<i>Preface for the Second Edition</i>	<i>page</i> xiii
<i>List of Notation</i>	xviii
<b>1 Vector Spaces</b>	<b>1</b>
1.1 What Is a Vector Space?	1
1.2 Examples of Vector Spaces	3
1.3 Subspaces	5
1.4 Linear Combinations, Lists, and Span	7
1.5 Intersections, Sums, and Direct Sums of Subspaces	11
1.6 Linear Dependence and Linear Independence	13
1.7 The Pivot Column Decomposition	18
1.8 Problems	20
1.9 Notes	24
1.10 Some Important Concepts	24
<b>2 Bases and Similarity</b>	<b>26</b>
2.1 What Is a Basis?	26
2.2 Dimension	28
2.3 Full-Rank Factorizations	31
2.4 Coordinate Vectors and Matrix Representations of Linear Transformations	33
2.5 Change of Basis	38
2.6 Similarity	40
2.7 Polynomial Bases and Lagrange Interpolation	43
2.8 Problems	49
2.9 Notes	55
2.10 Some Important Concepts	55
<b>3 Block Matrices</b>	<b>56</b>
3.1 Row and Column Partitions	56
3.2 Block Partitions and Direct Sums	61
3.3 Determinants of Block Matrices	65
3.4 Kronecker Products	68
3.5 Problems	70
3.6 Notes	73
3.7 Some Important Concepts	73
<b>4 Rank, Triangular Factorizations, and Row Equivalence</b>	<b>74</b>
4.1 The Rank-Nullity Theorem and Subspace Intersection	74

viii	Contents	
4.2	Rank	78
4.3	<i>LU</i> Factorization	80
4.4	Row Equivalence	83
4.5	Commutators and Shoda's Theorem	85
4.6	Problems	87
4.7	Notes	92
4.8	Some Important Concepts	93
<b>5</b>	<b>Inner Products and Norms</b>	<b>94</b>
5.1	The Pythagorean Theorem and the Law of Cosines	94
5.2	Angles and Lengths in the Plane	95
5.3	Inner Products	98
5.4	The Norm Derived from an Inner Product	101
5.5	Normed Vector Spaces	106
5.6	Problems	107
5.7	Notes	110
5.8	Some Important Concepts	110
<b>6</b>	<b>Orthonormal Vectors</b>	<b>111</b>
6.1	Orthonormal Sequences	111
6.2	Orthonormal Bases	113
6.3	The Gram–Schmidt Process	114
6.4	The Riesz Representation Theorem	117
6.5	Orthonormal Bases and Linear Transformations	118
6.6	Adjoint of Linear Transformations and Matrices	119
6.7	Parseval's Identity and Bessel's Inequality	122
6.8	Fourier Series	124
6.9	Orthogonal Polynomial Bases and Gaussian Quadrature	128
6.10	Problems	132
6.11	Notes	136
6.12	Some Important Concepts	136
<b>7</b>	<b>Unitary Matrices</b>	<b>137</b>
7.1	Unitary Matrices	137
7.2	Change of Orthonormal Basis and Unitary Similarity	143
7.3	Permutation Matrices	145
7.4	The <i>QR</i> Factorization	147
7.5	Upper Hessenberg Matrices	151
7.6	Problems	153
7.7	Notes	157
7.8	Some Important Concepts	157
<b>8</b>	<b>Orthogonal Complements and Orthogonal Projections</b>	<b>158</b>
8.1	Orthogonal Complements	158
8.2	The Minimum-Norm Solution of a Consistent Linear System	160
8.3	Orthogonal Projections	163

Contents	ix
8.4 Best Approximation	167
8.5 The Least-Squares Solution of an Inconsistent Linear System	171
8.6 Invariant Subspaces	174
8.7 Problems	176
8.8 Notes	179
8.9 Some Important Concepts	179
<b>9 Eigenvalues, Eigenvectors, and Geometric Multiplicity</b>	<b>180</b>
9.1 Eigenvalue-Eigenvector Pairs	180
9.2 Every Square Complex Matrix Has an Eigenvalue	184
9.3 How Many Eigenvalues Are There?	186
9.4 The Eigenvalues Are in Gershgorin Disks	190
9.5 Eigenvectors and Commuting Matrices	195
9.6 Real Similarity of Real Matrices	197
9.7 Problems	198
9.8 Notes	201
9.9 Some Important Concepts	201
<b>10 The Characteristic Polynomial and Algebraic Multiplicity</b>	<b>202</b>
10.1 The Characteristic Polynomial	202
10.2 Algebraic Multiplicity	204
10.3 Similarity and Eigenvalue Multiplicities	206
10.4 Diagonalization and Eigenvalue Multiplicities	207
10.5 The Functional Calculus for Diagonalizable Matrices	211
10.6 Commutants	213
10.7 The Eigenvalues of $AB$ and $BA$	214
10.8 Problems	216
10.9 Notes	220
10.10 Some Important Concepts	220
<b>11 Unitary Triangularization and Block Diagonalization</b>	<b>221</b>
11.1 Schur's Triangularization Theorem	221
11.2 The Cayley–Hamilton Theorem	223
11.3 The Minimal Polynomial	225
11.4 Linear Matrix Equations and Block Diagonalization	228
11.5 Commuting Matrices and Triangularization	231
11.6 Eigenvalue Adjustments and the Google Matrix	233
11.7 Problems	234
11.8 Notes	237
11.9 Some Important Concepts	238
<b>12 The Jordan Form: Existence and Uniqueness</b>	<b>239</b>
12.1 Ranks of Powers	239
12.2 Jordan Blocks and Jordan Matrices	240
12.3 Existence of a Jordan Form	243
12.4 Uniqueness of a Jordan Form	246

