

INDEX

- 2-octen-1-ol, 455
5-fluorocytosine, 475
 combinatorial therapy, 478
- Absidia*, 46, 455
Acaulospora, 51, 51, 463, 554
Acaulosporaceae, 51
acervulus, 238, 239, 573
acetyl-CoA, 42, 43, 265, 267, 269, 271, 316, 513
acetylenes, 274
achlorophyllous, 356, 357, 360, 361, 363
Achlya, 26, 71, 124, 175, 212, 562
Acrasiales, 72, 94
Acrasiomycota, 72
Acrasis, 72, 561
Acremonium, 464
Acromyrmex, 389, 392
actin, 33, 80, 114, 124, 125, 126, 130, 133, 133, 176, 181, 234, 234, 244, 244
 associated myosins, 115
 binding proteins (ABPs), 114
 polymerisation, 114
actinomycete, 392, 489
activator–inhibitor model, 304
active transport, 120, 261, 358
actomyosin ring, 131
adhesins, 172, 184, 366
aflatoxicosis, 349, 458
aflatoxins, 52, 272, 349, 458, 459
AFTOL study, 41, 49, 58, 554
Agaricaceae, 60, 301, 389
Agaricales, 59, 60, 61, 258, 389, 392, 560
Agaricomycotina, 58, 59, 60, 67, 220, 559
Agaricus bisporus, 213, 257, 260, 266, 268, 273, 288, 305, 319, 320, 331, 465
Agaricus bitorquis, 206
Agaricus brunnescens, 206
agaritine, 273, 273
agglutinins, 172, 184
agonomycetes, 193
agricultural mycocides, 482
agricultural soil, 4, 250
 area on Earth, 3
 biota, 4
agricultural waste, 249, 290
 bioconversion, 533
 fuel alcohol, 345, 532
 hazardous, 352
agriculture
 ants, 389, 393
 applied genetics, 159
 beetles, 395
 climate change, 346
 fungi, 159
 fungicides, 481
 in insects, 388
 loss of production, 250
 origins, 11
 plant pathogens, 413
 waste production, 290
 yield, 408
Agrobacterium, 412
Agrobacterium tumefaciens
 transformation (AMT), 162
agroclavine, 49
AIDS patients
 cryptococcosis, 452
 fungal infections, 453
 ketoconazole, 480
Ajellomyces, 452
Albugo, 70, 420, 562
alcohol, 511, 512
Aleuria, 56, 57, 243
alkaloids
 endophyte, 376
 ergot, 273, 458
 phytoalexins, 426
allergic
 aspergillosis, 453
 reactions, 456
 reactions (ODTS), 456
 response to spores, 446
Allomyces, 554
 gametes, 43
 life cycle, 42
 parasitised by *Rozella*, 40
 pheromone, 43
Alternaria
 HC-toxin, 420
 leaf spot, 424
 potato early blight, 485
 sick building syndrome, 455
alternative splicing, 104, 148, 328
Amanita, 365
 branching strategies, 89
 CNS poison, 349
 colony simulation, 88, 89
 metal accumulation, 347
 mycorrhizas, 357
 nonspecific mycorrhiza, 73
 poisoning, 456
 psychotropic, 349
 toxins, 273, 273, 274
 young mycelium, 81
amanitin, 274
amatoxin, 456
amber
 fossils, 29, 395, 402, 465
AmBisome, 478, 478
ambrosia beetle
 fungus farming origin, 394
 galleries, 395
 larvae, 395
 non-native, 396
 species, 395
Ambrosiella
 beetle cultivars, 395
 origin, 396
Amoebidiales, 45, 72, 438
amorphous cellulose, 251, 252
amphibians
 chytrid parasites, 397
 chytridiomycosis, 445
 EID (emerging infectious disease), 435
 loss of biodiversity, 435
amphipathic, 186
amphotericin, 475, 476, 476, 476
 combinatorial therapy, 478, 486, 488
 effects, 477
 liposomes, 478

