

NON-CANONICAL ENGLISH SYNTAX

The term *non-canonical syntax* generally refers to deviations from ‘typical’ word order. These represent a fascinating phenomenon in natural language use. With contributions from a team of renowned scholars, this book presents a range of case studies on non-canonical syntax across historical, register-based, and non-native varieties of English. Each chapter investigates a different non-canonical construction and assesses to what extent it can be called ‘non-canonical’ in a theory-based and frequency-based understanding of non-canonical syntax. A range of state-of-the-art methodologies are used, highlighting that an empirical approach to non-canonical syntactic constructions is particularly fruitful. An introduction, a synopsis, a terminological chapter, and three section introductions frame the case studies and present overviews of the theory behind non-canonical syntax and previous work, while also illustrating open questions and opportunities for future research. The volume is essential reading for advanced students of English grammar and researchers working on non-canonical syntax and syntactic variation. This title is also available as Open Access on Cambridge Core.

SVEN LEUCKERT is a research associate and post-doc at Technische Universität Dresden, Germany. His publications include *Topicalization in Asian Englishes* (2019) and *Indian Englishes in the Twenty-First Century* (with Lange, Bernaisch, and Yurchenko, 2023).

TERESA PHAM is a research associate and post-doc at the University of Vechta, Germany. Her notable publications include *Intertextual References to Shakespeare* (2014). With Sven Leuckert, she led the scientific network *Syntax Beyond the Canon* funded by the German Research Foundation.

STUDIES IN ENGLISH LANGUAGE

General Editor

Merja Kytö (Uppsala University)

Editorial Board

Bas Aarts (University College London),

John Algeo (University of Georgia),

Susan Fitzmaurice (University of Sheffield),

Christian Mair (University of Freiburg),

Charles F. Meyer (University of Massachusetts)

The aim of this series is to provide a framework for original studies of English, both present-day and past. All books are based securely on empirical research, and represent theoretical and descriptive contributions to our knowledge of national and international varieties of English, both written and spoken. The series covers a broad range of topics and approaches, including syntax, phonology, grammar, vocabulary, discourse, pragmatics and sociolinguistics, and is aimed at an international readership.

Already published in this series:

Haruko Momma: *From Philology to English Studies: Language and Culture in the Nineteenth Century*

Raymond Hickey (ed.): *Standards of English: Codified Varieties Around the World*

Benedikt Szmrecsanyi: *Grammatical Variation in British English Dialects: A Study in Corpus-Based Dialectometry*

Daniel Schreier and Marianne Hundt (eds.): *English as a Contact Language*

4.7	Subject positions and clause-initial elements in <i>PPCMBE</i>	83
4.8	Subject positions and subject length in <i>PPCMBE</i>	84
5.1	Frequency of all existential <i>there</i> -constructions in the <i>OBC</i> (absolute and per million words/pmw), divided by five 40-year periods	94
5.2	Frequency of contracted <i>there’s</i> in existential <i>there</i> -constructions in the <i>OBC</i> (absolute and per million words/pmw), divided by five 40-year periods	94
5.3	Singular <i>BE</i> with plural notional subjects in the <i>CEECE</i> , relative frequencies	98

<i>List of Tables</i>	xiii
5.4 Singular <i>BE</i> with plural notional subjects in two <i>OBC</i> periods matching Nevalainen's (2009) periodisation, absolute and relative frequencies	99
5.5 Singular <i>BE</i> with plural notional subjects, breakdown of <i>OBC</i> periods, absolute and relative frequencies	99
5.6 Existential constructions with plural notional subjects in the two <i>OBC</i> subperiods; frequencies: absolute, pmw, relative (where applicable)	100
5.7 Agreement patterns in existential <i>there</i> -constructions containing <i>number</i> (<i>there * a number of...</i> , N = 341; absolute and relative frequencies)	104
5.8 Agreement patterns in existential <i>there</i> -constructions containing <i>many</i> (<i>there * many...</i> , N = 494; absolute and relative frequencies)	105
5.9 Agreement patterns in existential <i>there</i> -constructions containing <i>dozen</i> (<i>there ** dozen...</i> , N = 92; absolute and relative frequencies)	105
5.10 Agreement patterns in existential <i>there</i> -constructions with coordinated notional subjects (<i>there * NN and NN</i> , N = 706, 682 tokens with date; absolute and relative frequencies)	106
6.1 The most prolific users of the demonstrative ProTag construction in the <i>Chadwyck–Healey English Drama Collection</i>	118
6.2 The ten most common evaluative expressions that co-occur with demonstrative ProTags in the <i>Chadwyck–Healey English Drama Collection</i>	126
8.1 Summary of the 2018 TVNB Corpus	167
9.1 Summary of cleft types	184
9.2 Composition of the EVLA-Corpus and word count	191
9.3 Cleft-related variables and levels used in data annotation	192
9.4 Evaluation-related variables and levels used in data annotation	193
10.1 Points of measurement in self-paced reading experiment	217
10.2 Mean reaction times in milliseconds and standard deviations (SD)	219
10.3 Mean ratings and standard deviations (SD) across conditions in Experiment 2	227
10.4 Fixed effect structure of final model for PREPRTSC (spillover region)	231

