative Möbius function, 36, 505, 520
- projective noncommutative zeta function, 36, 63, 519
- promonoidal structure, 737
- PROP, 203

- Q**
- quadratic operad, **184**
- quantum group, 129
- quantum quasishuffle algebra, 281
- quantum shuffle, 281
- quasishuffle algebra, 280, 676
- quasishuffle product, **242**, 280
- quiver, 199, 204
- quotient dispecies, 172
- quotient monoid in species, **95**
- quotient species, **94**

- R**
- random walk, 72
- rank, **19**
- Ree criterion, 72
- reflexive directed graph, **486**
- regular band, **23**
- retract, 483, **721**
- reverse tensor product, **723**
- right closed monoidal category, **726**
- right distance function, **33**, 140
- right internal hom in a monoidal category, **726**
- right module category over a monoidal category, **724**
- rigidity theorem for q -bimonoids, 167, **564**, 597

- S**
- Saliola construction, **55**
- self-dual bimonoid in species, **101**
- self-dual map of species, **102**
- semisimple module, **478**
- series
 - of a Joyal species, **437**
 - of a species, **422**, **428**, 451, 456
- Serre-Swan theorem, 493
- set-bimonoid, 122, 156, 375, 459, 485, 523
- set-bimonoid axiom, **122**, 488
- set-comonoid, 122, 155
- set-dispecies, **174**, 175
- set-monoid, 122, 155
- set-operad, **174**
- set-species, **121**, 121
- set-theoretic noncommutative zeta function, **36**, 715
- shard, 334
- shuffle, 278
- shuffle algebra, 277, 676, 712
- shuffle product, **252**, 278
- signature functor
 - on dispecies, **182**
 - on Joyal species, 383
 - on species, 94, **193**, **376**, 498, 545, 570, 631, 662, 686, 701
- signature space of an arrangement, **65**, 92, 286
- signed 0- \sim -bicommutative signed bimonoids, **154**
- signed \sim -commutative monoid in species, **121**
- signed abelianization, **99**, **144**
- signed abelianization map, 260, 293, 681
- signed antisymmetry, 661, 673
- signed bicommutative signed bimonoid axiom, **93**
- signed bimonoid axiom, **90**
- signed bimonoid in species, 90
- signed Borel–Hopf isomorphisms, **555**
- signed Cartier–Milnor–Moore theorem, **701**, 714
- signed coabelianization, **99**, **144**
- signed cocommutative comonoid in species, **93**
- signed cocommutativity axiom, **93**
- signed cocommutator cobracket, **670**
- signed commutative exp-log correspondence, **407**
- signed commutative Joyal monoid, **126**
- signed commutative monoid in species, **92**
- signed commutative operad, **182**
- signed commutativity axiom, **92**, **126**
- signed commutator bracket, **662**, 673
- signed dequasishuffle coproduct, **240**
- signed deshuffle coproduct, **252**
- signed distance function on faces, **31**, 90, 91, 162, 660

