

## Index

- L-function, 25, 73, 96, 231  
*k*-free integer, 11  
*p*-adic valuation, 14, 57, 226
- absolute moments, 184  
 additive character sum, 241, 243  
 additive function, 24, 25, 27, 32, 226  
 affine transformation, 155  
 algebraic differential equation, 72  
 almost prime, 79  
 approximately independent random variables, 3, 13  
 approximation, 17  
 arithmetic function, 26, 45  
 arithmetic random function, 102  
 arithmetic random variable, 1, 26, 36, 49, 79, 127  
 arithmetic truncation, 79  
 asymptotic independence of prime numbers, 73  
 automorphic L-function, 231  
 automorphism group, 152
- Bagchi's Theorem, 50, 55, 65, 73, 95, 116  
 Banach space, 45, 51, 67, 121, 127, 133, 140, 167, 178, 180, 207, 209, 210, 217  
 Basel problem, 8  
 Bernoulli random variable, 7, 8, 11, 16, 32, 43  
 Bernstein's Theorem, 170  
 Bessel function, 120  
 bilinear forms and primes, 146  
 Birkhoff–Khintchine pointwise ergodic theorem, 66  
 Bohr–Jessen Theorem, 49  
 Bombieri–Vinogradov Theorem, 22
- Borel–Cantelli Lemma, 33, 204  
 Brownian motion, 45
- Central Limit Theorem, 33, 37, 39, 84, 96, 125, 183, 185, 195, 241  
 character, 55, 234  
 characteristic function, 3, 42, 100, 117, 119, 120, 182, 194, 196, 199, 200  
 Chebychev bias, 25, 98  
 Chebychev estimate, 27, 30, 227  
 Chebychev's inequality, 217  
 Chinese Remainder Theorem, 12, 16, 149, 225  
 Chinese Restaurant Process, 44  
 Cohen–Lenstra heuristics, 152  
 compact group, 187  
 complex Gaussian random variable, 197  
 complex logarithm, 158  
 complex moments, 186  
 composition principle, 175  
 convergence almost surely, 18, 58, 116, 132, 200, 207  
 convergence in law, 2, 6, 14, 50, 67, 84, 102, 106, 129, 174, 182, 191, 207, 210  
 convergence in probability, 3, 105, 113, 176, 178, 201  
 convergence in  $L^1$ , 211  
 convergence in  $L^2$ , 116  
 convergence in  $L^p$ , 3, 178  
 convergence of finite distributions, 14, 132, 138, 210, 211, 214  
 converse of the method of moments, 38, 185  
 coprime integers, 11, 12, 222, 226  
 correlation matrix, 194  
 counting measure, 189  
 Cramèr model, 156

