## I THE THREE-FOLD CHALLENGE OF ENGAGING WITH SCIENCE IN INTERNATIONAL ENVIRONMENTAL ADJUDICATION

### 1 Introduction to a Comparative Study on Judicial Engagement with Science

- I Science Enters International Environmental Adjudication 3
- II The Three-Fold Challenge of Using Science in Adjudication: The Context 9
- III Judicial Engagement with Science: The Framework 10
- IV Science and the Legitimacy of Judicial Reasoning: The Focus 13
- V International Environmental Adjudication: The Scope of This Study 15
- VI Structure of the Book 17

### 2 The Rules of Judicial Engagement with Science: A Three-Fold Challenge

- I The Three-Fold Challenge of Using Science in an Adjudicatory Setting 20
  - 1 Epistemic Challenge: Clash of Cognitive Authorities 21
  - 2 Doctrinal Challenges: Structural Differences between Law and Natural Sciences 27

Contents

V Standard and Extent of Judicial Review 101
  1 The Extent of Review: Justiciability of the Term Scientific Research 102
  2 Standard of Review: The Reasonableness Test 106
  3 Doctrinal Implications of the Reasonableness Test for the Judicial Purview 116

4 Science in the Practice of Inter-State Arbitral Tribunals 118
   I Science Enters Environmental Adjudication 119
   II Framing of Disputes: Carving Out Science or Harnessing Its Authority 119
     1 Marginalizing Science by Adjudicators 120
     2 Marginalizing Science by the Plaintiff 124
     3 Including Science in the Legally Relevant Aspects of Disputes 126
   III Scientific Fact-Finding in International Arbitration 129
     1 Setting a High Bar: Surprisingly Thorough Fact-Finding 130
     2 Appointing Expert Arbitrators 132
     3 Appointing Ex Tribunal Experts 135
   IV Causal Inquiry 137

5 Science in the Environmental Jurisprudence of Regional Human Rights Courts 139
   I Science before Human Rights Courts in Environmental Complaints 140
     1 Environmental Claims in the European System 140
     2 Environmental Claims in the Inter-American System 141
     3 Environmental Claims in the African System 145
   II Framing the Judicial Inquiry 145
   III Causal Inquiries to Handle Science in Human Rights Claims 146
     1 Sources of Causal Uncertainty Inherent in Cases of Toxic Exposure 147
     2 Role of Science-Based Causality in the European System 150
     3 Causal Inquiry in the European System: A Proxy-Based Assessment 153
     4 Science-Intensive Causal Links in the Inter-American System 164
     5 Causal Links in the African System 168
   IV Scientific Fact-Finding Techniques 169
     1 The Fact-Finding Powers of the Strasbourg Court 169
     2 Fact-Finding of the Inter-American Court in Cases Involving Environmental Damage and Pollution 172
     3 Fact-Finding Powers of African Human Rights Courts 175
## Contents

**V Standard of Review in Human Rights Adjudication**

1. The Strasbourg System: The Margin of Appreciation Doctrine
2. The Inter-American and African Systems: Measure of Deference

**6 Scientific Claims before the WTO**

I Science in the Context of WTO Law

II Scientific Fact-Finding in the WTO: Practices of Using Scientific Expertise
   1. Party-Appointed Experts
   2. Independent Experts: Panel-Appointed Experts and In-House Expertise
   3. Novel Ways of Expert Consultation
   4. Standards Issued by International Organizations

   1. Policy Dilemmas in Setting the Standard of Review
   2. Bordering De Novo Review in Early SPS Cases: From Hormones to the Panel Report in Continued Suspension of Obligations
   3. Turning Towards a More Deferential and Nuanced Approach: A Two-Stage Standard of Review
   4. Appraisal of the Changing Standards of Review
   5. Reasoning Techniques: With or Without Scientific Rationality

**7 Science in the Practice of Investment Arbitral Tribunals**

I Science in Investor-State Environmental Arbitration
   1. Environmental Disputes Brought before Investment Arbitral Tribunals
   2. Entry Points for Science in Environmental Investment Disputes

II Framing of Disputes: Strategically Managing the Science-Intensity of the Legal Inquiry
   1. Framing Techniques of Litigants
   2. Adjudicatory Framing Techniques

III Scientific Fact-Finding Techniques in Investment Arbitration
   1. Party-Appointed Experts
   2. Tribunal-Appointed Experts
   3. Engagement with Expertise: Appraisal from a Legitimacy Point of View
# Contents

IV Causal Inquiry

V Standard and Extent of Adjudicatory Review of Scientific Claims
  1 Affording Deference to Host States’ Scientific Claims
  2 Standards of Review: Indicia of Credible Scientific Positions

8 Science Appears before the International Tribunal for the Law of the Sea
  I Science Enters Environmental Disputes Brought before ITLOS
    1 Remarks on the Institutional Set-Up
    2 Entry Points for Science in Legal Disputes
  II Framing Environmental Disputes
    1 Science-Intensive Disputes Are Deemed Justiciable
    2 Response to Uncertain Risks: Issuing Precautionary Measures
    3 Science as Both a ‘Progressive Ceiling’ and a ‘Hard Floor’ for State Obligations
    4 Referring Disputes to Expert-Led Consultation of the Parties
  III Scientific Fact-Finding Techniques
    1 Ex Parte Scientific Experts
    2 Enhancing the Tribunal’s Internal Expertise
    3 Standard of Proof
  IV Causal Inquiry

III Engaging with Scientific Knowledge in the Judicial Reasoning

9 Trends in Judicial Engagement with Science: A Comparative Assessment
  I Judicial Techniques Adjusting the Level Of Science
    In Adjudicatory Inquiry
    1 Downplaying Science: And a Corresponding Need for Non-Scientific Justifications in the Reasoning
    2 Integrating Science in the Judicial Inquiry: And Harnessing Its Cognitive Authority
  II Framing Legal Disputes: Choosing Relevant Questions to Decide
    1 Adjudicatory Techniques Serving to Carve Out Science from the Judicial Inquiry

# Contents

2 Incorporating Science in the Judicial Inquiry: Framing Disputes to Harness Science’s Cognitive Authority 275

III Comparative Analysis of International Scientific Fact-Finding Techniques 279
1 Adjudicators Distancing Themselves from Scientific Expertise 279
2 Avenues of Engaging with Scientific Expertise 284

IV Causal Inquiry: The Role of Science in the Causal Assessments 289
1 Causal Inquiry that Downplays the Role of Science 290
3 Assessment: The Status of Science in the Causal Policy of International Courts 312

V Trends in Setting the Standard of Judicial Review 317
1 Balancing between Deferential and Intrusive Review 317
2 Scrutinizing Scientific Claims: With or Without Reference to Scientific Rationality 319

VI Concluding Remarks: Where Do International Courts Stand with Science? 329

10 Science and the Legitimacy of Judicial Reasoning 332
I Science in the Judicial Reasoning: Implications for Legitimacy 333
1 Appealing to Scientific Rationality 336
2 Relying on Purely Legal Rationality in Judicial Reasoning 340
3 Reasoning with Intuitive Rationality 347
4 Hybrid Concepts in Adjudicatory Reasoning 351
III Guidance for Selecting the Appropriate Reasoning Style: Some Recommendations 357
1 On the Interdisciplinary Nature of the Judicial Function 357
2 General Recommendations for Selecting the Appropriate Reasoning Style 359

11 Conclusion 367
