	<i>Preface</i>	<i>page</i> ix
	<i>Acknowledgments</i>	xv
1	Stochastic Holomorphy	1
	1.1 Preliminaries	1
	1.2 Holomorphic Martingales	35
	1.3 Extrapolation	50
	1.4 Stochastic Hilbert Transforms	54
	1.5 Martingale Embedding and Projection	58
	1.6 Projecting Holomorphic Martingales	60
	1.7 Applications to $H^p(\mathbb{T})$	66
	1.8 Projecting Square Functions	68
	1.9 Notes	84
2	Hardy Martingales	87
	2.1 Bochner–Lebesgue Spaces	87
	2.2 Martingales on $\mathbb{T}^{\mathbb{N}}$	94
	2.3 Examples	100
	2.4 Classes of Martingales and Projections	109
	2.5 Basic L^1 Estimates	125
	2.6 Notes	134
3	Embedding L^1 in L^1/H_0^1	136
	3.1 Hardy Martingales and Dyadic Perturbations	136
	3.2 The Quotient Space $L^1(\mathbb{T})/H_0^1(\mathbb{T})$	156
	3.3 Notes	171
4	Embedding L^1 in X or L^1/X	172
	4.1 Random Measures Representing Operators	172
	4.2 L^1 Embedding	205
	4.3 Rosenthal’s L^1 -Theorem	225

viii	<i>Contents</i>	
4.4	Approximation in L^1	241
4.5	Talagrand's Examples	258
4.6	Notes	272
5	Isomorphic Invariants	274
5.1	Isomorphic Classification of Polydisk Algebras	275
5.2	Hardy Martingale Convergence aRNP	304
5.3	Hardy Martingale Cotype	340
5.4	Unconditionality (aUMD)	356
5.5	Embedding	371
5.6	Interpolation	375
5.7	Notes	378
	Appendix: RNP, UMD, and M-Cotype	381
6	Operators on $L^p(L^1)$	391
6.1	The Hilbert Transform	392
6.2	Reflexive Subspaces of L^1	407
6.3	Notes	425
7	Formative Examples	427
7.1	L^1 Quotients by Reflexive Spaces	428
7.2	The Trace Class	440
7.3	Iterated $L^p(L^q)$ Spaces	451
7.4	The James Tree	458
7.5	The Space L^1/H_0^1	474
7.6	Notes	481
	<i>References</i>	483
	<i>Notation Index</i>	497
	<i>Subject Index</i>	498
