

Index

- Abrikosov
 - β , 171–174
 - approximation (approach, method), 160, 161, 179–180, 199, 223–224
 - flux lines, 98
 - lattice (flux), 110, 206, 244, 276, 330, 333
 - parameter (κ), 112, 135, 319
 - vortex (fluxon), 122, 132, 174, 193, 200, 213, 217, 254, 280
- antiferromagnet, 11, 12
 - XY (easy plane), 12
 - Boundary, 57, 73, 87, 88, 119, 131, 220
 - condition, 52, 54–58, 78, 79, 85, 91, 93, 106, 113–115, 123, 124
 - periodic, 282
 - topology, 90
- coherence
 - quantum, 17
 - length, 33, 71, 75, 104, 107, 109, 113, 119, 123, 128, 132, 142, 160, 193, 215, 232, 242, 274, 292, 327
 - of order parameter, 304
- correlation (function, correlator), 281, 292, 302–304, 314, 317, 321
 - energy, 280
 - length, 309, 314
 - phase, 247
 - spin, 6
 - volume, 275, 293
- critical temperature, 13, 40, 48, 49, 213, 214, 217, 289, 304, 306–310, 313, 314, 317
- critical magnetic field,
 - lower, 140, 141, 150, 158
 - thermodynamic, 118, 137
 - upper (second), 34, 112, 160, 161, 174, 255, 326
- domain wall, 21, 22, 53, 56, 67, 68, 71–73, 75, 77, 78, 87, 124, 242, 271, 273, 279, 281, 286
- dynamics, 16, 18, 219, 231, 247
 - type A, 232–235, 243, 252
 - type B, 240
 - dissipative, 33, 237, 254
 - nondissipative (time-reversal invariant), 185, 237, 238, 242
- elasticity, 22, 223
 - moduli (tensor), 204, 222, 223
 - general theory, 19, 220, 221, 224
 - vortex lattice, 219, 320, 321
- electrodynamics, 105, 115, 218, 324
- entropy, 41, 45, 174, 291, 296, 297, 333
- excitation, 14–17, 55, 131,
 - elastic (acoustic phonon), 199, 201, 220, 221
 - harmonic, 14, 74, 196, 302, 326
 - spectrum (modes, branches), 186, 187, 208, 209, 237, 295, 297, 330
 - thermal, 27, 29
 - topological, 22, 85, 214
 - vector (gauge), 193
- ferroelectric, 11, 21
- ferromagnet, 2, 4, 21, 50
 - domain, 8, 19
 - Ising (easy axis), 53, 67, 108
 - Heisenberg, 13, 14, 23, 46, 94
 - hypercubic, 59
 - XY (easy plane), 22, 46
- Feynman diagram, 302, 304, 339
- fluctuations, 17
 - gaussian (harmonic), 186, 208, 301
 - thermal, 27, 40, 269, 271, 274, 275, 277, 279, 280, 282, 289–295, 304
 - quantum, 47
- flux (magnetic), 112,
 - line (fluxon), 98, 133, 284
 - flow, 174, 251, 254–260, 264
 - quantization, 131, 135, 149, 168

- force
 - driving (external), 214, 218, 219, 223, 243, 244, 247, 254, 257
 - elastic, 220, 221, 223
 - friction, 236, 254
 - pinning, 215–217, 219, 223, 272, 275
 - repulsive, 104, 199
- free energy, 13, 41, 293, 295, 297, 316, 320
 - Gibbs, 117, 118, 324
 - Ginzburg–Landau, 171, 182, 190
 - Landau, 14, 42, 43, 44, 48, 49, 53, 59, 185, 187, 291
 - soliton, 92, 215
 - vortex, 138, 163, 198, 208, 214
 - vortex matter, 328–333
- functional, 49, 76
 - derivative, 53, 54, 114, 187, 188, 190, 192, 225, 233
 - integral, 281, 282, 291, 294, 301, 312, 314, 325
- Green function, 136, 193, 305, 314
- Ginzburg number (G_i), 275, 277, 289, 308, 323, 327
- Ginzburg–Landau (GL) equations
 - time independent, 115, 116, 123, 128, 134, 162, 163, 188
 - time dependent (TD), 233, 250, 253, 258, 262, 265
- gauge
 - field, 58, 109, 117, 190
 - invariance, 51, 115, 130, 170, 250
