University College London, 245, 246, 251
- Vail, Alfred, 6
Valentia Island, Ireland, 68, 82, 84, 85–96,
100–3, 104, 223–24, 226, 227–29
Varley unit (resistance), 149, 151, 154, 158
Varley, Cromwell Fleetwood, 14, 30, 87,
96, 153, 176, 235, 237
electrical measurement, 145–49, 151
electrical units and standards, 153,
157, 175
Joint Committee, 124–25, 127–28, 129,
153, 157
resistance coils, 132, 149, 151
on Whitehouse's induction coils, 103–4
Varley, S. A., 62, 64, 131
vector analysis, 256, 263, 270
vector potential, 207, 264, 266
Verdet, Émile, 191
Victoria, Queen, 92, 100, 114
volt, 3, 159, 169, 213, 254
Volta, Alessandro, 4
vortex ether theory, 162, 181–86, 189–92,
204, 206–7, 265, *See also* ether
- Wales, Prince of, 223, 237
Walker, C. V., 64, 81
Warwick, Andrew, 213, 255
Webb, F. C., 64, 99, 116, 121, 149
Weber, Wilhelm, 195
absolute system of electrical units, 75,
132, 155–56, 162, 163–69, 174,
188, 201
action-at-a-distance theory, 18, 25, 30,
190, 199, 274
ratio of units (*v*), 55, 190, 192, 203, 206,
209–10
resistance measurements, 75, 76, 151,
156, 169
unit of electrical resistance, 156, 169, 201
West, Charles, 126
Western and Brazilian Telegraph
Company, 245
Western Union Telegraph Company, 175
Wheatstone automatic telegraph, 260
Wheatstone bridge, 74, 144, 150, 151, 154,
162, 260
Wheatstone, Charles, 5, 75, 81, 151, 242
British Association Committee on
Electrical Standards, 159, 162
and Heaviside family, 259
Joint Committee, 122–24, 127, 134
resistance standard, 149, 153
White, James, 79, 81, 243, 248
Whitehouse, E. O. Wildman, 37, 46, 82,
118, 124
Atlantic cable (1857–58)
blamed for failure, 38, 96, 98, 128
design, 59, 61, 128
testing, 65, 66–67, 70, 77, 80,
129, 130
Atlantic Telegraph Company, 37, 57,
69, 107
conflicts with board of directors, 80,
81, 89, 91–95, 98, 99–100, 104
batteries, 66, 85
and Brett, 46, 50
and Bright, 56–57, 76
cable experiments, 47–55, 59, 62,
105, 128
commercial copper, 76–77
exchange with Preece (1858), 106–8
fault in Valentia harbor, fear of, 87, 90,
100, 104
and Field, 46, 50, 59
financial interests, 57
induction coils, 52, 56, 58, 66, 77, 78, 79,
82, 85–89, 94
effect on cable insulation, 86–89, 98,
99, 103–4, 129–30
Joint Committee testimony, 127–29
letters to press (1858), 100–5
magneto-electrometer, 70–74, 79
patents, 52, 57–58, 65, 73, 85, 101–2
praised by Mann, 63–64, 73
relays (receivers), 56, 58, 66, 73, 77, 79
use on Atlantic cable, 82, 85–91, 94,
101–2, 104
retardation of signals, 48–50, 52–55
and Seward, 89, 91–92
system of electrical measurement, 38, 69,
79, 101, 108, 130, 243
and Thomson, 50–58, 66, 68, 79–80,
85–86, 94–95, 101–2, 105
Whitworth, Joseph, 221
wireless telegraphy, 269, 272
Wise, Norton, 213
Wollaston, Charlton, 10, 33, 147, 149
Woodhouse, Henry, 68
