

Cambridge University Press 978-1-108-80999-3 — The Taphonomy of Echinoids: Skeletal Morphologies, Environmental Factors, and Preservation Pathways James H. Nebelsick, Andrea Mancosu Table of Contents More Information

Contents

1	General Introduction	1
2	Multi-plated Skeletons and Regeneration	2
3	Influence of Test Architecture and Environment	4
4	Predation and Parasitism as Taphonomic Agents	5
5	Preservation Pathways in the Present and Past	8
6	A Case Study of Echinoid Preservation: The Miocene of Sardinia	14
7	Conclusions and Future Work	25
	References	27
