Contents

1 The Relevance of Higher-Order Networks in Network Science 1
2 Combinatorial and Statistical Properties of Simplicial Complexes 7
3 Simplicial Network Topology 30
4 Simplicial Network Geometry 46
5 Emergent Geometry 56
6 Higher-Order Dynamics: Synchronization 86
7 Higher-Order Dynamics: Percolation 99
8 Higher-Order Dynamics: Contagion Models 107
9 Outlook 113

Appendix A Maximum Entropy Ensembles of Simplicial Complexes 115
Appendix B The Hodge Decomposition 119
Appendix C Spectral Dimension of Euclidean Lattices 121
Appendix D Topological Moves 123
Appendix E Emergent Preferential Attachment 125
Appendix F Generalized Degree Distributions of NGFs (Neutral Model) 127
Appendix G Apollonian and Pseudo-Fractal Simplicial Complexes 129
