	Preface	*page* vii
	Acknowledgements	ix
1	**Introduction**	1
1.1	Motivation	1
1.2	A Word on the Terminology	5
1.3	Summary of Findings	6
2	**Coarse Structure and Metrisability**	19
2.1	Coarse and Uniform Spaces	19
2.2	Coarse and Uniform Structures on Groups	23
2.3	Coarsely Bounded Sets	26
2.4	Comparison with Other Left-Invariant Coarse Structures	32
2.5	Metrisability and Monogenicity	37
2.6	Bornologous Maps	43
2.7	Coarsely Proper Écarts	49
2.8	Quasi-metric Spaces	53
2.9	Maximal Écarts	59
3	**Structure Theory**	68
3.1	The Roelcke Uniformity	68
3.2	Examples of Polish Groups	78
3.3	Rigidity of Categories	83
3.4	Comparison of Left- and Right-Coarse Structures	88
3.5	Coarse Geometry of Product Groups	92
3.6	Groups of Finite Asymptotic Dimension	104
3.7	Distorted Elements and Subgroups	106
3.8	Groups with Property (PL)	112

Table of Contents
More Information

4 Sections, Cocycles and Group Extensions 125
4.1 Quasi-morphisms and Bounded Cocycles 126
4.2 Local Boundedness of Extensions 130
4.3 Refinements of Topologies 138
4.4 Group Extensions 141
4.5 External Extensions 145
4.6 Internal Extensions of Polish Groups 148
4.7 A Further Computation for General Extensions 155
4.8 Coarse Structure of Covering Maps 156

5 Polish Groups of Bounded Geometry 166
5.1 Gauges and Groups of Bounded Geometry 166
5.2 Dynamic and Geometric Characterisations of Bounded Geometry 170
5.3 Examples 176
5.4 Topological Couplings 185
5.5 Coarse Couplings 202
5.6 Representations on Reflexive Spaces 204
5.7 Compact G-Flows and Unitary Representations 207
5.8 Efficiently Contractible Groups 210
5.9 Entropy, Growth Rates and Metric Amenability 220
5.10 Nets in Polish Groups 230
5.11 Two-Ended Polish Groups 234

6 Automorphism Groups of Countable Structures 244
6.1 Non-Archimedean Polish Groups and Large-Scale Geometry 244
6.2 Orbital Types Formulation 245
6.3 Homogeneous and Atomic Models 252
6.4 Orbital Independence Relations 259
6.5 Computing Quasi-isometry Types of Automorphism Groups 269

7 Zappa–Szép Products 272
7.1 The Topological Structure 272
7.2 Examples 275
7.3 The Coarse Structure of Zappa–Szép Products 277

Appendix Open Problems 285
