

CLIMATE REFUGEES

The last few years have witnessed a flurry of activity in global governance and international law seeking to address the protection gaps for people fleeing the effects of climate change. This book discusses cutting-edge developments in law and policy on climate change and forced displacement, including theories and potential solutions, issues of governance, local and regional concerns, and future challenges. Chapters are written by a range of authors from academics to key figures in intergovernmental organisations, and offer detailed case studies of policy developments in the Americas, Europe, South-East Asia, and the Pacific. This is an ideal resource for graduate students and researchers from a range of disciplines, as well as policymakers working in environmental law, environmental governance, and refugee and migration law. This is one of a series of publications associated with the Earth System Governance Project. For more publications, see www.cambridge.org/earth-system-governance

DR SIMON BEHRMAN is an associate professor at the School of Law, University of Warwick. He has published widely in the fields of asylum and immigration. He is the author of *Law and Asylum: Space, Subject, Resistance* (2018) and co-author of *Facilitating the Resettlement and Rights of Climate Refugees* (2018).

DR AVIDAN KENT is an associate professor in international law at the University of East Anglia. Avidan has published widely on a varied list of topics, including climate-induced migration, international environmental law, public participation, international courts, and international economic law (mostly investment law and WTO law).

The **Earth System Governance Project** was established in 2009 as a core project of the International Human Dimensions Programme on Global Environmental Change. Since then, the Project has evolved into the largest social science research network in the area of sustainability and governance. The Earth System Governance Project explores political solutions and novel, more effective governance mechanisms to cope with the current transitions in the socio-ecological systems of our planet. The normative context of this research is sustainable development; earth system governance is not only a question of institutional effectiveness, but also of political legitimacy and social justice.

The **Earth System Governance series** with Cambridge University Press publishes the main research findings and synthesis volumes from the Project's first ten years of operation.

Series Editor

Frank Biermann, Utrecht University, the Netherlands

Titles in print in this series

Biermann and Lövbrand (eds.), *Anthropocene Encounters: New Directions in Green Political Thinking*

van der Heijden, Bulkeley and Certomà (eds.), *Urban Climate Politics: Agency and Empowerment*

Linnér and Wibeck, *Sustainability Transformations: Agents and Drivers across Societies*

Betsill, Benney and Gerlak (eds.), *Agency in Earth System Governance*

Biermann and Kim (eds.), *Architectures of Earth System Governance: Institutional Complexity and Structural Transformation*

Contributors

Aline Burni is a researcher at the German Development Institute (DIE); PhD and MD in Political Science at the Federal University of Minas Gerais (UFMG, Brazil); and a research member of the Centre for Legislative Studies (CEL/UFMG).

Angelique Pouponneau is the chief executive officer of the Seychelles Conservation and Climate Adaptation Trust. Angelique is a lawyer (Seychelles and UK) and she holds an LLM in environmental law specialising in the law of the sea and natural resources law. Also, Angelique is a trained climate change negotiator under the Alliance of Small Island States (AOSIS) Climate Change Fellowship Programme at the United Nations with three years of experience within the United Nations Framework Convention on Climate Change (UNFCCC) process. She has worked in different countries in the Caribbean, Pacific, and the Indian Ocean on a wide range of projects relating sustainable fisheries; sustainable management of marine biodiversity within and beyond national jurisdiction; and climate change, in particular, climate adaptation, loss and damage, and climate finance. Furthermore, she served as a legal expert of the African Group of Sixth Committee in works of oceans and law of the sea at the United Nations. She also has experience working with civil society as a co-founder and board member for not-for-profit organisations in Seychelles and abroad.

Avidan Kent is an associate professor in international law. Avidan has written/edited books, reports, journal articles, and chapters on a varied list of topics, including climate-induced migration, international environmental law, public participation, international courts, and international economic law (mostly investment law and WTO law). Avidan holds an LLM from McGill University and a PhD from the University of Cambridge.

Ayoung Kim earned a juris doctor from Harvard Law School and works at a major international law firm. Her interest areas include climate change, business and human rights, and inequality.

Beatriz Felipe Pérez is Associate Researcher at the Tarragona Centre for Environmental Law Studies (CEDAT), Rovira i Virgili University (Tarragona, Spain). She is also co-founder of CICrA Environmental Justice. Her main research interests are climate migration, global justice, and environmental conflicts.