Urediniomycetes, 58
 classification, 559
 urediospores, 421, 421
Uromyces, 59, 419, 421, 421
 classification, 559
Usnea, 56
 classification, 557
Ustilaginomycotina, 58, 149, 220, 559
 classification, 559
Ustilago, 58, 115, 119, 176, 220, 221, 222, 224, 419, 429
 classification, 559
 life cycle, 58
Ustilago maydis
 genome size, 144
 vacuoles, 32, 93, 113, 115, 125, 126, 127, 263, 314, 319
 valley fever
 (coccidioidomycosis), 451
 variotin, 273, 273
 Vegemite, 286
 vegetative compatibility, 150, 197, 200, 301, 463
 vegetative incompatibility, 198, 199, 219
 veratryl alcohol, 256, 257, 258, 354
 vertical mitochondrial transmission, 206
Verticillium, 56, 83, 148, 197, 283, 350, 444, 464, 465, 530
 vesicles, 32, 33, 43, 84, 94, 111, 115, 116, 117, 118, 126, 127, 175, 176, 181, 232, 232, 234, 542
 liposomal, 478
 of arbuscular mycorrhizas, 50, 51, 356, 356, 357
 vesicular–arbuscular mycorrhizas, 357
 vessel hyphae, 240
 victorin, 419
 virus-like particles, 207
Volvariella, 66, 226, 259, 268, 306, 306, 307, 307, 322, 465
Volvariella volvacea, 66
 voriconazole, 454, 479, 481, 486, 487
 combinatorial therapy, 488
 wall-building, 232, 232
 waste remediation, 290
 water moulds, 2, 24, 31, 70, 553, 562
 water potential, 262, 314, 369
 weathering, 3
 wet rot fungi, 351
 wheat stem rust, 415
 white-rot fungi, 10, 258, 354, 560
 white rust, 420
 Whitfield's ointment, 474
 whole organism biotechnology, 492
Wilcoxina, 367
 wild mushroom exploitation, 284, 285
 wild mushroom toxins, 457
 wine making, 512, 513
 witches' broom disease, 52, 53
 wood-decay fungi, 9, 344, 351
 bioluminescence, 258
 chlorohydrocarbon release, 354
 in buildings, 351
 wood ear fungus, 285
 woodland mushrooms, 73, 357, 363

- wood-wide-web, 357, 366
 world's largest individual organism, 412
 Woronin bodies, 93, 109, 130
 Wurzelfilze, 355
 Wurzelsymbiose, 355
- Xerocomus*, 62
 mycoparasite, 464, 464
 xylanases, 252, 397, 460, 511, 520, 521
 xylans, 80, 252
Xylaria, 56, 72
 classification, 558
Xylariales
 classification, 558
 xylosidase, 252
 yapsins, 180
 yeast
 basidiomycetous, 53, 59, 173
 life cycle, 214
 lipophilic, 58, 481
 mating type switching, 215
 yeast artificial chromosomes, 163
 yeast cell cycle, 135
 yeast dimorphism, 135
 yeast epiphytes, 378
 yeast genome, 145, 154
 yeast, origins, 154
- zearalenone, 272
 zinc finger, 164, 236, 236, 326
 zinc-finger nucleases
 gene editing, 164
Zoopagales, 45, 46
 classification, 555
 zoospores
 biflagellate, 70
 entomogenous fungi, 442
 free cell formation, 43
 of anaerobic chytrids, 41
 of chytrids, 39, 396
 of *Oomycota*, 70
 opisthokont, 26, 551
- zygomycete
 classification, 554
 zygomycetes, 25, 29, 30, 45, 48, 194, 226,
 438, 487
 hyphal growth units, 83
 zygomycosis, 454
Zygomycota, 554
 classification, 554
 is polyphyletic, 45
Zygosaccharomyces, 54
 zygosporangium, 45
 zymogen, 123, 176
