

## Index

- acritarchs, 32, 72  
 Adelaide Superbasin, the, 49  
 Age of Mammals, the, 160  
 Age of Reptiles, the, 160  
 Alroy, John, 89–91, 93–95, 105–107, 161  
 Alvarez, Luis, 101  
 Alvarez, Walter, 101  
 anoxia, 73, 75, 137, 139, 154  
 Antarctic Cold Reversal, the, 188, 190  
 Antarctic permafrost, 205  
 Anthropocene, the, 19, 189, 193  
   definition, 11  
   surviving, 193  
 Anthropocene biodiversity crisis, the, 48, 194  
 Anthropocene defaunation, the, 22, 24, 26,  
   177, 192–193  
 atmosphere, the, 14  
 Avalon Peninsular, Newfoundland, 60
- background extinction, 46, 104  
 Bahamian reefs, 128  
 banded iron formation (BIF), 67–68, 70  
 Barnoski, Anthony, 179, 198  
 Bidart, France, 156  
 Big Five mass extinctions, the, 46–47, 80, 82,  
   84, 86, 91, 97, 103, 105, 107,  
   115–116, 119, 127, 161, 173, 193,  
   198, 209  
   size, 108, 112, 114  
 bilaterians, 58–59  
 biodiversity, 25–27, 30, 32–33, 47, 76–78,  
   82–84, 86, 89–91, 93–97, 123,  
   128, 130, 159–160, 163–164,  
   166–168, 173, 175, 196, 200–201,  
   207, 209–210  
 biomarkers, 57  
 biosphere, the, 14, 16, 20, 22, 26–27, 73, 75,  
   123, 159, 163, 168, 195, 198, 201,  
   207, 209  
 bioturbation, 61, 74  
 Bølling–Allerød Event, the, 188  
 Bottaccione Gorge, Italy, 99  
 boundary clay, 100–102, 143–144, 156
- Brachina Creek, 49, 52, 54, 85  
 brown dwarf star, 120
- Cambrian Explosion, the, 61–65, 74–76, 95,  
   209  
 Cambrian fossils  
   *Anomalocaris*, 63  
   *Archaeocyatha*, 52, 85  
   hyolithids, 85  
   small shelly fauna (SSF), 85  
   stromatolites, 53, 57  
 Cambrian Period, the, 38, 49, 52, 55, 61, 64,  
   72–73, 75, 82, 85–86, 89, 93, 95,  
   163  
 Capitan Reef, New Mexico, USA, the, 129  
 Capitanian Period, the, 107  
 carbon, 21, 26, 69–71, 73, 205, 207  
   isotopes, 157  
 carbon cycle, the, 14, 19–20, 138  
 carbon dioxide, 6, 19, 21–22, 69, 71, 123, 126,  
   131–132, 134–135, 137, 139, 142,  
   155, 166, 195, 205–206  
 Ceballos, Gerardo, 197  
 Cenozoic Era, the, 78, 160  
 Central Atlantic Magmatic Province, the,  
   127  
 chemical weathering, 21, 131, 207  
 Chicxulub meteorite crater, Yucatan,  
   Mexico, 102, 144  
 Chiquihuite Cave, Mexico, 179  
 Clovis People, the, 179  
 coccolithospheres, 131, 207  
 Colorado geological section, USA, 166  
 CONOP, 95  
 Cretaceous–Paleogene boundary, the, 44,  
   147, 154, 157, 166  
 Crutzen, Paul J., 12  
 Cuvier, Georges, 37–38, 44  
 cyanobacteria, 30–31, 66, 68–69
- Darwin, Charles, 35  
 Deccan Traps, the, 127, 141, 146, 149–150,  
   154–155, 157, 160, 164, 166, 189

## 238 INDEX

- deep time, 27, 33, 52, 62, 65, 70, 76, 97, 114, 119, 124, 149, 163, 173, 192, 200, 204, 213
- Delaware Basin, USA, 129
- Denisovans, 174
- Devonian Period, the, 38–39, 83, 91
- dodo, the, 37, 176, 185
- Doushantuo Formation, the, 57  
 fossil embryos, 58
- Early Eocene Climatic Optimum (EECO), the, 204
- Earth System science, 14–15
- Earth System succession, 167
- Earth System, the, 14, 16–17, 19, 49, 122, 138, 163, 201, 209  
 emergence, 41, 48–49, 75, 201  
 equilibrium point, 17–18, 123, 159, 163, 202  
 equilibrium shift, 18, 125, 164  
 feedback loops, 14  
 fluxes. *See* feedback loops  
 forcing, 17, 21, 26, 123  
 recovery, 164–165  
 reservoirs, 14, 123, 202  
 resilience, 202  
 tipping point, 18, 21, 123
- ecological niches, 2, 7, 99, 115, 162
- ecosystem, the, 26, 55, 62–64, 75, 113, 149, 155, 158, 161, 164, 167, 192, 200–201, 208–209  
 collapse, 10, 118, 123, 125, 139, 145–146, 164  
 recovery, 165
- Ediacara fauna, the, 30, 32, 49–50, 52, 55, 57–61, 63, 65, 74  
 Avalon assemblage, 60  
 Nama assemblage, 60  
 White Sea assemblage, 60, 73, 75
- Ediacaran–Cambrian transition, the, 65, 75
- Ediacaran body fossils  
*Mawsonites*, 58  
*Spriggina*, 58–59  
*Tribrachidium*, 59
- Ediacaran Period, the, 52, 54, 61, 64–65, 74–75, 85
- Elatina diamictite, the, 53
- end-Cretaceous mass extinction, 47, 79, 84, 88, 99, 107, 125, 128, 139, 141, 146, 160, 165, 178, 181, 189, 191, 198–199, 203  
 cause, 125, 164  
 impact model, 6, 102–103, 118–119, 122, 126, 141, 143, 145, 147, 149, 153, 157–158, 161, 164–165  
 size, 112  
 structured extinction pattern, 146–149
- end-Devonian mass extinction, 47, 83, 86, 88–89, 95, 107  
 size, 112
- end-Ordovician mass extinction, 47, 82, 86, 88–89, 95, 107, 127  
 size, 112
- end-Permian mass extinction, 47, 79, 83, 88, 91, 96, 107, 117, 130, 138–139, 142, 149, 191, 195, 200  
 cause, 125  
 size, 112
- end-Triassic mass extinction, 47, 84, 88, 107  
 size, 112
- eukaryotes, 32
- evolutionary faunas, 85  
 Cambrian fauna, 85–86, 93  
 Modern fauna, 86, 88, 90, 93  
 Paleozoic fauna, 85–86, 89, 93
- extinction, 35, 42  
 extinction rate, the, 106, 112, 128, 173, 195, 197–199  
 pre-human, 196
