Religion After Science

In this provocative work, J.L. Schellenberg addresses those who, influenced by science, take a negative view of religion, thinking of it as outmoded if not decadent. He promotes the view that transcendently oriented religion is developmentally immature, showing the consilience of scientific thinking about deep time with his view. From this unique perspective, he responds to a number of influential cultural factors commonly thought to spell ill for religion, showing the changes – changes favorable to religion – that are now called for in how we understand them and their proper impact. Finally, he provides a defense for a new and attractive religious humanism that benefits from, rather than being hindered by, religious immaturity. In Schellenberg’s view, religion can and should become a human project as monumental as science.

J. L. Schellenberg is Professor of Philosophy at Mount Saint Vincent University. His work was honored by a special issue of the Cambridge journal *Religious Studies* in 2013.
CAMBRIDGE STUDIES IN RELIGION, PHILOSOPHY, AND SOCIETY

Series Editors

Paul Moser, Loyola University Chicago
Chad Meister, Bethel College

This is a series of interdisciplinary texts devoted to major-level courses in religion, philosophy, and related fields. It includes original, current, and wide-ranging contributions by leading scholars from various disciplines that (a) focus on the central academic topics in religion and philosophy, (b) are seminal and up-to-date regarding recent developments in scholarship on the various key topics, and (c) incorporate, with needed precision and depth, the major differing perspectives and backgrounds – the central voices on the major religions and the religious, philosophical, and sociological viewpoints that cover the intellectual landscape today. Cambridge Studies in Religion, Philosophy, and Society is a direct response to this recent and widespread interest and need.

Recent Books in the Series

Roger Trigg
Religious Diversity: Philosophical and Political Dimensions

John Cottingham
Philosophy of Religion: Towards a More Humane Approach

William J. Wainwright
Reason, Revelation, and Devotion: Inference and Argument in Religion

Acknowledgments

This book draws on what I’ve learned over the years in other writing projects, so I really ought to be thanking again everyone who helped me with them. Consider it done. It also draws, in a few places, on those past projects themselves. A version of Chapter 2 appeared as an article in the online magazine Aeon. And Chapters 4 and 6 contain material reprinted from “The Retrospective Mode” and “The Prospective Mode,” respectively, in my book The Wisdom to Doubt: A Justification of Religious Skepticism (Cornell University Press, 2007). This material is used by permission of the publisher, Cornell University Press. I am grateful to Cornell for allowing me to reuse this material.

Many talented and professional people at Cambridge University Press, including the Press’s philosophy editor, Robert Dreesen, worked on this book; and the questions and (sometimes inadvertent) suggestions of three anonymous referees, chosen by the Press, made for important improvements. Chad Meister and Paul Moser, editors of the Cambridge series this book joins, were unfailingly supportive, courteous, and prompt in responding to my queries. I am grateful to you all.

I owe the phrase ‘10,000-year test’ to Philip Clayton, who used it while discussing my ideas in a talk at a Claremont conference back in 2011. I instantly liked it, and he instantly said yes when I asked whether I might use it myself, giving to it my own meaning(s). I thanked him then, and I thank him again now.

Above all, I thank my wife, Regina, to whom this book is dedicated with the greatest affection. I have the usual reasons for gratitude afforded by Regina’s excellent ear and insightful comments on my ideas, as well as her abiding love and support. I also have the unusual reason that comes

from her physical absence for two weeks in July of 2017, when she was traveling on the other side of the country with a daughter’s family. It was then, to distract myself from missing her (it’s a big country!), that I resolved to put together a book I’d been thinking about. I gave all my attention to this project. And a solid first draft was complete when she returned. Thanks, Regina!