xiv	<i>List of Tables</i>	
10.5	Fixed effect structure of final model for NOUNRTLOGSc (wrap-up region)	231
10.6	Fixed effect structure of final model for SENTENCERTLOGSc (whole sentence)	232
10.7	Fixed effect structure of final model for Experiment 2	232
12.1	Realisations of the intro- <i>it</i> across the basic clause patterns of the English language	255
12.2	The individual subcorpora of the <i>SAVE Corpus</i>	259
12.3	Overview of analysed sentences per corpus (number of intro- <i>its</i> per thousand sentences/pts)	259
12.4	Overview of annotated variables	260
13.1	Overview of the analysed data from <i>ICLE</i> and <i>LOCNESS</i>	292
13.2	Annotation scheme used for the corpus analysis with explanations	292
14.1	Plus- and minus-terminology adapted from Rüdiger (2019: 48)	313
14.2	Dataset used in the analysis of minus-plurals and overtly marked plurals	314
14.3	Predictor variables in the statistical analysis	315
14.4	Language families and languages (including ISO 639-3 codes) in the analysed <i>ACE</i> and <i>VOICE</i> sections	316

Non-canonical syntax is omnipresent in language use. This is why it cannot be tackled by one or two researchers, but requires collaboration and exchange. Indeed, many people have helped in the creation and production of this book, and we would like to express our gratitude to all of them.

Several contributors to this volume have worked together as part of the scientific network called *Syntax Beyond the Canon: Cutting-edge Studies of Non-Canonical Syntax in English*, funded by the Deutsche Forschungsgemeinschaft (DFG, German Research Foundation, 419901034) from 2019 to 2025. We would like to thank the DFG for funding this network and for kindly agreeing to extend the funding period after several network meetings had to be cancelled due to the COVID-19 pandemic. Our collaboration as a scientific network has not only resulted in this edited collection but has led to many new (academic) friendships and projects.

We are furthermore much obliged to Betty Birner, Marianne Hundt, Stefan Hoffmann, Stefan Th. Gries, Devyani Sharma, Douglas Biber, David Willis, and Peter Uhrig, who were present at different network meetings to discuss non-canonical syntax and how to explore it with us. They have given valuable input to our discussions in their guest lectures, provided very helpful feedback on individual research projects, and contributed immensely to our theoretical discussions on non-canonical syntax. Some of these international guests have also contributed to this volume, and it is them we would like to thank in particular, not least for endorsing our understanding of syntactic non-canonicity in this volume.

A big ‘thank you’ also goes to all the external reviewers who agreed to review one of the contributions to this volume – by doing so, they helped improve the quality of the volume. We would also like to thank Claudia Lange and Tanja Rütten, whose workshop on ‘Non-Canonical Grammar?!’ at the Anglistiktag 2016 in Hamburg eventually led to the creation of the DFG network and this volume.

We also sincerely thank the general editor of the series *Studies in English Language*, Merja Kytö, for her enthusiasm for this volume as well as her help and advice. We are also much obliged to everyone involved in the production process, particularly Helen Barton and Izzie Collins, who were extremely helpful throughout the book's production process and always remained patient with us.

Last but not least, we are thankful to all network members for making each and every network meeting not only productive and stimulating but also fun and unforgettable, and for being such a cool team!
