

## Contents

<i>Preface</i>	<i>page</i> vii
<b>1 Propagator and Resolvent</b>	<b>1</b>
1.1 Introduction	1
1.2 The Quantum-Mechanical Propagator	1
1.3 Resolvent and Green's Functions	8
1.4 Analytic Properties of the Resolvent	12
1.5 Scattering and Resolvent in One Dimension	18
1.6 Bibliographical Notes	30
<b>2 The WKB Method and Nonperturbative Effects</b>	<b>31</b>
2.1 Introduction	31
2.2 The WKB Approximation in One Dimension	32
2.3 The Uniform WKB Method	37
2.4 The Voros–Silverstone Connection Formula	41
2.5 The Bohr–Sommerfeld Quantization Condition	47
2.6 Some Examples	56
2.7 Spectral Functions and the WKB Method	63
2.8 Nonperturbative Effects and the Double-Well Potential	70
2.9 Nonperturbative Effects and Large-Order Behavior	81
2.10 Nonperturbative Effects and the Complex WKB Method	86
2.11 The WKB Approximation for Integrable Systems	89
2.12 Semiclassical Quantization of the Periodic Toda Lattice	101
2.13 Bibliographical Notes	111
<b>3 The Phase Space Formulation of Quantum Mechanics</b>	<b>114</b>
3.1 Introduction	114
3.2 Weyl–Wigner Quantization	115
3.3 Star Product	119
3.4 Quantum Mechanics in Phase Space	123
3.5 The Harmonic Oscillator in Phase Space	132
3.6 The WKB Expansion in Phase Space	137
3.7 The Semiclassical Limit of the Wigner Function	144
3.8 The Husimi Distribution	153
3.9 Bibliographical Notes	157
<b>4 The Path Integral Formulation of Quantum Mechanics</b>	<b>159</b>
4.1 Introduction	159
4.2 Path Integral Representation of the Quantum Propagator	159

4.3	Path Integral Representation of the Density Matrix	163
4.4	The Free Particle	165
4.5	Gaussian Theories	167
4.6	Semiclassical Approximation to the Propagator	173
4.7	Semiclassical Approximation to the Partition Function	176
4.8	Functional Determinants	182
4.9	Correlation Functions and Wick's Theorem	188
4.10	Perturbation Theory and Feynman Diagrams	194
4.11	Instantons in Quantum Mechanics	199
4.12	Bibliographical Notes	205
<b>5</b>	<b>Metastable States</b>	<b>207</b>
5.1	Resonances	207
5.2	Resonances and Complex Dilatation	211
5.3	Resonances in Unbounded Potentials	213
5.4	Resonances and the Uniform WKB Method	220
5.5	Analytic Continuation of Eigenvalue Problems	227
5.6	Path Integral Formulation of Metastable States	230
5.7	Bibliographical Notes	238
<b>Appendix A</b>	<b>Asymptotic Series and Borel Resummation</b>	<b>239</b>
<b>Appendix B</b>	<b>Special Functions</b>	<b>247</b>
<b>Appendix C</b>	<b>Gaussian Integration</b>	<b>253</b>
