

Brief Contents

Preface	<i>page</i> xvii
Acknowledgments	xx
Organization of the Book	xxi
1 Statistics in the Research Process	1
2 Tabular and Graphical Representations	20
3 Measures of Central Tendency	40
4 Variability	61
5 The Normal Curve	81
6 Hypothesis Testing	116
7 Effect Size, Power, and Parameter Estimation	149
8 The <i>t</i> -Test	172
9 Analysis of Variance	231
10 Bivariate Correlation	293
11 Regression	331
12 Chi-Square	367
Appendix: Statistical Tables	397
Glossary	410
References	423
Index	424

Detailed Contents

Preface	<i>page</i> xvii
Acknowledgments	xx
Organization of the Book	xxi
1 Statistics in the Research Process	1
1.1 Introduction	1
1.2 What Are Statistics?	2
1.3 Theory, Research, and Statistics	3
1.4 The Circularity of the Research Process	3
1.5 Variables	5
1.5.1 Discrete Variables	6
1.5.2 Continuous Variables	6
1.6 Assumptions Underlying Statistical Procedures	7
1.6.1 Randomization	7
1.6.2 Levels of Measurement	8
1.6.3 Sample Size	10
1.6.4 Other Assumptions	10
1.7 Summary	10
Key Concepts	11
Using jamovi	11
Practice Exercises	18
2 Tabular and Graphical Representations	20
2.1 Introduction	20
2.2 Describing Data	20
2.3 Frequency Distributions	21
2.3.1 Constructing Grouped Frequency Distributions	23
2.3.2 Upper and Lower Limits	25
2.3.3 Cumulative Frequency Distributions	25
2.4 Frequency Distribution Graphs	26
2.4.1 Bar Graphs	27
2.4.2 Histograms and Frequency Polygons	28
2.5 Shapes of Frequency Distributions	30
2.6 Summary	33
Key Concepts	34
	ix

x Detailed Contents

Using jamovi	34
Practice Exercises	38
3 Measures of Central Tendency	40
3.1 Introduction	40
3.2 The Mode	40
3.2.1 Mode for Ungrouped Data	40
3.2.2 Mode for Grouped Data	41
3.2.3 Assumptions, Advantages, and Disadvantages of the Mode	42
3.3 The Median	43
3.3.1 Median for Ungrouped Data	43
3.3.2 Median for Grouped Data	44
3.3.3 Assumptions, Advantages, and Disadvantages of the Median	46
3.3.4 Centiles, Deciles, and Quartiles	46
3.4 The Mean	48
3.4.1 Mean for Ungrouped Data	48
3.4.2 Mean for Grouped Data	49
3.4.3 Assumptions, Advantages, and Disadvantages of the Mean	50
3.5 The Mode, Median, and Mean Compared	51
3.6 The Grand Mean	53
3.7 Summary	54
Key Concepts	55
Formulas	55
Using jamovi	56
Practice Exercises	57
4 Variability	61
4.1 Introduction	61
4.2 The Index of Qualitative Variation (IQV)	61
4.2.1 Calculating the IQV	62
4.2.2 Assumptions of the IQV	63
4.3 The Range	64
4.3.1 Assumptions of the Range	64
4.3.2 Interquartile Range	64
4.4 Variance and Standard Deviation	65
4.4.1 Variance	66
4.4.2 Standard Deviation	70
4.4.3 The Meaning of Standard Deviation	70
4.4.4 Assumptions of Standard Deviation	71
4.5 Summary	73
Key Concepts	74
Formulas	74
Using jamovi	75
Practice Exercises	79

