acoustic waves, 41, 57, 71–72, 80, 81, 83, 89, 148, 233, 239–243, 318, 380, 436
  Green's function, 148, 151
adjoint,
  correlation field, 417, 418
  discrete, 438–440
  field, 257, 260, 263, 265–266, 378, 380, 381–383, 384, 385, 387–389, 390, 412, 416–417, 419, 438, 440
  Green's function, 260, 388
  operator, 259, 380, 381, 416, 439
  source, 380, 387, 389, 390, 391–397, 416, 437
  stress tensor, 383
  techniques, 2, 10, 259, 338, 357, 385–397, 400, 403, 408, 411, 417, 430, 433
  wave equation, 260
air waves, 65
Airy phase, 5, 286
AK135 model, 101, 103, 116, 175, 180, 182–183, 189, 190, 193, 207, 209, 213, 225–226, 229, 278, 281, 284, 298, 326–327, 333, 339
ambient noise, 1, 3, 8, 9, 86, 129, 135, 142, 144, 149, 153, 155, 157–167, 169, 170, 173–175, 177–178, 191, 192, 200, 204, 230, 232, 238, 309, 312, 398, 413, 414, 422, 424
  atmospheric, 139, 140, 157, 158, 161, 421
  field, 129, 136, 157, 160, 161, 162, 173, 177, 178, 191, 192, 415
  oceanic, 135, 139, 140, 157, 158, 173
  seismic hum, 157, 159, 175, 414, 420, 421, 426, 427
  sources, 136, 143, 160–161, 164, 416, 424, 425
  tomography, 162, 167, 232, 309, 311, 312
  variations, 159
amplitude, 80, 120–121, 126, 134, 1378, 138, 155, 293, 294, 339, 391, 392, 395–397, 402, 419
analytic signal, 124
anelasticity, 15
angular order, 30, 32
anisotropy, 51, 79, 81, 124, 142, 145, 193, 221, 249, 253, 254, 272, 280, 284, 287, 313, 314, 318, 319, 321, 323, 331, 355, 411, 420, 445
  radial, 23, 314, 318, 319, 321, 323, 332
  transverse, 16, 23, 41
anti-causal branch, 148–150, 152, 161, 170, 172, 201, 417, 419, 421–423
arrival times, 222, 226, 230, 402
asthenosphere, 205, 206, 213, 214, 306, 313, 314, 318, 320
asymptotic approximations, 21, 33, 58, 59, 130, 166, 199
attenuation, 6, 14, 15, 21, 30, 36, 74, 79, 98, 112, 121, 124, 142–143, 148, 170, 184, 189, 191, 208, 212, 221, 223, 235, 239, 272–275, 279, 281, 290, 298, 317, 320, 330, 334, 392, 402, 411, 420, 428
  coda, 286, 294
  intrinsic, 286, 291, 305
automation, 411
azimuth, 32, 105, 130–132, 135, 140, 160, 161, 168, 235, 278, 279, 286, 288
azimuthal order, 16, 18, 19, 21

basis functions, 350, 386, 430–432, 440
Bayes' theorem, 341, 343, 430–432, 453
Bessel function, 20, 168, 169
body waves, 8, 9, 18, 22, 23, 26, 35, 55–57, 129, 133, 139, 157, 159, 173, 174, 178, 179, 191, 195, 222, 223, 229, 230, 255, 266, 268, 279, 308, 402, 414, 436
  teleseismic, 29, 30
  tomography, 230, 232, 319, 433
Born approximation, 39, 48, 89, 257, 258, 272, 386, 387
  first-order, 239, 257, 261, 263, 280, 287
Born series, 10, 39, 48, 257, 258, 272
bulk modulus, 148, 225
bulk-sound speed, 225–227, 228, 229

Cagniard–de Hoop method, 5
causal branch, 148–150, 152, 161, 170, 172, 201, 417, 419, 421–423
caustic, 185, 186
coda, 2, 9, 129, 139, 159, 178, 202, 240, 243, 277, 279–281, 283, 290, 293, 294, 296, 304, 320, 325
  attenuation, 286, 294
  coherence, 325
  coherent, 287
  correlations, 9, 179–196
  correlogram, 170
  decay, 233, 241, 286, 293
  diffuse, 287
  duration, 299
  envelope, 239
  regional, 281, 283, 288
  teleseismic, 139, 281, 286, 287, 290
  wavefield, 172
coherency, 169
computational seismology, 222, 399, 401, 429
convolution, 15, 35, 36, 38, 42, 55, 92, 114, 258, 419
core, 1, 17, 18, 27-29, 138, 178, 184, 192, 195, 224, 289, 290