x	Contents
12.5	The Jordan Canonical Form 250
12.6	Problems 251
12.7	Notes 254
12.8	Some Important Concepts 255
<b>13</b>	<b>The Jordan Form: Applications 256</b>
13.1	Differential Equations and the Jordan Canonical Form 256
13.2	Convergent and Power-Bounded Matrices 258
13.3	The Jordan Forms of $A$ and $A^p$ 261
13.4	Stochastic Matrices 262
13.5	The Invertible Jordan Blocks of $AB$ and $BA$ 267
13.6	Similarity of a Matrix and Its Transpose 269
13.7	Similarity of a Matrix and Its Complex Conjugate 270
13.8	Problems 271
13.9	Notes 276
13.10	Some Important Concepts 276
<b>14</b>	<b>Normal Matrices and the Spectral Theorem 277</b>
14.1	Normal Matrices 277
14.2	The Spectral Theorem 279
14.3	The Defect from Normality 282
14.4	The Fuglede–Putnam Theorem 283
14.5	Circulant, Fourier, and Hartley Matrices 284
14.6	Some Special Classes of Normal Matrices 287
14.7	Similarity of Normal and Other Diagonalizable Matrices 290
14.8	Some Characterizations of Normality 291
14.9	Spectral Resolutions 292
14.10	Problems 296
14.11	Notes 300
14.12	Some Important Concepts 300
<b>15</b>	<b>Positive Semidefinite Matrices 301</b>
15.1	Positive Semidefinite Matrices 301
15.2	Schur Complements and Diagonal Dominance 306
15.3	The Square Root of a Positive Semidefinite Matrix 308
15.4	The Cholesky Factorization 311
15.5	Simultaneous Diagonalization of Quadratic Forms 313
15.6	The Schur Product Theorem 315
15.7	Problems 317
15.8	Notes 324
15.9	Some Important Concepts 325
<b>16</b>	<b>The Singular Value and Polar Decompositions 326</b>
16.1	The Singular Value Decomposition 326
16.2	The Compact Singular Value Decomposition 331
16.3	The Polar Decomposition 333

Contents	xi
16.4 Unitary Equivalence and Bidiagonal Matrices	337
16.5 Problems	339
16.6 Notes	342
16.7 Some Important Concepts	343
<b>17 Singular Values and the Spectral Norm</b>	<b>344</b>
17.1 Singular Values and Approximations	344
17.2 The Spectral and Frobenius Norms	346
17.3 Singular Values and Eigenvalues	349
17.4 The Pseudoinverse	353
17.5 The Spectral Condition Number	358
17.6 Complex Symmetric Matrices	361
17.7 Idempotent Matrices	362
17.8 Problems	364
17.9 Notes	368
17.10 Some Important Concepts	368
<b>18 Interlacing and Inertia</b>	<b>369</b>
18.1 The Rayleigh Quotient	369
18.2 Eigenvalue Interlacing for Sums of Hermitian Matrices	370
18.3 Eigenvalue Interlacing for Bordered Hermitian Matrices	372
18.4 Sylvester's Criterion	375
18.5 Diagonal Entries and Eigenvalues of Hermitian Matrices	376
18.6 *Congruence and Inertia of Hermitian Matrices	377
18.7 Weyl's Inequalities	379
18.8 *Congruence and Inertia of Normal Matrices	381
18.9 Problems	383
18.10 Notes	388
18.11 Some Important Concepts	389
<b>19 Norms and Matrix Norms</b>	<b>390</b>
19.1 Norms of Vectors	390
19.2 Norms of Matrices	391
19.3 Induced Matrix Norms	393
19.4 Matrix Norms and the Spectral Radius	395
19.5 The Point Jacobi Iterative Method	399
19.6 The Power Method for a Dominant Eigenpair	400
19.7 Problems	402
19.8 Notes	404
19.9 Some Important Concepts	405
<b>20 Positive and Nonnegative Matrices</b>	<b>406</b>
20.1 Nonnegative Matrices	406
20.2 Positive Matrices	410
20.3 Primitive Matrices	411
20.4 The Power Method for Primitive Matrices	412

xii	Contents
20.5	Problems 413
20.6	Notes 415
20.7	Some Important Concepts 416
<i>Appendix A</i> Complex Numbers 417	
A.1	Complex Numbers 417
A.2	Modulus and Argument 420
A.3	Conjugation and Complex Arithmetic 420
A.4	Polar Form of a Complex Number 423
A.5	The Complex Exponential Function 425
A.6	Problems 426
<i>Appendix B</i> Polynomials 428	
B.1	Polynomials 428
B.2	The Division Algorithm 428
B.3	Zeros and Roots 429
B.4	Identity Theorems for Polynomials 429
B.5	Polynomials and Matrices 429
B.6	Problems 430
<i>Appendix C</i> Basic Linear Algebra 432	
C.1	Functions and Sets 432
C.2	Matrices 433
C.3	Systems of Linear Equations 439
C.4	Determinants 441
C.5	Problems 444
<i>Appendix D</i> Induction 447	
D.1	Mathematical Induction 447
D.2	Problems 448
<i>References</i> 449	
<i>Index</i> 450