	Detailed Contents	xi
5 The Normal Curve		81
5.1 Introduction		81
5.2 The Normal Curve		81
5.2.1 Why Is the Normal Curve Important to Social and Behavioral Scientists?		82
5.2.2 The Generalizability Function		83
5.2.3 The Statistical Inference Function		83
5.2.4 The Normal Curve as a Statistical Test Assumption		83
5.3 z-Scores and the Normal Curve		83
5.3.1 Determining Percentages of Curve Area		84
5.3.2 Tails of the Normal Curve		86
5.3.3 Interpreting the Normal Curve Table		87
5.3.4 Converting Raw Scores to z-Scores		90
5.3.5 Converting z-Scores to Raw Scores		92
5.3.6 z-Scores and Raw Scores for Samples		92
5.3.7 z-Scores, Raw Scores, and the Normal Curve Table		93
5.3.8 Transforming Scores to Standard Forms Other Than the Normal Distribution		94
5.4 Nonnormal Curves		95
5.4.1 Skewness		95
5.4.2 Kurtosis		97
5.5 The Probability Function of the Normal Curve		97
5.5.1 Probability		98
5.5.2 Odds		100
5.5.3 Probability and the Normal Curve		100
5.5.4 Tails and <i>p</i> -Values		102
5.6 Summary		104
Key Concepts		105
Formulas		105
Using jamovi		105
Practice Exercises		112
6 Hypothesis Testing		116
6.1 Introduction		116
6.2 Deriving Hypotheses to Test		116
6.2.1 Research Hypothesis		117
6.2.2 Null Hypothesis		117
6.3 The Hypothesis-Testing Process		119
6.4 Decision Rules		124
6.5 Sampling Distributions of Means		124
6.5.1 Expected Value of the Mean		125
6.5.2 Standard Error of the Mean		126
6.5.3 Hypothesis Testing and the Sampling Distribution of Means		128
6.5.4 The <i>z</i> -Test		130

xii Detailed Contents

6.6	Levels of Significance	132
6.6.1	Type I and Type II Errors	133
6.7	Critical Regions	136
6.7.1	One-Tailed or Two-Tailed Test?	139
6.8	Tests of Significance and Their Functions	140
6.9	Living with Error	140
6.10	Summary	141
	Key Concepts	142
	Formulas	142
	Using jamovi	142
	Practice Exercises	145
7	Effect Size, Power, and Parameter Estimation	149
7.1	Introduction	149
7.2	Effect Size and Power	149
7.2.1	Effect Size	151
7.2.2	Statistical Power	154
7.2.3	Factors Influencing Power	156
7.3	Estimating Population Parameters	158
7.3.1	Point Estimates	158
7.3.2	Interval Estimates and Confidence Intervals	159
7.3.3	Constructing Confidence Intervals	159
7.3.4	Confidence Intervals and Hypothesis Testing	161
7.4	Summary	162
	Key Concepts	162
	Formulas	163
	Using jamovi	163
	Practice Exercises	169
8	The <i>t</i>-Test	172
8.1	Introduction	172
8.2	The <i>t</i> -Test for a Single Sample	172
8.2.1	Estimating Population Variance	173
8.2.2	Estimated Standard Error of the Mean	176
8.2.3	Mean Differences	176
8.2.4	The <i>t</i> -Distribution	177
8.2.5	Interpreting the <i>t</i> -Distribution	179
8.2.6	Same or Different Populations	179
8.2.7	The Hypothesis-Testing Process for the One-Sample <i>t</i> -Test	180
8.2.8	Effect Size and Power	183
8.2.9	Assumptions of the One-Sample <i>t</i> -Test	185
8.3	The <i>t</i> -Test for Independent Means	189
8.3.1	Estimating Population Variance	190
8.3.2	Estimated Standard Error of the Difference between Two Means	192