Camilla Schloss is a judge at the administrative court of Berlin, where she decides mainly on asylum and immigration cases. Prior to becoming a judge, she led analysis on gender and land regulatory reforms at the World Bank (Project Women, Business and the Law). She holds a master's degree in international development from Sciences Po, Paris, and an LLM from Georgetown University.

Cosmin Corendea works as a professor and vice dean for the Jindal School of Environment and Sustainability (JSES) in India, where he teaches classes on Environmental Law, Climate Change and Policy, and Refugee and Migration Law. He is best known for initiating and developing the concept of 'International Hybrid Law' in 2007 and authoring the book on this subject named *Legal Protection of the Sinking Islands Refugees*. Professor Corendea recently authored *The Displacement Guidelines in the Context of Climate Change and Disasters* (2019), an innovative approach to developing domestic climate legislation, and *The Planned Relocation Guidelines – A Framework to Undertake Climate Change Related Relocation* (2018), a first of its kind on the topic of relocation in response to climate change impacts, both policies for the government of Fiji.

Dina Ionesco is the head of the Migration, Environment and Climate Change Division at the UN Migration Agency (IOM). In this capacity, she oversees IOM's policies and programmes on migration, environment, and climate change and leads IOM's contributions to policy processes, such as the climate change negotiations and related climate conventions.

Diogo Andreola Serraglio is Postdoctoral Guest Researcher at the German Development Institute (DIE); PhD and MD in Law at Pontifical Catholic University of Paraná (PUCPR, Brazil); Research Member of the South American Network for Environmental Migrations (RESAMA) and Member of the World Commission on Environmental Law (WCEL) of the International Union for the Conservation of Nature (IUCN).

Elin Jakobsson holds a PhD in international relations. She is a researcher at the Swedish Institute of International Affairs and teaches international cooperation at Stockholm University. Her research focuses on international norm diffusion with an interest in societal security norms in general and policy discussions on climate-induced migration in particular.

Elisa Fornalé has been a Swiss National Science Foundation (SNSF) Professor at the World Trade Institute (WTI), University of Bern since January 2017. She is the Principal Investigator of the project “Framing Environmental Degradation, Human Mobility and Human Development as a Matter of Common Concern” (www.climco2.org), which is exploring the adverse impacts of climate change through a pilot case study in the Small Pacific Island States. Until April 2019 she was involved in the Horizon 2020 project CLISEL: Climate Security with Local Authorities, which addressed the local dimension of the climate change–security nexus. She is an appointed member of the Advisory Committee of the Platform on Disaster Displacement; a member of the International Law Association (ILA) Committee on International Law and Sea Level Rise; and of the COST Action on Drylands facing change: interdisciplinary research on climate change, food insecurity, political instability (CA 16233). More recently, she took up the position of Gender Coordinator of the Gender Team at the WTI and initiated the Gender Lecture Series – Know the GAP. She holds a law degree from the University of Trento, Italy, and a PhD in law from the University of Palermo, Italy, and she specialises in international law, human rights, migration, and environmental humanities.

Ezekiel Simperingham is the International Federation of Red Cross and Red Crescent Societies (IFRC) Global Lead on Migration and Displacement based in Geneva, Switzerland. Ezekiel leads the work of the IFRC globally on migration and displacement, including emergency preparedness and response, longer-term programming, advocacy and diplomacy, and capacity strengthening and technical guidance. He is an international lawyer with more than fifteen years’ experience working on migration, displacement, human rights, and rule-of-law initiatives. Ezekiel has worked with the United Nations, government agencies, international financial institutions, non-governmental organisations and civil society. Ezekiel has a masters in law from New York University School of Law. He is currently a member of the UNFCCC Task Force on Displacement, representing the IFRC.

Fernanda de Salles Cavedon-Capdeville is Postdoctoral Researcher at the Federal University of Santa Catarina (UFSC, Brazil); PhD in Environmental Law at the University of Alicante (Spain); and Research Member of the South American Network for Environmental Migrations (RESAMA) and of the International Center for Comparative Environmental Law (CIDCE, France).

Francesca Rosignoli is a postdoctoral fellow at the Political Science Department at Stockholm University. Her research focuses on environmental justice, climate-induced migration, environmental political theory, and international law. She is part of the collective project ‘Environmental Research in the Human Sciences

Area' aimed at creating an interdisciplinary dialogue within and outside Stockholm University. Her monograph *Environmental Justice for Climate Refugees* is forthcoming with Routledge.