- critical line, 24, 75, 78, 96  
 critical strip, 49, 230
- density of a set, 45  
 derandomization, 156  
 Dirac mass, 150  
 Dirichlet L-function, 73, 100, 101, 229, 231, 236, 244  
 Dirichlet character, 73, 101, 102, 104, 115, 229, 234, 235, 239  
 Dirichlet convolution, 78, 166, 222, 223  
 Dirichlet polynomial, 77, 78, 80, 85, 163  
 Dirichlet series, 57, 65, 91, 162, 166, 225, 234  
 discrete group, 22  
 discrete Parseval identity, 244  
 discrete Plancherel formula, 130  
 distribution function, 18, 45  
 distribution of prime numbers, 97, 238
- elementary matrix, 23  
 equidistribution, 187  
 equidistribution modulo 1, 144, 145, 149  
 Erdős–Kac Theorem, 1, 4, 24, 31, 45, 49, 73, 79, 144, 226  
 Erdős–Wintner Theorem, 24, 31, 39  
 Euler function, 16, 22, 225  
 Euler product, 47, 53, 77, 80, 89, 223, 230, 236  
 exact sequence, 192  
 expander graphs, 24, 156  
 explicit formula, 106, 238, 240  
 exponential distribution, 147  
 exponential sum, 25, 124, 143, 240
- Féjer’s Theorem, 213  
 Fermat’s Theorem, 244  
 finite cyclic group, 190  
 finite field, 124, 241  
 finite Markov chain, 23  
 Fourier coefficients, 129, 133, 135, 212  
 Fourier inversion formula, 161  
 Fourier series, 130, 212  
 Fourier transform, 3, 159, 161, 182, 189  
 fourth moment, 135  
 fractional part, 48, 144, 149, 153  
 functional equation, 48  
 functional limit theorem, 50, 128, 143  
 fundamental discriminant, 152  
 fundamental theorem of arithmetic, 7
- Gamma function, 48, 161  
 gaps, 146, 152  
 Gauss sum, 242, 243  
 Gaussian distribution, 24  
 Gaussian random variable, 2, 38, 187, 194, 197  
 Gaussian vector, 187, 194  
 Generalized Riemann Hypothesis, 22, 102, 104–106, 120, 239  
 Generalized Simplicity Hypothesis, 113–115, 118, 120, 123  
 geometric random variable, 14, 27  
 Gowers norms, 156
- Hadamard factorization, 84, 231  
 Hardy–Littlewood  $k$ -tuple conjecture, 151  
 Hasse–Davenport relation, 245
- ideal class group, 152  
 imaginary quadratic fields, 152  
 inclusion–exclusion, 7, 15  
 independent and uniformly distributed random variables, 113  
 independent events, 204  
 independent random variables, 3, 12, 16, 18, 23, 27, 32, 37, 43, 51, 58, 100, 115, 121, 125, 128, 131, 140, 173, 186, 188, 194, 195, 200, 202, 207, 216, 217, 220, 240  
 indicator function, 15  
 indicator of an event, 7  
 interpolation theory, 218  
 invertible residue classes, 22, 234  
 irreducible polynomial, 11
- Jacobi sum, 242, 244, 245  
 Jessen–Wintner Theorem, 20
- Kloosterman paths, 126, 134, 135, 139  
 Kloosterman sum, 25, 124, 128, 130, 135, 139, 143, 240, 241  
 Kolmogorov’s Maximal Inequality, 201, 202, 209  
 Kolmogorov’s Theorem, 58, 118, 132, 200  
 Kolmogorov’s Three Series Theorem, 18, 202  
 Kolmogorov’s Tightness Criterion, 129, 132, 135, 138, 214  
 Kolmogorov’s Zero–One Law, 202  
 Kolmogorov–Smirnov distance, 42  
 Kronecker Equidistribution Theorem, 102, 107, 192

