

THE CAMBRIDGE HANDBOOK OF SURVEILLANCE LAW

Surveillance presents a conundrum: how to ensure safety, stability, and efficiency while respecting privacy and individual liberty. From police officers to corporations to intelligence agencies, surveillance law is tasked with striking this difficult and delicate balance. That challenge is compounded by ever-changing technologies and evolving social norms. Following the revelations of Edward Snowden and a host of private-sector controversies, there is intense interest among policy makers, business leaders, attorneys, academics, students, and the public regarding legal, technological, and policy issues relating to surveillance. This handbook documents and organizes these conversations, drawing together some of the most thoughtful and impactful contributors to contemporary surveillance debates, policies, and practices. Its pages explore surveillance techniques and technologies; their value for law enforcement, national security, and private enterprise; their impacts on citizens and communities; and the many ways societies do – and should – regulate surveillance.

David Gray teaches criminal law, criminal procedure, evidence, international criminal law, and jurisprudence at the University of Maryland's Francis King Carey School of Law. He was voted Professor of the Year in 2012. He has published dozens of articles in leading law reviews, is the author of *The Fourth Amendment in an Age of Surveillance* (Cambridge University Press, 2017), and has submitted amicus briefs in high-profile cases involving surveillance and the Fourth Amendment. Professor Gray is a sought-after speaker and frequently provides expert commentary for national media outlets on questions relating to criminal law and criminal procedure.

Stephen E. Henderson is the Judge Haskell A. Holloman Professor of Law at the University of Oklahoma, where he has received numerous teaching awards and a campus-wide award for Outstanding Research Impact. He served as Reporter for the American Bar Association Criminal Justice Standards on Law Enforcement Access to Third Party Records, and his personal writing has been argued and utilized in resolving contemporary American search and seizure controversies. Professor Henderson obtained a J.D. from Yale Law School and a B.S. in Electrical Engineering from the University of California at Davis (highest honors and College of Engineering Medal).

For two people I miss and mourn: F. P. Gray, whose
fortitude, intellectual curiosity, and unbending
independence continue to inspire, and Dan Markel,
a true mensch of enormous heart and unflinchingly
critical mind.