Frank Biermann is a research professor of Global Sustainability Governance with the Copernicus Institute of Sustainable Development at Utrecht University, the Netherlands. Biermann is an internationally leading scholar of global institutions and organisations in the sustainability domain. He pioneered the 'Earth System' governance paradigm in global change research in 2005 and was the founder and first chair (2008–2018) of the Earth System Governance Project, a leading global transdisciplinary research network of sustainability scholars. He currently directs a 2.5-million EUR research programme on the steering effects of the sustainable development goals, supported by a European Research Council 'Advanced Grant'. Biermann has authored or edited eighteen books and published about 200 articles and chapters in peer-reviewed journals and academic books, respectively. He is frequently invited to participate in advisory committees and has spoken in the United Nations General Assembly, the European Parliament, and the European Economic and Social Committee. In 2021, the Environmental Studies Section of the International Studies Association presented him with its Distinguished Scholar Award.

Jolanda van der Vliet is a legislative lawyer. Prior to this, she worked as a lecturer in migration law at the Hague University of Applied Sciences while she completed her PhD on the international legal protection of environmental refugees at Leiden University.

Kees van der Geest is head of Environment and Migration: Interactions and Choices (EMIC) at the United Nations University Institute for Environment and Human Security (UNU-EHS). As a human geographer, he studies the impacts of climate change, human mobility, environmental risk, adaptation, livelihood resilience, and rural development. Key features of his work are the people-centred perspective and the mixed-method approach combining quantitative and qualitative research tools. His work has contributed substantially to expanding the empirical evidence base on migration–environment linkages and impacts of climate change beyond adaptation (loss and damage). Kees has extensive fieldwork experience in the global south, mostly in Ghana (five years), but also in Burkina Faso, Vietnam, Bangladesh, Nepal, Marshall Islands, and Bolivia.

Khaled Hassine is a lawyer, specialising in international and human rights law. He has worked extensively on displacement and housing, land and property (HLP) rights, notably redress mechanisms and land solutions, including for climate-displaced persons. He has advised numerous peace operations in various regions,

including Georgia, the Sudan, Yemen, and Kosovo. He is a member of the HLP Group of the UN Global Protection Cluster and the United Nations High Commissioner for Refugees (UNHCR) Livelihoods Advisory Board. He was honoured with an Academia award for his outstanding contribution to research on HLP rights and mass claims procedures in post-conflict situations. He currently works at the UN Secretariat with the UN Human Rights Office.

Margaretha Wewerinke-Singh is an assistant professor of Public International Law at the Grotius Centre for International Legal Studies (Leiden University) and an adjunct senior lecturer in Environmental Law at the Pacific Centre for Environment and Sustainable Development (University of the South Pacific). She is also an attorney at Blue Ocean Law, a boutique international law firm based in Guam specialising in human and indigenous rights, self-determination, and environmental justice in the Pacific. Prior to joining Leiden University, Margaretha was a senior lecturer in environmental law at the University of the South Pacific School of Law in Port Vila, Vanuatu, where she coordinated the environmental law programme. She currently leads a four-year research project ‘Climate Justice through the Courts’, which examines the effectiveness and potential drawbacks of rights-based climate litigation, and coordinates the IUCN WCEL Climate Change Specialist Group project ‘Fighting Climate Change: A Best Practice Guide for Judges and Courts’ (with Sarah Mead).

Mariam Traore Chazalnoel is a senior expert in migration, environment, and climate change at the United Nations Migration Agency (IOM). She has specialised in global policy questions related to climate change and migration since 2013.

Melina Antoniadis is a Canadian lawyer specialising in public international law, human rights, and climate litigation. She has advised in proceedings and has held positions at the International Court of Justice, the Court of Justice of the European Union, the European Court of Human Rights, and the Extraordinary Chambers in the Courts of Cambodia. Ms Antoniadis is a graduate of Leiden University (LLM, cum laude) and McGill University (BCL/LLB). A member of the Law Society of Ontario, she completed her legal training at the Ontario Ministry of the Attorney General, where she qualified as a barrister and solicitor. Ms Antoniadis’ practice in climate litigation includes advising on an application to the European Court of Human Rights concerning climate change-related State action resulting in human rights violations. Her current research focuses on the right to mental health of populations impacted by climate change, namely small island developing states. She was born in Montreal and is of Greek and Cambodian origin. She presently lives in London.

