

## INDEX

Locators in **bold** refer to tables; those in *italic* to figures

- A Generation in Jeopardy* (Pesticide Action Network) 146–7
- ACC *see* Anthropogenic Chemical Circulation
- adaptation to toxins, impossibility of 217–18
- ADHD *see* attention deficit hyperactivity disorder
- Afghanistan war veterans, medically unexplained conditions 157
- Agency for Toxic Substances and Disease Registry (ATSDR) 163
- Agent Orange 8, 187
- agriculture *see* farming
- agricultural pollution *see* nutrient pollution; pesticides
- air pollution 14; *see also* indoor pollution
- annual cost of 14
- asthma 155
- breast cancer 96
- environmental distribution 27–31
- mortality and morbidity 29–30, 30, 153
- population-level impacts 152–4
- air toxics, newborn babies 60–1
- Akimoto, Hajime 28
- albatross, pesticide residues 36
- alchemy 90–1, 93
- allergies 76–8
- altitude tolerance, human adaptability 217
- Alzheimer's disease 103, 158
- amphetamines 128
- amphibians, effects of EDCs 145
- ancient world, pollution 4, 28
- aniline dyes, historical perspectives 4
- amyotrophic lateral sclerosis (ALS) 103
- angiogenesis, tumours 95
- Antarctica 32–4
- Anthropogenic Chemical Circulation (ACC) 20–1, 25, 38; *see also* global distribution of pollutants
- banned substances 185
- e-waste 112
- main routes of man-made pollution 48–9
- need for change 237
- aquaculture, deepwater 220
- arsenic 34–5, 217
- asbestos 4, 113, 115
- asthma, population-level impacts of pollution 155
- attention deficit hyperactivity disorder (ADHD) 132, 149–55
- Auman, Heidi 35
- Australia
- CRC CARE 101
- Great Barrier Reef 119
- Olympic Park environmental clean-up 196–8, 210
- Port Pirie lead poisoning 131–3, 136

- autism 95, 151–3
- autoimmunity 160–1
- AVAAZ group, ethical consumerism 229
- awareness of pollution 3–4, 50, 226–31, 239–40
- babies 147; *see also* children
  - air toxics 60–1
  - individual-level pollution 56–61
- Baltic Sea, nutrient pollution 119
- Bangladesh factory collapse 227
- banned substances
  - dirty dozen 184–6
  - failures of regulation 192–3
  - ten point plan to detox the Earth 245
- Barker, David 148
- Basel Convention on the Control of Transboundary Movements of Hazardous Wastes and Their Disposal 204
- Beck, Eckardt C. 41
- Beck, Valentin 228
- Beijing smogs 28–9
- Bellinger, David 136
- benzene 13, 84–5
- Bhopal, India poisonous gas release 179–81
- biomagnification 38
- biomarkers, chemical mixtures 101
- bioremediation 211
- birds, effects of EDCs 145
- bisphenol A (BPA)
  - bottled water 80
  - chemical mixtures 96
  - food sources 90
  - individual-level pollution 56–61
- blame attributions
  - and collective responsibility 194–5, 223
  - industries responsible for pollution 194–5, 206–7
  - victims of pollution 169
- bludgeoning of Eugene Smith 2–3
- Blumberg, B. 170
- bottled water
  - bisphenol A 80
  - sales growth figures 80
- Boxer, Barbara 226
- Boyle, Coleen 147
- BPA *see* bisphenol A
- breakdown products
  - chemical mixtures 92, 94
  - failures of regulation 193
  - nanoparticles 116
- breast cancer
  - air pollution 96
  - chemical mixtures 103
  - personal care products 64
  - population-level impacts of pollution 163–5
  - Seveso poisonous gas release 178
- breast milk
  - dioxins 60
  - flame retardants 31, 59
  - persistent organic pollutants 59–60
- breast milk substitutes, Nestlé baby milk example 227
- brown cloud 28; *see also* air pollution
- built-in obsolescence, e-waste 110–11
- burden of preventable disease *see* health impacts of pollution; preventable disease
- burial grounds 86–7
- Buzea, Cristina 115
- cancer, population-level health impacts 153–4, 161–5, 162;

- see also* angiogenesis;  
 carcinogens; childhood cancers
- carbon/carbon dioxide; *see also*  
 climate change  
 global emissions per annum  
 19–20  
 HCFCs 27  
 polar regions 33–4