More Information

core–mantle boundary, 16, 18, 28, 138, 175, 185, 186, 189, 192, 197–199, 224, 227, 228, 275, 287–289
correlation, 2, 8, 35, 38, 113, 129, 160, 175, 190, 201, 216
  anti-correlation, 287
  asynchronous, 170
  auto-correlation, 9, 36, 101, 105, 109, 113, 114, 116, 123, 135, 173, 174, 192, 193, 200, 202, 204, 207, 208, 213
  coda, 9, 172, 191, 196
  correlation of correlograms, 170, 172
  cross-correlation, 9, 35, 97, 98, 101, 105, 106, 116, 123, 131, 132, 137, 141, 142, 159, 162, 165, 169, 170, 174, 179, 193, 196, 200, 217, 392, 413, 417, 421
    multi-channel, 98, 101
  inversion, 415–427
  spatial, 233
  stacks, 184, 195, 200
  tensor, 113, 116, 143
  time shift, 98, 99, 120, 392, 393, 396, 397, 419, 422
correlation function, 143, 150, 166, 233, 234, 239, 280, 421
  radial, 227
correlation length, 239, 247
  horizontal, 235, 237, 238, 291, 301, 305
  vertical, 235, 237, 238, 291, 301, 305
correlation phases, 138, 178, 180, 181, 184–186, 189
correlation wavefield, 10, 129, 132, 133, 135, 136, 139–141, 179, 181, 187, 217, 413–415, 417
  global, 178, 179, 193
  observed, 179, 181, 186, 193, 194
  synthetic, 181, 186, 189, 193, 194
  tensor, 134
crust, 17, 30, 62, 66, 81, 108, 115, 162, 174, 191, 205, 206, 210, 222, 232, 234, 263, 274, 280, 282, 287, 295, 303, 307, 312, 314, 319, 321, 332, 401, 427, 436
crust–mantle boundary, 82, 115, 205, 206, 209, 214, 218, 295
cycle skips, 90, 128, 392, 400–403, 405, 407

data,
  covariance, 340
  importance, 348
  misfit, 340, 342, 344, 355, 376, 417
  resolution, 347
  space, 338, 341, 405
deconvolution, 84, 85, 87, 97, 104, 109, 116, 118, 123, 208, 211, 215
defocussing, 45, 79, 124, 223, 235, 270, 274, 287, 417
density, 14, 72, 81, 89, 180, 225, 236, 244, 251, 256, 260, 280, 291, 355, 403, 409, 410, 430, 445, 454
derivatives, directional, 356, 378, 390, 416
descent direction, 356, 357, 363–365, 370
descent methods, 355, 356–359, 360–372, 379, 412
  BFGS method, 366–367
  conjugate gradient method, 362–365, 403, 444
  L-BFGS method, 368–370, 424, 433, 440, 445, 446
  mini-batch, 444, 446, 447
  Quasi-Newton methods, 365–371, 444, 446
  steepest-descent method, 5, 358–359, 363, 446
  stochastic gradient, 443, 444
  subspace techniques, 371–373
difference phase, 139
diffusion, seismic energy, 277
displacement, 14–16, 18, 19, 20–21, 24, 28, 30, 32–33, 36, 37, 46, 39, 54, 56, 60, 61, 105, 114, 131, 150, 201, 244, 257, 264, 270, 381, 393
displacement field, 36, 37, 39, 46, 414
displacement–traction vector, 55, 264
distributed acoustic sensing, 68, 147, 428
downgoing waves, 23, 24, 28, 41, 43, 52, 70, 87, 92, 201, 261
downward continuation, 88
dynamic groups, 138, 139, 155, 156, 186

earthquakes, 1–6, 8, 10, 82, 135, 139–140, 142, 145, 149, 153–155, 157, 159, 161–162, 172, 175, 176–178, 179-180, 184, 190, 191–192, 195, 201–202, 204, 206, 207, 209, 210–211, 223, 230, 267, 275, 278, 279, 285, 287, 296, 297, 304, 308, 312, 314, 322, 326, 329, 330, 331, 340, 400, 421
  coda, 2, 9, 115, 129, 139, 159, 178, 179, 181–183, 184, 189, 190, 191, 192, 193, 195–197, 200, 202, 206, 207, 232, 278–279, 282
  deep, 10, 135, 159, 191, 211, 287, 296, 297, 299, 331, 332
  hazard, 2, 407
  sources, 1–2, 10, 155, 404
effective media, 9, 150, 243–254
elastic moduli, 14, 37, 39, 56, 249, 256, 260, 378, 384
elastic modulus tensor, 37, 39, 252, 378, 383
ensemble properties, 9, 143–146, 221, 234, 238, 239, 241, 243, 257
epicentral distance, 101, 105, 116, 117, 121, 130–133, 136, 183, 185, 186, 190, 196, 202, 208, 209, 211, 214, 269, 279, 281, 286–288, 301, 331, 334, 340, 395–397
equation of motion, 14, 16, 36, 39, 143, 256, 381, 438
equipartitioning, 159
equivalent forces, 264
ergodic hypothesis, 238
exploration seismology 8, 9, 63–94, 200, 216, 217
  down-hole recording, 217
  vertical seismic profiling, 68, 89

filtering, 66, 79, 83, 106, 113, 119, 122, 127, 166, 187, 209, 249, 326, 391
fluid–solid boundary, 14
focussing, 45, 79, 124, 223, 235, 270, 274, 287, 417
focussing function, 93
forward modelling, 90, 152, 260, 341, 347, 400, 410, 413, 421, 439, 436
  wavefield adapted, 436, 440
