PART I THE LEGAL BACKGROUND	1
1 Introduction	3
<i>William H. Boothby</i>	
1.1 Introductory Remarks	3
1.2 The Sources of Technological and Scientific Innovation	7
1.3 The Purpose of the Book	7
1.4 Structure of the Book	9
1.5 An Introduction to the Chapters	10
1.5.1 Part I	10
1.5.2 Part II	11
1.5.3 Part III	13
1.6 Readership	14
1.7 How to Use This Book	14
2 Regulating New Weapon Technologies	16
<i>William H. Boothby</i>	
2.1 Introduction	16
2.2 Reviewing New Weapon Technologies under International Law	17
2.3 The Customary Principles of Weapons Law	18
2.4 Weapons and the Environment	22
2.5 Weapons Law Rules Relating to Specific Weapon Types	24

2.5.1	Poisons and Gases	24
2.5.2	Expanding Bullets	25
2.5.3	Exploding Bullets Designed for Anti-Personnel Use	25
2.5.4	Asphyxiating Gas	26
2.5.5	Fragmentation Weapons	26
2.5.6	Laser Weapons	27
2.5.7	Chemical Weapons	27
2.5.8	Biological Weapons	29
2.5.9	Incendiary Weapons	30
2.5.10	Nuclear Weapons	31
2.5.11	Mines, Booby-Traps and Other Devices	33
2.5.12	Cluster Munitions	35
2.5.13	Non-Lethal Weapons	38
2.6	The Criteria That Determine the Lawfulness of a Weapon Technology	38
2.7	Lessons as to the Regulation of Emerging Technologies	39
3	The Law on the Conduct of Hostilities	43
	<i>William H. Boothby</i>	
3.1	Introduction	43
3.2	Application of the API Targeting Law Rules	45
3.3	The Basic Principle	46
3.4	Some Important Definitions	46
3.5	The Protection of Civilians	47
3.6	The Classification of Objects	48
3.7	Indiscriminate Attacks	49
3.8	Particularly Protected Objects and Persons	50
3.9	Precautions in Attack	53
3.10	Non-Defended Localities, Demilitarised Zones and Civil Defence	55
3.11	Human Shields and Precautions against the Effects of Attacks	55
3.12	Customary Law Rules As to Targeting	56
3.13	Reprisals	58
3.14	Use of Weapons as a Reprisal	60
3.15	Conclusion	60
4	Non-LOAC-Governed Deployment of Military Technologies: Some Regulatory Touchstones	61
	<i>Rob McLaughlin</i>	

Table of Contents

vii

4.1	Introduction	61
4.1.1	Outline	63
4.2	General Non-LOAC Regulatory Regimes That Apply to the Employment of Military Technology	64
4.2.1	Domestic Regimes	64
4.2.2	International Legal Regimes	69
4.3	Some Specific Regulatory Issues with Implications for Employment of Military Technology	74
4.3.1	Licensing and Employment of Military Technologies	74
4.3.2	Liability and Agency	74
4.3.3	Export Control Regimes	75
4.3.4	Privacy	78
4.3.5	Review and Acquisition	81
4.4	Conclusion	81
PART II APPLYING THE LAW TO SOME NEW TECHNOLOGIES		83
5	Cyber Capabilities <i>William H. Boothby</i>	85
5.1	Introduction	85
5.2	Law, Cyber Operations and the Legal Status of the Tallinn Manuals	86
5.3	The Tallinn Manuals – <i>Jus ad Bellum</i>	90
5.4	Tallinn Manuals – <i>Jus in Bello</i>	91
5.5	UN Group of Governmental Experts Discussions	98
5.6	Which Is to Be Preferred, Tallinn or GGE?	105
5.7	Proposed International Code of Conduct	111
5.8	Range of Uses of Cyber Technologies outside Hostilities	115
5.9	The Internet of Things	122
5.10	Internet of Things Data Issues	123
5.11	European Interpretation of the Human Right to Privacy	127
5.12	Domestic Law Systems in Russia, China and India	129
5.13	Conclusion	133
6	Highly Automated and Autonomous Technologies <i>William H. Boothby</i>	137
6.1	Introduction	137
6.2	The Technologies and What the Terms Mean	138
6.2.1	Man on the Loop Systems	138
6.3	Swarm Technology	140
6.4	Defining Highly Automated and Autonomous Weapons	142

6.5	Applying Existing Law to Highly Automated and Autonomous Weapons	145
6.6	Artificial Learning Intelligence (ALI)	150
6.7	Human Involvement in Autonomous Operations	151
6.8	Interference, Deception and Human Responsibility	153
6.9	New Law for Autonomous and Certain Highly Automated Weapon Systems	159
6.10	Regulation of Peacetime Applications of Autonomy	163
6.10.1	Automation and Autonomy in Civil Aviation	163
6.10.2	Automation and Autonomy in Surgical Practice	169
6.10.3	Driverless Cars	171
6.11	Conclusions	177
7	Military Human Enhancement	182
	<i>Ioana Maria Puscas</i>	
7.1	Introduction	182
7.2	Definition and Controversies	184
7.3	Origins of Present-Day Enhancement	187
7.4	Physical and Cognitive Enhancement Today	190
7.4.1	Physical Enhancement	192
7.4.2	Enhancing Cognitive Performance	195
7.5	Legal Conundrums	203
7.5.1	Transparency and IHL	203
7.5.2	Deception in Warfare – Could Enhanced Soldiers Be a ‘Ruse of War’?	205
7.6	Ethics and Operational Challenges	209
7.6.1	Ethical Risks and Operational Difficulties	209
7.6.2	Ethical Opportunities	217
7.7	Enhancements in Society	220
7.7.1	Sports	220
7.7.2	Workplace and Society	221
7.8	What Options for Regulation?	226
7.9	Conclusions	228
8	Legal Aspects of Human Enhancement Technologies	230
	<i>Heather A. Harrison Dimmiss</i>	
8.1	Introduction	230
8.2	Humans, Property and Weapons	230
8.3	Human Enhancement in Times of Armed Conflict	234
8.3.1	Distinction	235

