

INDEX

Locators in **bold** refer to tables; those in *italic* to figures

- acidification of the oceans 62, 261
- Africa
 energy 67, 79
 food wastage 44
 inequality/wealth distribution 150–151
 population growth 170
- agriculture *see* food and agriculture
- air pollution 123–125, 247
- air travel 5, 242
 food miles 34–36
 impact of virtual meetings 129–130
 low carbon 127–128
 personal actions 129
 risks of further growth 140
- algal biofuels 88–89
- Anderson, Kevin 129
- animal sources of food 18–22, 259
 inefficiency of animal feeds 242–243
 laboratory grown meat 51–52, 75–77
 micro-nutrients 20–21
 protein 18–20, 19
 risks of further growth 138
- Anthropocene 2, 69, 222–224, 243
- antibiotics resistance 21–22, 29
- appearances, over-valuing 205
- appreciation, simple pleasures 140–141, 209–210, 213
- armaments industry, and employment 172–173
- artificial intelligence 189
- atomic particles analogy of wealth distribution 154–158
- Australia 77–79, 78, 99–100
- autonomous cars 126
- autonomy/being in control 295
- awareness *see* appreciation; self-awareness
- balloon squeezing effect *see* rebound effects
- Bangladesh 78, 79–80, 240
- batteries, storage of renewable energy 81
- Belgium 78, 79–80
- belief systems 214–216, 265–266
- belonging 294–295
- Berners-Lee, Mike
 Burning Question (with Clark) 4–5, 104, 244–245
 How Bad Are Bananas? 36, 168, 256
- big-picture perspective 208, 213, 222–224
- biochar 104
 bioenergy with carbon capture and storage (BECCS) 103
- biodiversity 49, 60–62, 116–119, 117–119, 119, **119**, 243–244
 big-picture perspective 222–223
 pressure on land 88–89, 103
- Bioregional, One Planet Living 181–183, 183
- boats/shipping 130–132, 264
- Brazil 77–79, 78

- Brexit 244
- Buddhism 215, 237–238
- bullshit 201, 244; *see also* fake news; truth
- Burning Question* (Berners-Lee and Clark) 4–5, 104, 244–245
- business as usual 9, 146, 233
- businesses 179, 245
- environmental strategies 184–185
 - fossil fuel companies 253
 - perspectives/vision 180
 - role in wealth distribution 157
 - science-based targets 185–187
 - systems approaches 180–183, 182–183
 - technological changes 188–190
 - useful/beneficial organisations 179–180
 - values 180, 196; *see also* food retailers
- call centres, negative effect of performance metrics 143
- calorific needs 13, 270–271
- carbohydrates, carbon footprint 26–29, 28
- carbon budgets 58–59, 98, 166, 191–192, 231, 233–234
- carbon capture and storage (CCS) 102–103, 159–160, 240–241, 245
- carbon dioxide emissions, exponential growth 231–233, 232, 250; *see also* greenhouse gas emissions
- carbon footprints
- agriculture 25, 25–29, 33–34
 - carbohydrates 28
 - local food/food miles 34–36
 - population growth 169
 - protein 27
 - sea travel 130–132
 - vegetarianism/veganism 30–31
- carbon pricing 166–167, 239
- carbon scrubbing 240–241, 245–246
- carbon taxes 160, 163
- CCS *see* carbon capture and storage
- celebrities 205
- change, embracing *see* open-mindedness
- chicken farms 29
- Chilean seabass (Patagonian toothfish) 37–38
- China 246
- global distribution of fossil fuel reserves 99–100
 - sunlight/radiant energy 77–79, 78
- choice/being in control 295
- cities, urban planning and transport 119–122
- citizen's wages 154–158, 174–175
- Clark, Duncan: *Burning Question* (with Berners-Lee) 4–5, 104, 244–245
- climate change (emergency) 3–5, 58, 62–63, 246
- big-picture perspective 222
 - biodiversity impacts 60–62
 - evidence against using fossil fuels 72–74
 - ocean acidification 62
 - plastics production/pollution 63–65, 63–64
 - rebound effects 59, 145–146, 186–187, 235–237, 236
 - science-based targets 185–187
 - scientific facts 58–60, 229–241, 232, 236
 - systems approaches 180–183, 182
 - values 191–192
- coal 246; *see also* fossil fuels

- comfort breaks, performance
 - metrics 143–145
- Common Cause* report (Crompton) 147
- community service 196
- commuting 246; *see also* travel and transport
- companies *see* businesses
- competence 295
- complexity 211, 213, 251; *see also* simplistic thinking
- consumption/consumerism 247
 - ethical 168, 190
 - personal actions 197
 - risks of further growth 139
 - values 195
- coronavirus disease (COVID-19) xvii
- corporate responsibility 249; *see also* businesses
- critical realism 198
- critical thinking skills 210–211, 213
- Crompton, Tom (*Common Cause* report) 147
- cruises 132
- cultural norms
 - big-picture perspective 224
 - values 193–194
- cultures of truth 200–201
- cumulative carbon budgets 58, 231
- cycling 5, 114–116, 118, 132–133, 247
- dairy industry 259; *see also* animal sources of food
- democracy 159–160, 247–248, 268–269; *see also* voting
- denial 225, 256
- Denmark, wealth distribution 147–153
- Desai, Pooran 182–183
- desalination plants, energy use 109
- determinism 110–111, 248
- developed countries 248
 - energy use 109
 - food waste 14, 45, 269
- diesel vehicles 123–125, 125
- diet, sustainable 248; *see also* vegetarianism/veganism
- digital information storage, and energy efficiency 95
- direct air capture, carbon dioxide 103, 240–241, 245–246
- distance, units of 271
- double-sided photocopying metaphor 249
- driverless cars 126
- e-transport
 - e-bikes 118, 132–133
 - e-boats 131–132
 - e-cars 118, 122, 249–250
 - e-planes 127–128
 - investment 159–160
- economic growth 136, 249
 - big-picture perspective 223–224
 - carbon pricing 166–167
 - carbon taxes 160, 163
 - consumer power through spending practices 168
 - GDP as inadequate metric 141–142, 144–145
 - investment 159–160
 - market forces 145–147
 - need for new metric of healthy growth 142–145
 - risks and benefits of growth 137–141, 138
 - trickledown of wealth 147–149, 148
 - wealth distribution 147–153, 149–158
- education 196, 249

- efficiency 249
- digital information storage 95
 - energy use 92–95
 - investment 159–160
 - limitations of electricity 82–97, 95–97
 - meat eating/animal feed 242–243
 - rebound effects 94, 237
- electric vehicles *see* e-transport
- electricity, limitations of use 82–97, 95–97; *see also* renewable energy sources
- empathy 194, 208–209, 213
- employment *see* work/employment
- enablement, businesses 184–185
- energy in a gas analogy of wealth distribution 154–158
- energy use 66, 98, 111–112
- current usage 66–67
 - efficiency 92–95
 - fracking 89–91, 91
 - growth rates over time *see below*
 - inequality 67, 100–102, 149
 - interstellar travel 133–135
 - limitations of electricity 82–97, 95–97
 - limits to growth 75–77, 76, 110–111, 237–238
 - nuclear fission 85–87
 - nuclear fusion 87
 - personal actions and effects 112–113
 - risks of further growth 138
 - sources 70–72
 - supplied by food 13