- signed dual Borel–Hopf isomorphisms, **560**
 signed exponential bimonoid, **287**, 507, 517
 signed exponential species, 286, 293, 376
 signed graded bialgebra, 130
 signed graded Lie algebra, 672, 713
 signed Jacobi identity, 661, 673
 signed Joyal bimonoid, **125**
 signed Leray–Samelson isomorphisms, **545**
 signed Lie comonoid, **670**
 signed Lie cooperad, **182**
 signed Lie monoid in species, **661**
 signed Lie operad, **182**, 661
 signed opposite transformation, **149**
 signed partner
 of a dispecies, **182**
 of a species, **376**
 signed Poincaré–Birkhoff–Witt theorem, **686**, 714
 signed quasishuffle product, **243**
 signed shuffle product, **252**
 signed symmetrization map, 714
 simple directed graph, 331
 simple graph, 331
 simplicial arrangement, **20**
 simplicial set, 737
 slack of a lune, **26**
 small category without loops, 204
 Solomon coefficient, **52**, 54, 393, 394, 687, 691, 708, 712
 Solomon operator, **693**, 711, 713
 space of chambers, **54**
 special Zie element, 36, **69**, 329, 449, 690
 species, **75**
 characteristic of chambers, 192, **284**, 611, 648
 of bifaces, **321**
 of chamber maps, **355**
 of chambers, **288**
 of charts, **298**
 of connected charts, **299**
 of dicharts, **300**
 of faces, **301**
 of flats, **294**
 of pairs of chambers, **629**
 of top-lunes, **318**
 of top-nested faces, **312**
 split-semisimple algebra, 53, 57, 542, 567
 square of the antipode, 523
 standard construction, 760
 star of a face, **24**
 stationary distribution, 72
 Steenrod algebra, 128
 sticky shuffle product, 281
 stochastic integral, 281
 strictly graded comonoid, 233
 strong monoidal functor, 173, 176, 178, 182, 370, **723**
 strongly connected poset, **23**
 structured set, 131
 stuff type, 132
 stuffle, 333
 subspecies, 172
 submonoid in species, **95**
 subspecies, **94**
 substitution map
 of an operad, **171**
 of chambers, **67**
 of Lie elements, **67**
 substitution product
 of a dispecies and species, 190
 of dispecies, **170**
 of LRB dispecies, **202**
 of positive Joyal species, **178**
 of set-dispecies, **174**, 174, 204
 superbialgebra, 130
 support
 of a face, **22**
 of a nested face, **26**
 of a top-nested face, **25**
 of an h-face, **27**
 support map, **22**, **27**, 308
 surjective map of species, **95**
 Sweedler notation, 676
 Sweedler powers, 468
 symmetric algebra, 277, 674
 symmetric bilune-incidence algebra, **42**, 410
 symmetric monoidal category, 131, 676, 716, **723**
 symmetrization map, 712
 symmetry, 126, 158, **723**
- T**
 Takeuchi element, **63**, 71, 518
 Takeuchi formula, **496**, 525
 Takeuchi series, **520**
 tensor algebra, 183, 277, 343, 674, 712
 tensor coalgebra, 279
 Tits algebra, **54**, 71, 200, 204, 302, 443, 470, 553, 559
 Tits monoid, **20**, 71, 459
 top-lune, **25**, 331
 top-nested face, **25**, 331
 top-star of a face, **24**
 transportable construct, 131
 triple, 760

- triple monad on a category, **746**
 - triples of operads, 574
 - trivial comonoid, **221**
 - trivial comonoid functor, **221**
 - trivial monoid, **221**
 - trivial monoid functor, **221**
 - twisted algebra, 132
 - twisted commutative algebra, 132
 - twisted Hopf algebra, 132, 715
 - twisted Lie algebra, 676, 715
 - two-sided 0-Möbius function, **46**
 - two-sided 0-zeta function, **46**
 - two-sided q -flat-additivity formula, **43**, 317, 413, 465, 466
 - two-sided q -lune-additivity formula, **43**, 411, 598, 606
 - two-sided q -Möbius function, **44**, 57, 313, 322, 410, 565, 597
 - two-sided q -Weisner formula, **44**, 314, 317, 322, 412, 415, 598, 607
 - two-sided q -zeta function, **43**, 57, 210, 224, 267, 313, 322, 410, 565, 597
 - two-sided characteristic operation by a biface, **457**, 473, 522
 - two-sided Takeuchi element, **63**, 71, 522
- U**
- underlying category of an enriched category, **725**
 - underlying Lie comonoid functor, **665**
 - underlying Lie monoid functor, **642**, 653
 - underlying LRB Lie comonoid functor, 711
 - underlying LRB Lie monoid functor, 710
 - underlying signed Lie comonoid functor, **670**
 - underlying signed Lie monoid functor, **661**, 663
 - uniform noncommutative zeta function, **36**, 441
 - of the braid arrangement, 436, 572, 712, 715
 - universal coenveloping coalgebra, 676
 - universal coenveloping comonoid
 - of a Lie comonoid, **668**, 686
 - of a signed Lie comonoid, **670**
 - of an abelian Lie comonoid, 670
 - of the cofree Lie comonoid, 669
 - universal coenveloping LRB comonoid, 711
 - universal enveloping algebra, 673
 - universal enveloping LRB monoid, 710
 - universal enveloping monoid
 - of a Lie monoid, **652**, 682
 - of a signed Lie monoid, **663**
 - of an abelian Lie monoid, 660
 - of the free Lie monoid, 659
 - universal measuring coalgebra, 382
 - universal measuring cocommutative coalgebra, 382
 - universal measuring cocommutative comonoid, **361**
 - universal measuring comonoid, **359**, 433, 448
 - universal series, **201**
 - of the species of faces, **426**, 441, 451, 521
 - of the species of flats, **430**, 456, 522
 - unoriented quadratic dual, **186**
- V**
- vapraka, 71
 - Varchenko matrix, **33**, 269, 562
 - von Neumann algebra, 128
- W**
- weak composition, 341
 - Weisner formula, **34**, 399, 429, 430, 586
 - Weisner function, 441
 - white circle product, **187**
 - Witt identity, 562
 - for chambers, **49**, 50
 - for faces, **49**, 50
