 amphibians, 18, 29, 134  
 androgen receptor, 87  
 aneuploids, 174–6  
 angelfish, 163  
 anomalies  
   albinos, 27, 31, 165–6  
   Bateson's catalogue of, xiii  
   bushy mustaches, 86, 89  
   conjoined triplets, 23  
   conjoined twins, xv, 17–21, 23–6, 31, 56  
   crossed eyes, xix, 165  
   cyclopia, iv  
   double dewclaws, 133–6  
   double hands, 34  
   double muscles, xviii, 125–9  
   double thumbs, 134  
   extra tibia and fibula, 75  
   extra-legged beetles, 34  
   extra-legged flies, 40–9  
   extra-legged frogs, 29–30  
   eyes inside mouth, xv, 3–5  
   feathered feet, 120  
   fewer vertebrae (frogs), 78  
   four-winged flies, 65–6  
   giants, 134, 137–8  
   girl with half a brain, 28, 110  
   hairlessness, xvi, 85–93  
   homeosis, xiii–xv, 35, 66–73  
   hypertrichosis, 85–93  
   interdigital webbing, 78  
   missing fingerprints, 116  
   missing optic chiasm, 27, 165  
   non-genetic, xiii  
   polydactyly, xviii, 78, 133–6, 139–46  
   quadruple muscles, 127  
   sesamoid digits, 75  
   Shar-Pei syndrome, xvii, 107–9, 112  
   Siamese cat pigmentation, xix, 165–6  
   *situs inversus*, xv, 18–23, 56  
   spotted zebras, 155, 160  
   striped cheetahs, 152  
   syndactyly, 78, 135  
   three-eared frogs, 27  
   three-eyed frogs, 26–8  
   two-headed animals, 17–21  
   two-headed tadpoles, 23–6  
   upside-down joints, xvii, 53–7  
   walking on water, 85  
   webbed toes, 120  
 Antennapedia Complex, 73, 84  
 antibodies, 174  
 apes, xvi, 84, 90–4, 122  
 aphids, 169  
 apoptosis, 45–8, 77, 113  
 Appaloosa, 161  
 archenteron, 24  
 arctic fox, 168  
 Aristotle, 93  
 arms versus legs, 66  
 arthropods, 23, 53
