Cities in a Sunburnt Country

As Australian cities face uncertain water futures, what insights can the history of Aboriginal and settler relationships with water yield? Residents have come to expect reliable, safe, and cheap water, but natural limits and the costs of maintaining and expanding water networks are at odds with forms and cultures of urban water use. *Cities in a Sunburnt Country* is the first comparative study of the provision, use, and social impact of water and water infrastructure in Australia’s five largest cities. Drawing on environmental, urban, and economic history, this co-authored book challenges widely held assumptions, both in Australia and around the world, about water management, consumption, and sustainability. From the ‘living water’ of Aboriginal cultures to the rise of networked water infrastructure, the book invites us to take a long view of how water has shaped our cities and how urban water systems and cultures might weather a warming world.

Margaret Cook is an history lecturer at the University of the Sunshine Coast, author of *A River with a City Problem: A History of Brisbane Floods* (2019) and co-editor (with Scott McKinnon) of *Disasters in Australia and New Zealand* (2020). She was the recipient of the John and Ruth Kerr Medal of Distinction in History (2020).

Andrea Gaynor is Professor of History and Australian Research Council Future Fellow at The University of Western Australia. An environmental historian, she seeks to use the contextualising and narrative power of history to support transitions to more just and sustainable societies.

Jenny Gregory, AM FRHS, is Emeritus Professor of History at The University of Western Australia. Her research focuses on urban history, primarily town planning and heritage. Her books include *City of Light: A History of Perth since the 1950s* (2003) and, as editor-in-chief, the *Historical Encyclopedia of Western Australia* (2009).
Ruth A. Morgan is an environmental historian at The Australian National University, whose prize-winning work on the histories of water and climate has been generously funded by the Australian Research Council and the Alexander von Humboldt Foundation. She is a lead author in Working Group II of the Intergovernmental Panel on Climate Change’s Sixth Assessment Report.

Martin Shanahan is Professor of Economic and Business History at The University of South Australia and Elof Hansson Visiting Professor in International Business and Trade at Gothenburg University, Sweden. A recipient of the Butlin Prize in Economic History, he has also written on wealth and income distribution, international cartels, and water markets.

Peter Spearritt is Emeritus Professor in History at The University of Queensland and Fellow of the Academy of Social Sciences in Australia. His books include Sydney’s Century (2000), Where History Happened: The Hidden Past of Australia’s Towns and Places (2018), and, as co-author, The Twentieth-Century Historic Thematic Framework (2021).

8.3 Salisbury recycled water, Adelaide. 224
Maps

1.1–1.5 Maps of Sydney, Brisbane, Perth, Melbourne, and Adelaide.*

1.1 Sydney.  
1.2 Brisbane.  
1.3 Perth.  
1.4 Melbourne.  
1.5 Adelaide.  
2.1 Derbarl Yerrigan/Swan River and some of the wetlands remaining to the present day.  
7.1 Sydney Ocean Outfalls map.

* These maps have been crafted critically by Daniel Jan Martin, drawn together at the same scale and with the same information, to facilitate a rare cartographic comparison between Australian cities, their water, and their landscape structures.
Tables

1.1 Population of the five cities (thousands), 1851–2021. page 9
4.1 Major water storages completed, or construction commenced, 1921–47. 86
4.2 City populations (thousands), 1901–47 (1); percentage change per annum over census period (2); ratio of percentage increase in housing stock to percentage increase in population over census period (3). 89
Acknowledgements

Research for this book was supported by the Australian Research Council’s Discovery Projects scheme (DP180100807).

We are grateful to Daniel Jan Martin for creating the maps and for conversations about wetlands, Indigenous water, and numerous other topics of relevance to urban water history. Our sincere thanks to Susan Avey, Nathan Etherington, Elizabeth Gralton, Adam Long, and Dmytro Ostapenko for their invaluable research assistance. Thanks also to Isa Lacuna for preparing the index and to Nick Cook for formatting assistance.

Earlier versions were presented at the International Water History Conference in Delft 2015, World Economic History Congress in Boston 2018, Asia-Pacific Business and Economic History Conference in Canberra 2019, and Australian Historical Association Conference in Toowoomba 2019. We thank participants for their feedback. We are grateful to the Rachel Carson Center for Environment and Society for hosting a virtual exhibition of our work, ‘Drought, Mud, Filth, and Flood: Water Crises in Australian Cities, 1880s–2010s’ (www.environmentandsociety.org/exhibitions/drought-mud-filth-and-flood), on which this book builds. We also thank the Cooperative Research Centre for Water Sensitive Cities for supporting an earlier project, led by Associate Professor Seamus O’Hanlon, which laid the groundwork for the research on which this book is based.

For advice on sources, feedback, and support, we are grateful to Matthew Barton, Frank Bongiorno, Luc Borrowman, Julie Collins, Lauretta Davies, Graeme Davison, John Doody, Charles Fahey, Jennifer Frost, Warwick Frost, Christine Garnaut, Vyonne Geneve, David

Thanks to Rachel Bleifeder and Lucy Rhymer, and to Emily Sharp, John R. McNeill, and Ling Zhang, general editors of the Studies in Environment and History series, and the Press Syndicate of Cambridge University Press.

Margaret Cook: I have thoroughly enjoyed collaborating on this project with such skilled, knowledgeable, and generous historians. Thanks to the team for their camaraderie, to Lionel Frost for his patient project management, and to Andrea Gaynor for her unwavering leadership. My love to Nick, Andrew, and Cameron for their constant support and encouragement.

Lionel Frost: Thanks to my co-authors for their wisdom and generosity. I would like to acknowledge my debt to three mentors, now deceased, who guided my early steps as an urban historian: John McCarty, Donald J. Olsen, and Tony Sutcliffe. Thanks to Mark and Jacinta, Aaliyah, Robert, Monica and Adam, Anaka, and Hank for your love, and always having my back. Thanks and love to Maree.

Andrea Gaynor: Sincere thanks to all co-authors and research assistants on this project for their patience, good humour, and insights as we journeyed together in a turbulent time towards a complete manuscript. In particular I would like to thank Lionel Frost for his project coordination and Margaret Cook for her work on the referencing and images, in addition to her formidable intellectual input. Many thanks also to Jamie, Otto, Griff, and Emily for their support and encouragement throughout the book project.

Jenny Gregory: Thanks to a dream team for their insights, collegiality, and friendship. Sincere thanks to Andrea Gaynor and Lionel Frost for their leadership, and to Ross always for his knowledge, encouragement, and tolerance.

Ruth A. Morgan: It was an honour to work with such an incredible team of historians to bring together this manuscript under challenging conditions.

circumstances. I am especially indebted to Lionel Frost, Margaret Cook, and Andrea Gaynor for their coordination and guidance over the course of the project. With thanks and love to Tash for her patience, support, and encouragement.

Martin Shanahan: I would like to acknowledge my colleagues on this project who have taught me a great deal while also having fun. I would also like to thank the loving support of my family and especially my father, Ross, who set me off on this path of adventure.

Peter Spearritt: Four deceased mentors encouraged me to take cities as a worthy topic of study: John Iremonger, Heather Radi, Tom Stannage, and Patrick Troy. Anne Gilmore accompanied me on field trips to Warragamba Dam, the Nepean floodplain, the Hinze Dam, and the Tugun Desalination Plant.
