

CONTENTS

Preface ix

1. Introduction 1

 References 12

2. Individual and Social Orderings 17

 2.1 Introduction 17

 2.2 Relations 17

 2.3 Preference Relations and Choice Sets 19

 2.4 Social Orderings, Quasi-orderings, and Weak
 Quasi-orderings 22

 2.5 Exercises 27

 2.6 Bibliographical Notes 28

 References 28

3. May’s Theorem 29

 3.1 Introduction 29

 3.2 The Framework 30

 3.3 May’s Theorem 32

 3.4 Robustness of the Axioms 35

 3.5 Exercises 37

 3.6 Bibliographical Notes 38

 References 38

4. Arrow’s Theorem with Individual Preferences 39

 4.1 Introduction 39

 4.2 The Framework 40

 4.3 The Arrow Impossibility Theorem 41

 4.4 Two Proofs of Arrow’s Theorem 45

 4.5 Exercises 53

4.6	Bibliographical Notes	54
	References	54
5.	Relaxing Arrow’s Axioms	57
5.1	Introduction	57
5.2	Relaxing Weak Pareto	58
5.3	Relaxing Transitivity of (Social) Binary Relations	62
5.4	Domain Restriction: Single-Peaked Preferences	70
5.5	Exercises	73
5.6	Bibliographical Notes	74
	References	74
6.	Arrow’s Theorem with Utilities	77
6.1	Introduction	77
6.2	The Framework and Assumptions	78
6.3	Measurability and Comparability	81
6.4	Arrow’s Theorem	85
6.5	Positional Dictatorships	89
6.6	Leximin	93
6.7	Utilitarianism	95
6.8	Exercises	97
6.9	Bibliographical Notes	98
	References	99
7.	Harsanyi’s Social Aggregation Theorem	101
7.1	Introduction	101
7.2	The model	102
7.3	Appendix	116
7.4	Illustrative Examples	116
7.5	Exercises	118
7.6	Bibliographical Notes and Discussions	119
	References	122
8.	Distributional Ethics: Single Dimensional Approaches	127
8.1	Introduction	127
8.2	Basics and Preliminaries	128
8.3	Common Features	133
8.4	The Direct Approach	137
8.5	The Inclusive Measure of Well-Being Approach	140

8.6	Direct Descriptive Inequality Indices and Reduced Form Welfare Functions	143
8.7	Measuring Inequality within the Harsanyi Framework	146
8.8	Comparability between Achievement and Shortfall Inequality: An Expository Analysis	149
8.9	Equality of Opportunity: An Illustrative Discussion	154
8.10	Inequality and Welfare with an Ordinal Dimension of Well-Being	159
8.11	Inequality as an Ordinal Notion	163
8.12	Fairness in Network Resource Allocation: An Analytical Exposition	165
8.13	Exercises	169
8.14	Bibliographical Notes	171
	References	172
9.	Distributional Ethics: Multidimensional Approaches	183
9.1	Motivations	183
9.2	Basics and Preliminaries	185
9.3	Common Features	194
9.4	The Direct Approach	197
9.5	The Inclusive Measure of Well-Being Approach	200
9.6	Direct Descriptive Multidimensional Inequality Indices and Reduced Form Welfare Functions	205
9.7	Inequality under Uncertainty: A Brief Discussion	207
9.8	Exercises	209
9.9	Bibliographical Notes	210
	References	211
10.	Social Choice Functions	219
10.1	Introduction	219
10.2	The Framework and the Gibbard–Satterthwaite Theorem	220
10.3	Two Proofs of the Gibbard–Satterthwaite Theorem	223
10.4	Single-Peaked Preferences	232
10.5	Exercises	236
10.6	Bibliographical Notes	237
	References	238

viii	<i>Contents</i>
11.	Strategyproofness on Quasi-linear Domains 241
11.1	Introduction 241
11.2	The Pure Public Goods Problem 242
11.3	Allocation of a Single Indivisible Object 253
11.4	Relaxing Outcome Efficiency: Affine Maximizers 254
11.5	Exercises 257
11.6	Bibliographical Notes 258
	References 259
<i>Index</i>	261
