Contents

Preface to the Third Edition	<i>page</i> xi
List of Abbreviations	xii
<hr/>	
1 Stroke in the Emergency Department	1
Is This a Stroke?	1
What Type of Stroke?	6
<hr/>	
2 What to Do First	7
Airway – Breathing – Circulation (ABCs)	7
What Was the Time of Onset?	8
How Bad Are the Symptoms Now?	9
Do a Non-Contrast Head CT	9
If the CT Shows No Blood, Try to Get the Artery Open	10
Recommended Diagnostic Evaluation	10
<hr/>	
3 Ischemic Stroke	12
Definition	12
Etiology	12
Diagnosis	12

Cambridge University Press

978-1-108-73132-4 — Acute Stroke Care

James Grotta , Ahmad Riad Ramadan , Mary Carter Denny , Sean I. Savitz

vi

Contents

The Four Components of Ischemic Stroke Care	13
Acute Therapy and Optimization of Neurological Status	13
Etiological Work-up for Secondary Prevention	21
Prevention of Neurological Deterioration or Medical Complications	24
Recovery and Rehabilitation	27
Ischemic Stroke Outcome	27
General Timeline	30
4 Stroke Radiology	32
Computed Tomography	32
Head CT with Contrast	35
Magnetic Resonance Imaging	40
MRI Sequences	41
Usual Sequences Ordered for Acute Ischemic Stroke Patients	52
Abbreviated Protocol for Uncooperative Patients	53
Usual Sequences Ordered for Acute ICH Patients	53
MRI Findings in Brain Hemorrhage	54
Cerebral Angiogram	55
Diffusion Tensor Imaging	55
5 Intravenous Thrombolysis	58
tPA Indications	60
tPA Contraindications	61
Procedure	71
Risks Versus Benefits of tPA	73
tPA-Related Intracranial Hemorrhage: Management Protocol	76
Oropharyngeal Angioedema: Management Protocol	77

Cambridge University Press

978-1-108-73132-4 — Acute Stroke Care

James Grotta , Ahmad Riad Ramadan , Mary Carter Denny , Sean I. Savitz

Contents

vii

6 Endovascular Therapy 80

Time is Still Important	81
Planning an Endovascular Case	81
During the Procedure	90
After the Procedure	92
Risks and Benefits of EVT	94
Posterior Circulation	97

7 Neurological Deterioration in Acute Ischemic Stroke 101

Probable Causes	101
Initial Evaluation of Patients with Neurological Deterioration	102
Stroke Enlargement	102
Drop in Perfusion Pressure	104
Recurrent Stroke	105
Cerebral Edema and Mass Effect	107
Hemorrhagic Transformation	112
Metabolic Disturbance	114
Seizure	115
Symptom Fluctuations Without a Good Cause	115
The Uncooperative Patient	116

8 Ischemic Stroke Etiology and Secondary Prevention 119

Diagnostic Studies	119
Control Risk Factors	124
Antiplatelets and Anticoagulants	128
Atrial Fibrillation	132

Cambridge University Press

978-1-108-73132-4 — Acute Stroke Care

James Grotta , Ahmad Riad Ramadan , Mary Carter Denny , Sean I. Savitz

Table of Contents

[More Information](#)

Carotid Stenosis	136
Carotid Occlusion	139
Intracranial Stenosis	140
Lacunar Strokes	141
Cervical Arterial Dissection	143
Patent Foramen Ovale	146
9 Transient Ischemic Attack	153
Definition	153
Etiology	154
Presentation	154
Differential Diagnosis	154
Clinical Approach to a Patient With Suspected TIA	155
Prognosis After TIA	157
10 Less Common Causes of Stroke	160
Causes	160
Tests to Consider	166
11 Cerebral Venous Sinus Thrombosis	168
Epidemiology	168
Pathogenesis	168
Risk Factors	168
Clinical Picture	170
Diagnosis	170
Acute Management	171
Chronic Management	172
Complications of CVST	172
Prognosis and Recurrence	173

Cambridge University Press

978-1-108-73132-4 — Acute Stroke Care

James Grotta , Ahmad Riad Ramadan , Mary Carter Denny , Sean I. Savitz

Contents

ix

12 Intracerebral Hemorrhage

175

Definition	176
Etiology	177
Presentation	178
Diagnosis and Evaluation	179
Management	181
Prognosis and Outcome	192

13 Subarachnoid Hemorrhage

198

Definition	198
Epidemiology	198
Presentation	199
Diagnosis	199
Management of Ruptured Aneurysms	201
Unruptured Aneurysms	211

14 Organization of Stroke Care

215

Timely Care	215
Prehospital Stroke Care	216
Prehospital Stroke Scales	217
Drip-and-Ship versus Mothership Models	218
Stroke Centers	218
Telemedicine for Stroke (Telestroke)	221
Stroke Teams	221
Stroke Units	222

Cambridge University Press

978-1-108-73132-4 — Acute Stroke Care

James Grotta , Ahmad Riad Ramadan , Mary Carter Denny , Sean I. Savitz

Contents

15 Stroke Rehabilitation 226

Early Acute Stroke Rehabilitation Trials	227
Multidisciplinary Rehabilitation Team	228
Discharge Disposition	234

16 Transition to Outpatient Stroke Care 237

Psychosocial Evaluation	237
Stroke Prevention Clinics	238
Common Post-Stroke Sequelae	238

Appendix 1. IV tPA Dosing Chart	241
Appendix 2. Transcranial Doppler Ultrasound	244
Appendix 3. Medical Complications	247
Appendix 4. Brainstem Syndromes	253
Appendix 5. Anatomy of Cerebral Vasculature	256
Appendix 6. Brain Death Criteria	262
Appendix 7. Stroke Assessment Scales	266
Further In-Depth Reading	283
Index	285

Color plate section between pages 152 and 153
