## Contents

<i>Preface</i>	<i>page</i>	<i>xiii</i>
<b>1 Some basics</b>		1
1.1 Kronecker's theorem		1
1.2 Factorisation of cyclotomic expressions		3
1.3 Jensen's formula		6
1.4 Families of Mahler measures		9
Chapter notes		11
Additional exercises		12
<b>2 Lehmer's problem</b>		14
2.1 Smyth's theorem		14
2.2 Dobrowolski's bound		19
2.3 A discriminated problem about discriminants		22
Chapter notes		27
Additional exercises		28
<b>3 Multivariate setting</b>		30
3.1 Mahler's invention		30
3.2 Newton polytopes		33
3.3 Special Mahler measures		36
3.4 Limits of multivariate Mahler measures		37
3.5 Reciprocal vs non-reciprocal polynomials		40
Chapter notes		44
Additional exercises		45
<b>4 The dilogarithm</b>		49
4.1 The $q$ -binomial theorem and pentagonal identity		49
4.2 The Rogers and Bloch–Wigner dilogarithms		53
4.3 Maillot's formula		56
Chapter notes		58
Additional exercises		58

x	<i>Contents</i>	
<b>5</b>	<b>Differential equations for families of Mahler measures</b>	62
5.1	A poly family	62
5.2	Boyd's list and other instances	66
5.3	Three-variate Mahler measures	67
	Chapter notes	68
	Additional exercises	69
<b>6</b>	<b>Random walk</b>	73
6.1	Density of a random walk	73
6.2	Linear Mahler measures	74
6.3	Random walk variations	77
	Chapter notes	80
	Additional exercises	81
<b>7</b>	<b>The regulator map for <math>K_2</math> of curves</b>	83
7.1	Algebraic curves and their $K_2$ groups	83
7.2	The regulator map	86
7.3	Relation to the Mahler measure	89
	Chapter notes	91
	Additional exercises	92
<b>8</b>	<b>Deninger's method for multivariate polynomials</b>	95
8.1	Deligne–Beilinson cohomology	95
8.2	Beilinson's conjectures	98
8.3	Deninger's method	101
8.4	Mahler measures and values of $L$ -functions	104
	Chapter notes	106
	Additional exercises	107
<b>9</b>	<b>The Rogers–Zudilin method</b>	109
9.1	Modular curves, modular units and modular forms	109
9.2	Deninger's method applied to $X_1(15)$	113
9.3	The Rogers–Zudilin trick	115
	Chapter notes	118
	Additional exercises	119
<b>10</b>	<b>Modular regulators</b>	124
10.1	Universal elliptic curves	124
10.2	Shokurov cycles	127
10.3	Eisenstein symbols	128
10.4	Regulator integrals	131
10.5	Applications	133
	Chapter notes	135
	Additional exercises	135

<i>Contents</i>		xi
<b><i>Appendix</i></b>	<b>Motivic cohomology and regulators</b>	137
A.1	Motivic cohomology	137
A.2	Regulator maps	141
A.3	Deligne–Beilinson cohomology	146
<i>References</i>		153
<i>Index</i>		165