Miriam Cullen is Assistant Professor of Climate and Migration Law at Copenhagen University. She sits on the Advisory Committee to the Platform on Disaster Displacement and is co-founder of the Nordic Network on Climate-Related Displacement and Mobility. Her current research is funded by the Independent Research Fund Denmark and examines international legal protections for people-displaced reasons related to climate change. She has published on human rights, disaster and displacement, climate change and displacement, and the United Nations and its relationship with other international organisations. Before coming to academia, Miriam managed numerous parliamentary committee enquiries, law reform commission processes, and was a policy officer with the Australian Department of Foreign Affairs and Trade. She holds a PhD from the University of Copenhagen, an LLM (international law) from the Australian National University, and bachelors degrees in politics and law from Monash University. She is admitted to practice in the Supreme Court of the Australian Capital Territory.

Robert Oakes is a senior researcher in the Environment and Migration: Interactions and Choices (EMIC) Section at the United Nations University Institute for Environment and Human Security (UNU-EHS). He uses an interdisciplinary approach to investigate the causes and consequences of environmental migration and its governance. Dr Oakes is particularly interested in how psychological and cultural factors can influence risk perception and, in turn, migration and evacuation decision-making at the individual and societal level. He lectures on themes related to environmental risk, migration, and global health. He has a PhD in human geography from the University of Sussex.

Secretariat of the Platform for Disaster Displacement is a State-led initiative working towards better protection for people displaced across borders in the context of disasters and climate change. It is the successor organisation to the Nansen Initiative, which produced the 2015 Agenda for the Protection of Cross-Border Displaced Persons in the Context of Climate Change.

Simon Behrman is Associate Professor in Law at the University of Warwick and a visiting lecturer at Royal Holloway, University of London and at Libera Università Internazionale degli Studi Sociali “Guido Carli” in Rome. He has published widely on aspects of asylum, refugee, and migration law, with a particular focus on the historical development of refugee law and multidisciplinary approaches to the concept of asylum. In addition to work on climate refugees, Simon is also currently working on a long-term project on asylum in South Asia. Among his publications are *Law & Asylum: Space, Subject, Resistance* (2018), and

with Avidan Kent, *Facilitating the Resettlement and Rights of Climate Refugees* (2018), and ‘Climate Refugees’: *Beyond the Legal Impasse?* (2018).

Sumudu Atapattu, LLM, PhD (Cambridge), Attorney-at-Law (Sri Lanka), is the Director of Research Centers and International Programs at the University of Wisconsin Law School. She is affiliated with UW-Madison’s Nelson Institute for Environmental Studies, Global Health Institute, the Center for South Asia, and the 4 W Initiative, and is the Executive Director of the Human Rights Program. She serves as the Lead Counsel for Human Rights at the Center for International Sustainable Development Law, Montreal, and is affiliated faculty at the Raoul Wallenberg Institute for Human Rights, Sweden. Her books include *Emerging Principles of International Environmental Law* (2006), *Human Rights Approaches to Climate Change: Challenges and Opportunities* (2016), *International Environmental Law and the Global South* (co-editor, 2015), *Human Rights and Environment: Key Issues* (co-author, 2019), and *The Cambridge Handbook on Environmental Justice and Sustainable Development* (co-editor, 2021).

Tyler R. Giannini is a clinical professor of Law and a director of Harvard Law School’s International Human Rights Clinic. His work focuses on accountability litigation, business and human rights, climate change displacement, and community-centred approaches to human rights. He is also an expert on human rights and international crimes in Myanmar, and prior to joining Harvard Law School, he was a founder and director of EarthRights International, an organisation at the forefront of efforts to link human rights and environmental protection. After receiving an Echoing Green Fellowship to start EarthRights in 1995, Giannini spent a decade in Thailand with the organization conducting investigations and groundbreaking human rights litigation in *Doe v. Unocal*.

Acknowledgements

The editors wish to thank, first of all, all the authors in this book for sharing their ideas with us and for being so patient during the process of putting the manuscript together. We would also like to thank Sarah Lambert at CUP for her encouragement and support in shepherding the book to publication and Cherrisse Francis for her excellent work on copy-editing and compiling the index.