	Detailed Contents	xiii
8.3.3	Differences between Two Means	193
8.3.4	The Hypothesis-Testing Process for the <i>t</i> -Test for Independent Means	194
8.3.5	Effect Size and Power	197
8.3.6	Assumptions of the <i>t</i> -Test for Independent Means	198
8.4	The <i>t</i> -Test for Dependent Means	201
8.4.1	Estimating Population Variance	203
8.4.2	Estimated Standard Error of Difference Scores	204
8.4.3	The Mean of Difference Scores and the <i>t</i> -Test	204
8.4.4	The Hypothesis-Testing Process for the <i>t</i> -Test for Dependent Means	205
8.4.5	The Sandler <i>A</i> -Test	207
8.4.6	Effect Size and Power	210
8.4.7	Assumptions of the <i>t</i> -Test for Dependent Means	211
8.5	Summary	214
	Key Concepts	215
	Formulas	215
	Using jamovi	217
	Practice Exercises	225
9	Analysis of Variance	231
9.1	Introduction	231
9.2	Analysis of Variance (ANOVA)	231
9.3	The Logic of ANOVA	232
9.3.1	The <i>F</i> -Ratio	235
9.3.2	Within-Groups Variance	235
9.3.3	Between-Groups Variance	237
9.3.4	The Between- and Within-Groups Variance Ratio	238
9.3.5	The <i>F</i> -Distribution	240
9.3.6	Interpreting the <i>F</i> -Distribution	240
9.4	Carrying Out an ANOVA	242
9.4.1	The Hypothesis-Testing Process for Experiment A	245
9.4.2	The Hypothesis-Testing Process for Experiment B	248
9.5	Assumptions of ANOVA	249
9.6	Multiple-Comparison Tests	250
9.6.1	Carrying Out a Least Significant Difference	252
9.6.2	Effect Size and Power	253
9.7	Factorial Designs	260
9.7.1	Multifactor ANOVA	261
9.7.2	Main and Interaction Effects	262
9.7.3	<i>F</i> -Ratio and Factorial Designs	266
9.8	Two-Factor ANOVA	268
9.8.1	The Hypothesis-Testing Process for Two-Factor ANOVA	268
9.8.2	Assumptions of Two-Factor ANOVA	271
9.8.3	Effect Size and Power	271

xiv Detailed Contents

9.9 Summary	276
Key Concepts	277
Formulas	277
Using jamovi	278
Practice Exercises	288
10 Bivariate Correlation	293
10.1 Introduction	293
10.2 Correlation and Association	293
10.2.1 Meaning of Measures of Association	294
10.2.2 Strength and Direction of Association	296
10.2.3 The Statistical Significance of Association	300
10.2.4 Predictive Utility	301
10.3 Pearson Correlation Coefficient (r)	304
10.3.1 Proportional Reduction in Error	306
10.3.2 The Hypothesis-Testing Process for Pearson's r	307
10.3.3 Effect Size and Power	313
10.3.4 Assumptions of Pearson's r	316
10.4 Outliers and Restricted Range	318
10.4.1 Restricted Range	319
10.5 Differences between Two Correlations	320
10.6 Summary	322
Key Concepts	323
Formulas	323
Using jamovi	324
Practice Exercises	328
11 Regression	331
11.1 Introduction	331
11.2 The Logic of Regression	331
11.3 The Regression Equation	334
11.3.1 Carrying Out a Bivariate Regression Analysis	335
11.3.2 Predicting a z -Score	338
11.3.3 Regression Coefficients	339
11.3.4 The Hypothesis-Testing Process for Regression	340
11.4 Multiple Regression	343
11.4.1 Collinearity	344
11.4.2 Carrying Out a Multiple Regression Analysis	345
11.4.3 The Hypothesis-Testing Process for Multiple Regression	349
11.4.4 Assumptions of (Multiple) Regression	349
11.4.5 Assumptions about the Error Terms	350
11.5 Summary	351
Key Concepts	352
Formulas	352

	Detailed Contents	xv
Using jamovi		353
Practice Exercises		357
12 Chi-Square		367
12.1 Introduction		367
12.2 Goodness-of-Fit		367
12.3 Table Construction		368
12.3.1 One-Variable Tables		368
12.3.2 Contingency Tables		369
12.3.3 <i>k</i> -Variable Contingency Tables		369
12.4 Single-Sample Tests		370
12.4.1 The Chi-Square Test		370
12.4.2 Degrees of Freedom		370
12.4.3 The Chi-Square Distribution		371
12.4.4 Interpreting the Chi-Square Distribution		371
12.4.5 Carrying Out a Goodness-of-Fit Test		372
12.4.6 The Hypothesis-Testing Process for the Single-Sample Chi-Square Test or Goodness-of-Fit Test		374
12.4.7 Assumptions of Chi-Square		378
12.5 Two-Sample Tests or Tests for Independence		378
12.5.1 The Hypothesis-Testing Process for a Chi-Square Test for Two Independent Samples		380
12.5.2 Assumptions of the Chi-Square Test for Independence		384
12.5.3 Effect Size and Power		384
12.6 Tests for Other Levels of Measurement		388
12.7 Summary		389
Key Concepts		389
Formulas		390
Using jamovi		390
Practice Exercises		394
Appendix: Statistical Tables		397
Glossary		410
