### TRANSHUMANISM

Transhumanists argue that science and technology will enable us to overcome our biological limitations, both mental and physical, and create a radically enhanced posthuman species and society. In this book, Jenny Huberman examines the values and visions animating the Transhumanist Movement in the United States today, whilst at the same time using the study of transhumanism as a way to introduce a new generation of students to the discipline of cultural anthropology. She explores transhumanist conceptions of revitalization, immortality, the good life, the self, the body, kinship, and economy, and compares them to the belief systems of human beings living in other times and places. Providing lively ethnographic insights into a fascinating contemporary sociocultural movement, this book will be invaluable to students and researchers in anthropology, as well as anyone interested in the phenomenon of transhumanism.

JENNY HUBERMAN is Associate Professor of Anthropology at the University of Missouri–Kansas City.

#### NEW DEPARTURES IN ANTHROPOLOGY

New Departures in Anthropology is a book series that focuses on emerging themes in social and cultural anthropology. With original perspectives and syntheses, authors introduce new areas of inquiry in anthropology, explore developments that cross disciplinary boundaries, and weigh in on current debates. Every book illustrates theoretical issues with ethnographic material drawn from current research or classic studies, as well as from literature, memoirs, and other genres of reportage. The aim of the series is to produce books that are accessible enough to be used by college students and instructors, but will also stimulate, provoke, and inform anthropologists at all stages of their careers. Written clearly and concisely, books in the series are designed equally for advanced students and a broader range of readers, inside and outside academic anthropology, who want to be brought up to date on the most exciting developments in the discipline.

4.3.2	Species Freedom	110
4.3.3	Ecotogenesis and Posthuman Social Reproduction	112
4.3.4	Freeing the Brain and Becoming Remarkable	114
4.3.5	Body Augmentation: Freedom and “Fixes”	120
4.4	Conclusion: The Sovereign Skin, Morphological Freedom, and Technonormativity	123
<b>5</b>	<b>Decoding the Self</b>	<b>127</b>
5.1	The Ojibwa Self and Its Behavioral Environment	129
5.2	The Transhumanist Self and Its Behavioral Environment	134
5.2.1	Personhood Is in the Mind	134
5.2.2	The Embodied and Quantified Self	136

## Contents

5.2.3	Extending Personhood in the Posthuman World	140
5.2.4	The Power of Intelligence	143
5.2.5	Benevolence or Malevolence?	149
5.3	Conclusion: Selves and Similarities	152
<b>6</b>	<b>Rethinking Kinship Systems</b>	<b>155</b>
6.1	American Kinship in the Twentieth Century	156
6.2	Kinship in the Posthuman Future	160
6.2.1	From the Biological to the Vitological: Making Digital Kin	160
6.2.2	Caring Companions: Robotic Kin	165
6.2.3	The New Biology of Kinship: Designer Babies and Selective Reproduction	167
6.2.4	The Post-kinship Society	173
6.2.5	Life without Fathers, Mothers, Husbands, or Wives: Family in the Postgender Society	175
6.3	Conclusion: Critiquing Kinship	179
<b>7</b>	<b>From Original Affluence to Posthuman Abundance</b>	<b>182</b>
7.1	Affluence without Abundance	183
7.2	The Society of Radical Abundance: Nanotechnology and Postindustrial Production	187
7.3	The Bold Path to Abundance	193
7.3.1	The Future Is Better than You Think: Overcoming Cognitive Biases and Linear Thinking	195
7.3.2	The Forces for Abundance	199
7.3.2.1	The DIY Innovator and the Social Entrepreneur	199
7.3.2.2	The Technophilanthropists	202
7.3.2.3	The Rising Billion	204
7.4	Democratic Transhumanism and Ensuring Access to the Means of Subsistence	206
7.4.1	The Forces for Equality	209
7.4.1.1	The Promise of Technology	209
7.4.1.2	The Power of Democratic Governance	210

## Contents

7.4.2	Ensuring a Means of Subsistence: From the Zen Road to Affluence to the Cyborg Road	212
7.5	Conclusion: Radical Abundance or Pervasive Inequality?	214
	<b>Conclusion: Back to the Future: Reflections on a Discipline and a Movement</b>	<b>217</b>
	The Comparative Study of Humankind	218
	The Value of Ancestors	222
	The Transhumanist Movement	224
	The Power of Technology, Technologists, and the Technological Imagination	231
	<i>Notes</i>	236
	<i>Bibliography</i>	257
	<i>Index</i>	281

## Acknowledgments

I love teaching anthropology. The students at University of Missouri–Kansas City (UMKC) continually inspire me with their thoughtfulness and passion. Watching them learn to view the world through an anthropological lens is incredibly rewarding and it is a lot of fun! Thank you, students, for making my job such a joy. In the course of writing this book, you have been my most important interlocutors and I feel so privileged to share the classroom with you. Always remember that the “grist” for the anthropological “mill” is only as limited as your imagination is, so think big, and trust your curiosity and instincts to lead you toward unexpected inquiries and exciting discoveries.

At UMKC I’ve also had the good fortune to have Michelle Smirnova as both a colleague and a friend. Michelle has been an unwavering source of intellectual support and inspiration. She was instrumental in co-writing a grant with me that enabled us to attend the BDYHAX conventions in Austin, Texas, in 2018 and 2019, and interview over forty people associated with the DIY transhumanist and body/biohacking communities. Most importantly, Michelle makes coming to work a delight. Deborah Smith, the former chair of our department, helped me get the semester off to finish this manuscript. I appreciate the numerous efforts she has made to help me pursue my research. Although hailing from a different department and discipline, Clara Irazábal-Zurita constantly encouraged

## Acknowledgments

me by sending articles my way when she felt they were of relevance to my topic. She exemplifies what it means to be a collegial academic.

I would like to thank Andrew Winnard and Isabel Collins, at Cambridge University Press, for steering the manuscript through the production process. It has been a pleasure to work with them. The anonymous reviewers who read my manuscript offered feedback that was both constructive and hilarious and I am grateful for the consideration they gave my work.

Though he may take issue with some of the ideas presented in this book, James Hughes was incredibly generous with his support and assistance. He replied to all of my pesky emails and questions about the transhumanist community in the United States. His feedback was helpful and insightful.

Most of all, I want to thank my friends and family. You enrich my life on a daily basis. Your love, intelligence, humor, and companionship constantly remind me that being human is an extraordinary experience. Lastly, a special shout-out must go to Jim and Cheryl Watters for making us feel that we are never without family in Kansas City; Jeff Bennett, the world's best husband; Christopher Bennett, the amazing kid (and now amazing man) who I smothered with "leisure suits" as a young boy; and to my sons, Jonah and Sammy, who bring balance and beauty to my existence. Jonah and Sammy, I hope one day you are able to look back on this period of your life – and who knows, maybe even read this book – and decide that there could have been worse things to endure than "having anthropologists as parents." Right now, I know it seems "unbearable," but just remember, I love you always and forever.
