1 Understanding ‘Distributed Ledger Technology’ and Its Potential as a Disruptive Technology for Climate Action	1
Alastair Marke	
1.1 Introduction: Overview of the Issues Explored in This Book	1
1.2 Understanding DLT and Blockchain	3
1.3 Shifting to a Crypto-legal Structure for Regulated Environments	8
1.3.1 Defining Crypto-law and Crypto-legal Structure	8
1.3.2 Disruptive Effects of Crypto-legal Structure	9
1.4 Blockchain and Climate Action	11
1.5 Aims of the Book	13
1.6 Structure of the Book	14
1.7 Target Audience	15
2 Governing the Carbon Market	16
Michael A. Mehling	
2.1 Introduction	16
2.2 An Introduction to Carbon Trading	17
2.2.1 Theory and Rationale of Carbon Trading	17

2.2.2	Evolution of Carbon Trading	19
2.3	Governance Challenges in the Carbon Market	22
2.3.1	What Is Governance and Why Does It Matter in Carbon Trading?	22
2.3.2	Governance Risks and Vulnerabilities in the Carbon Market	24
2.3.2.1	Emissions Transparency and the Compliance Cycle	26
2.3.2.2	System Transparency	27
2.3.2.3	Market Oversight and Activity Tracking	29
2.4	Conclusion	31
3	Potential Interaction among Artificial Intelligence, Internet of Things and Distributed Ledger Technology	33
	Dessanin Ewèdew Thierry Awesso, Marco Zolla and Alastair Marke	
3.1	Introduction	33
3.2	An Overview of AI	33
3.2.1	Definition of AI	33
3.2.2	ML: The Backbone of AI-Supported (Security) Risk Management	35
3.2.3	AI and Climate Change	36
3.3	An Overview of IoT	37
3.3.1	The Breakthrough of IoT	37
3.3.2	The Main Challenges in IoT	39
3.3.3	Current Developments and Potential Future Scenarios in the IoT World	41
3.4	Unlocking the Potential of Integrating AI, IoT and DLT: Advantages, Challenges and Technical Feasibility	43
3.4.1	Integration of IoT with DLTs	43
3.4.2	Integration of DLT with AI	49
3.4.3	Integration of IoT with AI	53
3.4.4	Combination of AI, IoT and DLT	55
3.5	Conclusion	59
4	Emerging Technologies and Their Applicability to Solving Challenges in the Carbon Markets: An Overview	61
	Alastair Marke, Max Inglis and Constantine Markides	
4.1	Introduction	61
4.2	Current Challenges of the Carbon Trading Economy	61
4.3	Applicability of DLT to Carbon Trading	62
4.3.1	DLT-Supported MRV, Compliance and Allocation Processes	62
4.3.2	Added Value to the MRV and Compliance Cycle	63
4.3.3	Limited Disruptive Effects of DLT-Supported MRV on Regulatory Enforcement	64

<i>Contents</i>		vii
4.4	Filling Carbon Market Gaps with AI, IoT and DLT	65
4.4.1	Current Data Management	65
4.4.2	New Data Management Design	65
4.4.3	Market Risk Management	66
4.4.4	New Market Management Features	68
4.5	Potential DLT Applications to Address Security Issues and Points of Failure	71
4.5.1	Doorkeeper Module	72
4.5.2	Know-Your-Customer Module	72
4.5.3	Transaction Module	73
4.6	Conclusion	73
5	Transition to a DLT-Supported Governance Framework	74
	Clare Reynolds and Nicola Massella	
5.1	Introduction	74
5.2	Challenges of Governing DLT and Existing Regulatory Frameworks	74
5.2.1	A Very Short History of Existing Approaches to Regulating Crypto-assets and DLT	74
5.2.2	Challenges of Governing DLT within Existing Legal Frameworks	77
5.3	General Legal Principles for a ‘Crypto-legal’ Structure in Carbon Markets	84
5.4	Institutional Options to Operationalise the Transition: Evolving Roles of Stakeholders in Carbon Markets	89
5.4.1	Centralised Authorities, Oversight Organisations and Single Centralised Registers	89
5.4.2	Covered Entities/Emitting Firms	90
5.4.3	Intermediaries (Including Exchanges)	91
5.4.4	Assessors and Compliance Officers	92
5.4.5	New Actors in DLT-Supported Carbon Markets: DLT Platform Providers	93
5.4.6	New Actors in DLT-Supported Carbon Markets: The Nodes	93
5.4.7	New Actors in DLT-Supported Carbon Markets: New Opportunities	94
5.5	Transition Roadmap and Process	94
5.5.1	The Importance of Enabling Environments or Regulatory Sandboxes	95
5.5.2	The Role of a Pilot Application of DLT in Emissions Trading	95
5.5.3	Pilot Development and Technology Transfer	96
5.6	Conclusion	97

