

DEMOCRATIC NORMS OF EARTH SYSTEM GOVERNANCE

Deliberative democracy is well suited to the challenges of governing in the Anthropocene. But deliberative democratic practices are only suited to these challenges to the extent that five prerequisites – empoweredness, embeddedness, experimentality, equivocality, and equitableness – are successfully institutionalized. Governance must be created by those it addresses; applicable equally to all; capable of learning from (and adapting to) experience; rationally grounded; and internalized by those who adopt and experience it. This book analyzes these five major normative principles, pairing each with one of the Earth System Governance Project's analytical problems to provide an in-depth discussion of the minimal conditions for environmental governance that can be truly sustainable. It is ideal for scholars and graduate students in global environmental politics, earth system governance, and international environmental policy. This is one of a series of publications associated with the Earth System Governance Project. For more publications, see www.cambridge .org/earth-system-governance.

WALTER F. BABER is Professor in the Environmental Sciences and Policy Program and the Graduate Center for Public Policy and Administration at California State University, Long Beach. He is also Affiliated Professor at the Raoul Wallenberg Institute of Human Rights and Humanitarian Law in Lund, Sweden. He has published many research articles and five previous books, including four coauthored books with Robert V. Bartlett. Most recently this has included *Environmental Human Rights in Earth System Governance: Democracy Beyond Democracy* (Earth System Governance Elements series, Cambridge University Press, 2020). He has been a Lead Faculty of the international Earth System Governance research alliance since 2012, and has had Fulbright scholar appointments in Italy, Sweden, and Austria.

ROBERT V. BARTLETT is the Gund Professor of the Liberal Arts in the Political Science Department and the Environment Program at the University of Vermont, where he is also a fellow in the Gund Institute of Environment. He has published many research articles and eleven previous books, several of which have won prizes. He has been a Lead Faculty of the international Earth System Governance research alliance since 2012, and has had Fulbright scholar appointments in New Zealand, Ireland, Italy, and Austria.

Acknowledgments

This volume, our fifth book-length collaboration, has been gestating since 2014. We thank the three anonymous reviewers who provided feedback to us on behalf of Cambridge University Press. Most of the chapters have been presented at conferences and workshops on two continents, and we thank the many participants and discussants who contributed to improving our thinking and writing with their comments on those early drafts and our presentations. An early version of part of Chapter 1 was previously published as "Deliberative Democracy and the Environment" in The Oxford Handbook of Deliberative Democracy, edited by André Bächtiger, John S. Dryzek, Jane Mansbridge, and Mark E. Warren, Oxford University Press, 2018, pp. 755-767. We particularly thank John Dryzek and André Bächtiger for comments that improved that earlier work. An early version of part of Chapter 2 was previously published as "Consensual Environmental Policy in the Anthropocene: Governing What Humanity Hath Wrought" in *Public Policy*, Governance and Polarization: Making Governance Work, edited by David K. Jesuit and Russell Alan Williams, Routledge, 2018, pp. 87-105. An early version of Chapter 6 was previously published as "Democratic Accountability in the Anthopocene: Toward a Non-Legislative Model" in Environmental Governance in the Anthropocene: Institutions and Legitimacy in a Complex World, edited by Philipp Pattberg and Fariborz Zelli, Routledge, 2015, pp. 167-183. We thank Philipp Pattberg for valuable suggestions on that work.

Our research and writing has been consistently sustained by our home institutions. Bartlett's work is supported by the Gund Chair of the Liberal Arts at the University of Vermont.

Baber particularly thanks the Austrian-American Educational Commission (Fulbright Austria) and the Diplomatic Academy of Vienna for the 2016 Fulbright-Diplomatic Academy Visiting Professorship of International Studies, and the Swedish Fulbright Commission and the Raoul Wallenberg Institute for Human Rights and Humanitarian Law for the 2017/18 Fulbright Lund Chair of Public

International Law. He also thanks the US Commission for the International Exchange of Scholars for both of these appointments that provided support and conducive circumstances to make his work on this project possible.

Bartlett thanks the US Commission for the International Exchange of Scholars, the Austrian-American Educational Commission (FulbrightAustria), and the Diplomatic Academy of Vienna for the time, quiet space, and stimulating environment that made possible the completion of a draft of this manuscript during an appointment as 2019 Fulbright-Diplomatic Academy Visiting Professor of International Studies.

At Cambridge University Press, we are grateful for the professionalism and good humor of Emma Kiddle and Sarah Lambert, and for the always-valuable advice and support of Frank Biermann, series editor of the Earth System Governance series.
