<i>Foreword</i>	<i>page</i> xiv
Mihai Putinar	
<i>Preface</i>	xvii
<b>PART ONE PRELIMINARIES: ENTRYWISE POWERS PRESERVING POSITIVITY IN A FIXED DIMENSION</b>	
<b>1 The Cone of Positive Semidefinite Matrices</b>	3
<b>2 The Schur Product Theorem and Nonzero Lower Bounds</b>	16
<b>3 Totally Positive (TP) and Totally Nonnegative (TN) Matrices</b>	23
<b>4 Totally Positive Matrices – Generalized Vandermonde and Hankel Moment Matrices</b>	32
<b>5 Entrywise Powers Preserving Positivity in a Fixed Dimension</b>	40
<b>6 Midconvex Implies Continuity, and <math>2 \times 2</math> Preservers</b>	46
<b>7 Entrywise Preservers of Positivity on Matrices with Zero Patterns</b>	55
<b>8 Entrywise Powers Preserving Positivity, Monotonicity, and Superadditivity</b>	64
<b>9 Loewner Convexity and Single Matrix Encoders of Preservers</b>	72
<b>10 Exercises</b>	84

<b>PART TWO ENTRYWISE FUNCTIONS PRESERVING POSITIVITY IN ALL DIMENSIONS</b>	
<b>11</b>	<b>History – Schoenberg, Rudin, Vasudeva, and Metric Geometry</b> 97
<b>12</b>	<b>Loewner’s Determinant Calculation in Horn’s Thesis</b> 114
<b>13</b>	<b>The Stronger Horn–Loewner Theorem via Mollifiers</b> 120
<b>14</b>	<b>Stronger Vasudeva and Schoenberg Theorems via Bernstein’s Theorem</b> 127
<b>15</b>	<b>Proof of the Stronger Schoenberg Theorem (Part I) – Positivity Certificates</b> 135
<b>16</b>	<b>Proof of the Stronger Schoenberg Theorem (Part II) – Real Analyticity</b> 144
<b>17</b>	<b>Proof of the Stronger Schoenberg Theorem (Part III) – Complex Analysis</b> 151
<b>18</b>	<b>Preservers of Loewner Positivity on Kernels</b> 155
<b>19</b>	<b>Preservers of Loewner Monotonicity and Convexity on Kernels</b> 159
<b>20</b>	<b>Functions Acting Outside Forbidden Diagonal Blocks</b> 168
<b>21</b>	<b>The Boas–Widder Theorem on Functions with Positive Differences</b> 176
<b>22</b>	<b>Menger’s Results and Euclidean Distance Geometry</b> 190
<b>23</b>	<b>Exercises</b> 203
<b>PART THREE ENTRYWISE POLYNOMIALS PRESERVING POSITIVITY IN A FIXED DIMENSION</b>	
<b>24</b>	<b>Entrywise Polynomial Preservers and Horn–Loewner-Type Conditions</b> 213
<b>25</b>	<b>Polynomial Preservers for Rank-1 Matrices, via Schur Polynomials</b> 220
<b>26</b>	<b>First-Order Approximation and the Leading Term of Schur Polynomials</b> 228

Contents		xiii
<b>27</b>	<b>Exact Quantitative Bound – Monotonicity of Schur Ratios</b>	233
<b>28</b>	<b>Polynomial Preservers on Matrices with Real or Complex Entries</b>	245
<b>29</b>	<b>Cauchy and Littlewood’s Definitions of Schur Polynomials</b>	256
<b>30</b>	<b>Exercises</b>	264
	<i>Part I: Bibliographic Notes and References</i>	270
	<i>Part II: Bibliographic Notes and References</i>	273
	<i>Part III: Bibliographic Notes and References</i>	276
	<i>References</i>	277
	<i>Index</i>	291