Table of Contents

ix

8.3.2	Proportionality and Precautions	237
8.3.3	Superfluous Injury and Unnecessary Suffering	239
8.3.4	Principle of Protection	241
8.4	Contemporary Human Rights Law	244
8.4.1	Biochemical Enhancement	246
8.4.2	Cybernetic Implants and Brain Machine Interfaces	250
8.4.3	Prosthetic Technologies	253
8.5	New Human Rights for an Age of Enhancement	255
8.6	Concluding Remarks	256
9	Human Degradation Technologies and International Law	258
	<i>Harry Aitken and Hitoshi Nasu</i>	
9.1	Introduction	258
9.2	'Human Degradation' as an Act of Violence	259
9.2.1	Defining 'Human Degradation'	259
9.2.2	Applications of Human Degradation Technology	262
9.3	Prohibited Means of Human Degradation	269
9.4	Regulation of Human Degradation as an Act of Violence	274
9.4.1	Applicability of Targeting Law	274
9.4.2	Applicability of Human Rights Law	279
9.5	Concluding Observations	283
10	Nanomaterials: A Tale of Two Applications	285
	<i>Kobi Leins and Diana M. Bowman</i>	
10.1	Introduction: Governance of Engineered Nanoparticles	285
10.2	Governance Frameworks for Commercial Use of Nanotechnologies	289
10.3	Governance Frameworks Applicable to the Use of Nanomaterials in Armed Conflict	294
10.4	Consideration of Governance of Military Use of Biological and Chemical Nanotechnologies	302
10.5	Consideration of Adequacy of Governance of Hostile Use Nanotechnologies	303
10.6	Timing and Content of the Article 36 Review	309
10.7	Ability to Independently Provide Review with Narrow Field of Experts	311
10.8	Conclusions and Recommendations	313
11	Naval Technologies	315
	<i>Wolff Heintschel von Heinegg</i>	

11.1	Introduction	315
11.2	Unmanned Maritime Systems	317
11.2.1	Legal Status of UMS	319
11.2.2	UMS Operations in Different Sea Areas	321
11.2.3	Compliance with the 'Rules of the Road'	323
11.2.4	UMS and the Law of Naval Warfare	324
11.2.5	UMS and the Law of Neutrality	328
11.2.6	UMS: Preliminary Conclusions	329
11.3	Undersea Infrastructure	329
11.3.1	Relevance of Undersea Infrastructure	329
11.3.2	Peacetime Legal Framework	331
11.3.3	Status under LOAC	334
11.3.4	Undersea Infrastructure: Preliminary Conclusions	336
11.4	Concluding Remarks	336
12	Outer Space	337
	<i>Melissa de Zwart</i>	
12.1	Introduction	337
12.2	The Space Race and the Outer Space Treaties	339
12.3	The Evolution of Space Weaponry and Technological Applications	347
12.4	The Growth of the Commercial Space Industry	349
12.5	Current Issues with the Regulation of Space	351
12.6	Rules Applicable to Military Conflict in Outer Space	353
12.7	Technology and Space Power Theory	355
12.8	Current Initiatives	356
12.9	Conclusions	357
13	Synthetic Brain Technologies: Beyond Artificial Intelligence	359
	<i>David P. Fidler</i>	
13.1	Introduction	359
13.2	Replicating and Interfacing with the Human Brain	362
13.2.1	Replicating the Human Brain	363
13.2.2	Interfacing with the Human Brain	367
13.3	Synthetic Brain Technologies and the Law for Peacetime	370
13.3.1	Preliminary Observations on Synthetic Brain Technologies and Law	370
13.3.2	Artificial Brains and the Law for Peacetime	373
13.3.3	Brain–Computer Interfaces and the Law for Peacetime	379

Table of Contents

xi

13.4 Synthetic Brain Technologies and the Law on the Use of Force and Armed Conflict	383
13.4.1 Preliminary Observations	383
13.4.2 Synthetic Brain Technologies and the Law on the Use of Force	385
13.4.3 Synthetic Brain Technologies and the Law of Armed Conflict	386
13.5 Conclusion	390
14 Biometrics	392
<i>William H. Boothby</i>	
14.1 Introduction	392
14.2 The Military Employment of Biometrics	396
14.3 Legal Issues Associated with Military Use of Biometrics	399
14.4 Use of Biometrics in the Commercial/Domestic Security Context	401
14.5 Some Legal Considerations Associated with Peacetime Employment of Biometrics	406
14.6 Comparison of the Military and Commercial Applications	415
14.7 Comparison of the Applicable Law	416
14.8 What Can We Learn from the Law Applicable to the Two Contexts?	417
14.9 Biometrics in the Context of Other Technologies	418
PART III CONCLUSIONS	421
15 So, What Do We Make of All This?	423
<i>William H. Boothby</i>	
15.1 Opening Remarks	423
15.2 The Substantive Chapters	424
15.3 Convergence, or Is It Composition?	438
15.4 Some Concluding Remarks	448
15.5 And Lastly	452
<i>Select Bibliography</i>	455
<i>Index</i>	487