- Lévy Criterion, 41, 195, 200  
 Laplace transform, 168, 194, 198  
 lattice, 154  
 law of the iterated logarithm, 125  
 Lebesgue measure, 144  
 Lipschitz function, 65, 80, 177, 179, 180, 211  
 local spectral equidistribution, 74  
 logarithmic integral, 228  
 logarithmic weight, 100  
 Lyapunov's Theorem, 195
- Möbius function, 8, 31, 77, 223, 225, 241  
 Möbius inversion, 20, 225  
 Markov chain theory, 23  
 Markov inequality, 90, 201  
 mean-value estimates, 74  
 median, 217  
 Mellin inversion formula, 160, 166, 238  
 Mellin transform, 61, 63, 159, 165  
 Menshov–Rademacher Theorem, 59, 204  
 Mertens formula, 33, 34, 41, 46, 69, 227, 228  
 method of moments, 3, 33, 84, 129, 184  
 mild measure, 184  
 mild random variable, 184, 187, 194  
 model of arithmetic objects, 156  
 modular forms, 73, 95, 125  
 moment conjectures, 96  
 multiplication table, 38  
 multiplicative character sum, 242  
 multiplicative Fourier expansion, 245  
 multiplicative function, 16, 149, 222, 224
- nontrivial zero, 230  
 number field, 152  
 number of cycles, 43  
 number of prime factor, 39  
 number of prime factors, 1
- orthogonality of characters, 101  
 orthogonality relation, 103  
 orthonormal basis, 189  
 orthonormal random variables, 205  
 orthonormality of characters, 235
- perturbation, 3, 17, 177  
 Petersson formula, 73  
 Poisson approximation, 40  
 Poisson distribution, 24, 199  
 Poisson random variable, 40–42  
 Poisson–Dirichlet distribution, 46  
 Pontryagin duality, 189
- prime counting function, 227  
 Prime Number Theorem, 21, 31, 40, 69, 73, 88, 151, 220, 228, 241  
 Prime Number Theorem in arithmetic progressions, 104  
 prime numbers, 21, 25  
 primes in arithmetic progressions, 229  
 primitive Dirichlet character, 115  
 probability Haar measure, 107, 108, 113, 128, 145, 187–190, 192  
 probability in Banach spaces, 25  
 product measure, 12, 173  
 Prokhorov's Theorem, 129, 212  
 Property ( $\tau$ ), 24  
 Property (T), 24  
 pseudomoments, 57  
 purely singular measure, 19
- quadratic Gauss sum, 138, 242
- Radon measure, 171  
 Ramanujan graph, 156  
 random Dirichlet series, 60, 61, 68, 73  
 random Euler product, 24, 51, 57, 58, 116  
 random Fourier series, 25, 128, 129, 139, 143  
 random function, 24, 58, 106, 119  
 random holomorphic function, 59  
 Random Matrix Theory, 24, 96  
 random permutation, 43, 46  
 random product, 18  
 random series, 18, 200  
 random vector, 14, 119  
 random walk, 22, 24  
 Rankin's trick, 87, 92  
 real character, 234  
 reduction modulo an integer, 4  
 reflection principle, 209  
 representation theory, 43  
 residue class, 6  
 Riemann Hypothesis, 241  
 Riemann Hypothesis over finite fields, 129, 137, 143, 243  
 Riemann sum, 130  
 Riemann zeta function, 9, 20, 24, 25, 47, 57, 63, 72, 75, 84, 96, 225, 230, 236, 239  
 Riesz Representation Theorem, 171, 181  
 Riesz–Markov Theorem, 168  
 roots of polynomial congruences, 148  
 Rubinstein–Sarnak distribution, 99, 107, 120

- Salié sum, 242, 244  
 Sato–Tate measure, 74, 128, 142, 188  
 Selberg’s Theorem, 54, 76, 95, 96, 116  
 Selberg–Delange method, 42  
 semi-circle law, 128  
 sieve, 41  
 smooth partial sum, 60, 165  
 space of lattices, 147  
 speed of convergence, 6  
 square-root cancellation, 241  
 squarefree integer, 6, 22, 38, 78, 223, 225  
 standard complex Gaussian random variable,  
   76, 80, 125, 241  
 standard Gaussian, 31  
 standard Gaussian random variable, 76, 80, 95,  
   185, 195  
 Stein’s Method, 41  
 Stirling formula, 162, 233  
 sub-Gaussian bounds, 95  
 sub-Gaussian random variable, 132, 197,  
   216, 218  
 summation by parts, 48, 104, 157  
 support, 52, 66, 139, 172, 207, 209  
 symmetric group, 43  
 symmetric partial sums, 128  
 symmetric powers, 43  
 symmetric random variable, 209,  
   217, 220  
  
 Talagrand’s inequality, 216, 219, 221  
 Taylor polynomial, 89  
 tensor product, 43  
  
 Three Gaps Theorem, 147  
 tightness, 129, 131, 135, 137, 177, 211  
 total variation distance, 41, 42  
 trivial zero, 230  
 truncation, 34  
  
 ultraflat polynomials, 156  
 uniform distribution, 6  
 uniform integrability, 38, 185  
 uniform probability measure, 4, 12, 21, 31, 49,  
   73, 131, 144, 150  
 uniform random variable on the unit circle, 51  
 uniformity, 6  
 uniformly distributed random variable, 187,  
   191, 240  
 unique factorization, 73  
 unitary character, 189  
  
 valuations of integers, 14  
 Van der Corput inequality, 145  
 von Mangoldt formula, 111  
 von Mangoldt function, 102, 230  
 Voronin’s Universality Theorem, 50, 66, 68  
  
 weak convergence, 174  
 Weil bound, 125, 240  
 Weil number, 244  
 Weyl Criterion, 55, 145, 191  
 Weyl sums, 143  
  
 zeros of Dirichlet L-functions, 100, 102, 106,  
   112, 115, 117, 237
