

## Index

---

All persons appear as individual entries, and are indexed by their final surname (e.g. Mora, António Damas and so forth). Page numbers in italics refer to figures. Entries in bold indicate substantial entries with sub-headings. Please note that in the entry for Angola, provinces, districts, zones and cities have been combined into a single entry for simplicity. These provinces, districts, zones and cities overlapped with one another in complex and incomplete ways, and therefore towns within these areas appear in their own right, rather than being nested under the subentries for the relevant area.

- acclimatisation. *See* colonial ideology, acclimatisation
- agriculture**, 34, 96, 125, 208, 212–13, *see also* commodities
- Associação dos Agricultores de Angola* (Association of Angolan Farmers), 212