6	DLT and the European Union Emissions Trading System	98
	Marco Zolla, Alastair Marke and Michael A. Mehling	
6.1	Introduction: Current Governance Framework	98
6.2	Regulatory Changes for a DLT-Based Governance Framework	101
6.2.1	Transitioning the EU ETS to a Blockchain-Based Architecture	101
6.2.2	Solutions Offered by a Crypto-legal Structure	103
6.2.3	Regulatory Services Delivered by a Crypto-legal Structure	105
6.2.4	Disruptive Effects from the Regulatory Adaptation to DLT	107
6.3	Legislative Roadmap	110
6.3.1	Aligning the EU ETS with the EU Digital Strategy	110
6.3.2	New Legislative Approach for Blockchain	112
6.4	Conclusion	114
7	DLT and the Voluntary Carbon Markets	115
	Nicholas Scott, Sai Nellore and Alastair Marke	
7.1	Introduction	115
7.2	Overview of Current Voluntary Markets	117
7.2.1	The CDM	117
7.2.2	The VCS	120
7.3	How DLT and Other Emerging Digital Technologies Can Solve Technical Issues and Regulatory Gaps in Voluntary Markets	122
7.3.1	MRV Processes	122
7.3.2	Trading Credits Using DLT	124
7.4	Examples of Voluntary Carbon Market Activities That Use DLT	126
7.4.1	Carbonex	126
7.4.2	IBM Energy Blockchain Labs	127
7.4.3	ClimateTrade	127
7.4.4	Nori	128
7.4.5	Moss.Earth	128
7.5	Implementing DLT and Other New Technologies in Voluntary Carbon Markets	129
7.5.1	Solutions Offered to Voluntary Carbon Markets by a Crypto-legal Structure: CDM as a Case Study	129
7.5.1.1	Regulatory Services Delivered by DLT	130
7.5.1.2	Disruptive Effects on Regulatory Enforcement	131
7.5.2	Foreseeable Changes within the VCS and Other Voluntary Standards	132
7.5.3	Governance Responses to Facilitate the Deployment of Emerging Technologies in Voluntary Markets	135
7.6	Conclusion	136

8	The Carbon Offsetting and Reduction Scheme for International Aviation (CORSA)	137
	Dessanin Ewèdew Thierry Awesso	
8.1	Introduction	137
8.2	Current Governance Framework and Gaps/Challenges in CORSA	137
8.2.1	Current Governance Framework	137
8.2.2	Gaps and Challenges	141
8.3	Regulatory Changes for a DLT-Based Governance Framework	144
8.3.1	Overview of DLT Compatibility with the Current Framework	144
8.3.2	Overview of the Required Regulatory Adjustments	147
8.3.3	Overview of the CORSA Framework with a ‘Crypto-legal Structure’	152
8.3.3.1	Effectiveness and Simplification of the Legal Framework	152
8.3.3.2	Transformation of the Framework Architecture: Transformation of Current Actors, Introduction of New Actors and Emergence of New Legal Elements	152
8.3.3.3	Exploitation of New Patterns of Enforcement of the Legal Framework	153
8.4	Implementation Roadmap of Negotiations and Implementation	154
8.4.1	ICAO Council and CAEP Role	154
8.4.2	ICAO Member States’ Role	156
8.5	Conclusion	156
9	DLT and Networked Carbon Markets	158
	Justin D. Macinante	
9.1	Introduction	158
9.2	Paris Agreement and Heterogeneity	158
9.2.1	Current Context	158
9.2.2	The Networked Market	160
9.3	Networked Carbon Markets on DLT	160
9.3.1	Two Elements of the Proposed Market	160
9.3.2	The Reasons to ‘Network’ Rather Than ‘Link’	161
9.3.2.1	Political Issues	161
9.3.2.2	Legal Issues	164
9.3.2.3	Practical Issues	165
9.3.2.4	Flexibility (Opting In and Out)	165
9.3.3	DLT	166
9.3.3.1	Introduction	166
9.3.3.2	Use Cases, Especially in Financial Markets	168
9.3.3.3	DLT Terminology	170

	9.3.3.4	DLT Definitions	171
	9.3.3.5	Use Case of the Proposal	173
9.4		Conclusion	175
10		Conclusions, Recommendations and a Potential Pathway for a Transition to a DLT-Based Governance for Carbon Markets	
		Michael A. Mehling, Alastair Marke, Fabiano de Andrade Correa and Constantine Markides	178
		<i>Index</i>	184
