

Index

- Alice and Bob notation, 203
- amendment, 205
- assignment, 102
- asynchronous communication, 74, 191
- asynchronous message, 191
- atomic network, 57
- axiom, 15
- barrier, 187
- behavioural contracts, 203
- branching order, 158
- branching term, 124
- choreographic choice, 184
- choreographic language, 2
 - graphical, 209
 - textual, 209
 - visual, 209
- choreographic programming, 92, 201
- choreographic programming language, 92, 201
- choreographic round-trip engineering, 6, 207
- choreographic store, 98
- choreographies, 2
- choreography
 - desugaring of a, 179
 - expansion of a, 179
 - ill-formed, 163
 - projectable, 118
 - realisable, 205
 - tail-recursive, 174
 - unprojectable, 118
 - well-formed, 138, 163
 - well-formed in the context of, 163
- choreography compliance, 3
- coherence, 209
- communication, 40, 95
- communication error, 74, 172
- communication safety, 71, 74, 172
- concurrency, 1
- condition, 107
 - distributed, 182
- conditional, 106
 - branches of a, 107
 - distributed, 182
 - else branch of a, 107
 - guard of a, 107
 - then-branch of a, 107
- conditional (in choreographies), 106
- conditional (processes), 113
- configuration
 - choreographic, 100
 - network, 103
 - well-formed, 163
- conformance, 3
- conservative extension, 178
- continuation, 40
- deadlock-freedom, 75, 173
 - by construction, 204
 - by design, 203
- deduction, 17
- derivation, 18–23
 - assumption of a, 18
 - definition of, 22
 - end of a, 20
 - height of a, 20
 - hypothesis of a, 18
 - premise of a, 18
 - size of a, 20
- derivative, 46
- destructuring, 181
- distribution, 1
- emergent behaviour, 4
- endpoint projection (EPP), 76, 78
- ends, 20
- execution, 46
- expression, 95
 - evaluation, 99
- extensional equality, 59
- external choice, 124
- extraction, 207
- finite support, 57
- function, 96
 - arguments, 96
 - call, 96
 - deterministic, 111
 - nondeterministic, 111
- global types, 202
- ill-formed, 163
- induction
 - mathematical, 29

- strong, 27
- structural, 27
- inference rule, 15
 - admissible, 33, 35
 - application of an, 18
 - conclusion of an, 15
 - derivable, 33
 - name of an, 15
 - premise of an, 15
- inference systems, 15
- instruction, 95
- interaction, 40
- internal action, 100
- internal choice, 124
- join operator, 157
- knowledge of choice, 106, 115, 116
- labelled transition system (lts), 41
 - generated, 49
 - graphical representation of a, 50
- liveness, 5, 75
 - by construction, 204
 - by design, 204
- local assignment, 95
- local function, 96
- local type, 202
- location, 59
- merging, 127
- message queue, 191
- messaging state, 192
- microservices, 3, 180
- modularity, 207
- monoid, 110
- μ -derivative, 46
- multi-step derivative, 47
- multi-step transition relation, 47
- multiparty language, 212
- multiparty session types, 92, 201
- multitier language, 212
- name substitution, 139
- network, 56
 - restriction of a, 69
 - support of a, 57
- nondeterminism, 111
- nondeterministic, 111
- Nondeterministic Recursive Processes, 188
- operational semantics, 40
- out-of-order execution, 43
- parallel composition, 58
- parallelism, 71
- partial commutative monoid, 60
- partial order, 158
- partial semilattice, 157
- place, 59, 212
- procedure, 134
 - argument of a, 134
 - call, 134
 - definition, 134
 - formal parameter of a, 134
- process, 39
- process names, 39
- process projection, 77
- process store, 98
- proof search, 20
- proposition, 15
 - derivable, 19
 - provable, 19
 - underivable, 30
- protocol, 1
- protocol narrations, 203
- realisability, 205
- receive action, 56, 102
- remote procedure call, 180
- Request-Reply, 180
- Request-Response, 180
- ring protocol, 40
- role, 212
- running process, 57
- runtime term, 141, 191
- scatter protocol, 40
- schematic variables, 17
- security protocol notation, 203
- selection, 121
- selection action, 124
- selection label, 121
- selections, 121
- semantics, 6
- send action, 56, 102
- sequential composition operator, 108
- session fidelity, 202
- set of procedure definitions, 134
 - projectable, 152
 - well-formed, 163
- short-circuit evaluation, 182
- side conditions, 43
- single sign-on, 122
- starvation, 74
- starvation-freedom, 71, 75, 174
 - by construction, 204
 - by design, 204
- state explosion problem, 4
- subderivation, 23
 - immediate, 25
 - strict, 23
- synchronous communication, 73, 191
- syntactic sugar, 178
- syntax, 39
- tail-recursive, 174
- target, 172
- terminated choreography, 40
- terminated network, 57
- terminated process, 56
- termination, 89

trace, 46

transition labels, 41

transition relation, 41

transition rules, 41

underivable, 30

value, 95

variable, 95

well-formedness, 138
