# The Future of Evidence-Based Policing

Evidence-based policing (EBP) has become a key perspective for practitioners and researchers concerned with the future of policing. This volume provides both a review of where evidence-based policing stands today and a consideration of emerging trends and ideas likely to be important in the future. It includes comparative and international contributions, as well as researcher and practitioner perspectives. While examining traditional evidence-based methods and approaches, the book also identifies barriers to the advancement of evidence-based policing and expands the vision of evidence-based policing by critically examining ethical and moral concerns and questions. The book's main focus is not on what has to happen in police agencies to advance EBP, but rather on an issue that has received far less attention – the science that is necessary to produce for EBP to be successfully integrated into policing.

David Weisburd is Distinguished Professor of Criminology, Law, and Society at George Mason University, and Walter E. Meyer Professor Emeritus of Law and Criminal Justice at the Hebrew University of Jerusalem.

Tal Jonathan-Zamir is an Associate Professor at the Institute of Criminology, Faculty of Law, the Hebrew University of Jerusalem.

Gali Perry is a Lecturer at the Institute of Criminology, Faculty of Law, the Hebrew University of Jerusalem.

Badi Hasisi is Full Professor and Chair of the Institute of Criminology, Faculty of Law, the Hebrew University of Jerusalem.

She has also examined the psychological mechanisms underlying police officers' orientation to evidence-based policing and, more recently – the effects of the COVID-19 pandemic on police-community relations in Israel. Tal is the recipient of the 2010–2011 Fulbright Visiting Scholar Program and the 2015 Early Career Award from the Division of Policing of the American Society of Criminology.
