Preface	<i>page</i> xi
1 Scientists and Their Hecklers	1
1.1 Darwin Presents His Theory	1
1.2 Who Are the Hecklers?	3
1.3 Bad Math Can Be Rhetorically Effective	5
1.4 Does Evolution Have a Math Problem?	9
1.5 The Search for an In-Principle Argument	15
1.6 Notes and Further Reading	16
2 Evolution Basics	19
2.1 What Evolution Says	19
2.2 The Evidence for Evolution	22
2.3 The Unbridgeable Gaps Argument	27
2.4 The Complex Structures Argument	29
2.5 Irreducible Complexity	39
2.6 Paying a Price for Being Wrong	47
2.7 Notes and Further Reading	53
3 The Parallel Tracks of Mathematical Reasoning	58
3.1 Math Is Simple, Reality Is Complex	58
3.2 You Need Both Rigor and Intuition	65
3.3 Bad Mathematical Modeling	74
3.4 Anti-Evolutionism's Fallacious Model	76
3.5 Notes and Further Reading	82
4 The Legacy of the Wistar Conference	84
4.1 Again, Does Evolution Have a Math Problem?	84
4.2 Natural Selection Is Like a Truffle Hog	86

viii CONTENTS

4.3	Genetics Is Different from Computer Science	91
4.4	The Perils of Long-Term Modeling	99
4.5	The Two Pillars of Mathematical Anti-Evolutionism	105
4.6	Notes and Further Reading	108
5	Probability Theory	110
5.1	A Warm-Up Puzzle	110
5.2	A Probability Primer	112
5.3	The Hardy–Weinberg Law	117
5.4	The Art of Counting	121
5.5	The Basic Argument from Improbability	124
5.6	Complex Specified Information	132
5.7	Is the Flagellum Complex and Specified?	137
5.8	Greek Letters and Subscripts Do Not Help	146
5.9	Recent Work on Flagellum Evolution	150
5.10	The Edge of Evolution?	153
5.11	Notes and Further Reading	160
6	Information and Combinatorial Search	163
6.1	What Is Information?	163
6.2	Information Theory and Biology	167
6.3	How Evolution Increases Genetic Information	170
6.4	The Basic Argument from Information	177
6.5	Is DNA Comparable to Human Language?	179
6.6	Protein Space Revisited	184
6.7	Dawkins' Weasel Experiments	191
6.8	The No Free Lunch Theorems	195
6.9	Artificial Life	207
6.10	Conservation of Information	211
6.11	Notes and Further Reading	217
7	Thermodynamics	221
7.1	An Especially Ambitious Argument	221
7.2	What Is Entropy?	223

7.3	The First Two Laws of Thermodynamics	227
7.4	Statistical Mechanics	233
7.5	Applying the Second Law to Evolution	236
7.6	The Basic Argument from Thermodynamics	238
7.7	Statistical Mechanics versus Evolution?	243
7.8	Thermodynamics in <i>The Genesis Flood</i>	246
7.9	Henry Morris's Later Writing	251
7.10	Reviving the Second Law Argument	254
7.11	Notes and Further Reading	264
8	Epilogue	267
8.1	Again, Bad Math Can Be Rhetorically Effective	267
8.2	Can Intelligence Build Complex Adaptations?	271
8.3	Coda	273
	Bibliography	275
	Index	285
