

Index

- abelian idempotent, 61
- abelian regular ring, 61
- abelian ring, 13
- Artinian module, 11
- automorphism-extendable module, 151
- automorphism-invariant module, 81
- automorphism-liftable module, 197

- Baer ring, 7
- basis of a free module, 18
- Bezout module, 17
- bimodule, 2

- C1 property, 24
- C2 property, 24
- C3 property, 25
- CS module, 24
- characteristic submodule, 81
- classical left ring of fractions, 14
- classical right ring of fractions, 14
- classical ring of fractions, 14
- classically completely integrally closed subring, 185
- clean module, 50
- clean ring, 49
- closed submodule, 9
- closure, 9
- \cap -complement, 9
- \cap -complement submodule, 9
- completely integrally closed subring, 175
- continuous module, 26
- coprime pair, 54
- cotorsion module, 52
- cotorsion ring, 52

- directly finite module, 61
- directly finite ring, 61
- domain, 14
- dual basis lemma, 21

- elementary divisor ring, 62
- endomorphism-extendable module, 151
- endomorphism-invariant module, 58
- endomorphism-liftable module, 189
- essential extension, 9
- essential submodule, 9
- exact sequence, 29
- exchange property, 37

- finite exchange property, 37
- finite-dimensional module, 10
- flat module, 30
- free module, 18
- fully invariant submodule, 5

- Goldie dimension, 10
- Goldie radical of a module, 12

- Hattori torsion-free module, 29
- hereditary module, 27

- injective envelope, 22
- injective module, 18
- integrality over the center, 191

- Jacobson radical of a module, 7
- Jacobson radical of a ring, 8

- left annihilator, 5
- lifting of idempotents, 46

- local idempotent, 16
- local module, 16
- local ring, 16
- locally Artinian module, 11
- locally nilpotent endomorphism, 180
- locally Noetherian module, 11

- maximal submodule, 7
- maximum condition on annihilators, 6
- minimum condition on annihilators, 6

- Noetherian module, 11
- nonsingular module, 11
- non-torsion module, 16

- Öre set, 14

- perfect ring, 27
- π -injective module, 24
- π -projective module, 189
- prime ring, 13
- projective cover, 26
- projective module, 18
- pseudo-injective module, 82
- pure-injective module, 50

- quasi-continuous module, 24
- quasi-injective module, 18
- quasi-projective module, 18
- quotient finite-dimensional module, 11

- rank of a free module, 18
- reduced ring, 13

- relative injectivity, 18
- right annihilator, 5

- self-injective ring, 20
- semi-Artinian module, 8
- semilocal ring, 16
- semiperfect ring, 27
- semiprimary ring, 17
- semiprime ring, 13
- semisimple module, 7
- serial module, 17
- simple module, 7
- simple ring, 7
- singular module, 11
- singular submodule, 11
- small submodule, 7
- socle, 99
- strongly automorphism-liftable module, 197
- subdirectly indecomposable, 8
- subfactor, 3

- tensor product, 28
- torsion-free module, 16
- torsion module, 16

- uniform dimension, 10
- uniform module, 10
- uniserial module, 17
- uniserial ring, 17

- von Neumann regular ring, 34

- X -injective module, 18
- X -projective module, 18
