|--|-----------------|
| <i>Preface</i> | <i>page</i> vii |
| 1 Preliminaries | 1 |
| 1.1 Basics of Ring Theory and Module Theory | 1 |
| 1.2 Simple and Semisimple Modules | 7 |
| 1.3 Essential and Closed Submodules | 9 |
| 1.4 Prime Rings and Semiprime Rings | 13 |
| 1.5 Classical Rings of Fractions and Semiprime Goldie Rings | 14 |
| 1.6 Local, Semilocal and Semiperfect Rings | 16 |
| 1.7 Injective and Projective Modules | 17 |
| 1.8 Injective Envelope and Quasi-Injective Modules | 22 |
| 1.9 Flat Modules | 28 |
| 1.10 Exchange Property of Modules | 37 |
| 1.11 Pure-Injective and Cotorsion Modules | 50 |
| 2 Modules Invariant under Automorphisms of Envelopes | 56 |
| 2.1 Introduction to Envelopes | 56 |
| 2.2 Modules Invariant under Endomorphisms and Automorphisms | 58 |
| 2.3 Additive Unit Structure of von Neumann Regular Rings | 60 |
| 2.4 Applications of Additive Unit Structure of von Neumann Regular Rings | 67 |
| 3 Structure and Properties of Modules Invariant under Automorphisms | 70 |
| 3.1 Structure of Modules Invariant under Automorphisms | 71 |
| 3.2 Properties of Modules Invariant under Automorphisms | 74 |
| 3.3 Applications | 77 |
| 3.4 Modules Invariant under Monomorphisms | 79 |

| | | |
|----------|--|-----|
| 4 | Automorphism-Invariant Modules | 81 |
| 4.1 | Some Characterizations of Automorphism-Invariant Modules | 81 |
| 4.2 | Nonsingular Automorphism-Invariant Rings | 85 |
| 4.3 | When Is an Automorphism-Invariant Module a Quasi-Injective Module | 87 |
| 4.4 | Rings Whose Cyclic Modules Are Automorphism-Invariant | 104 |
| 4.5 | Rings Whose Each One-Sided Ideal Is Automorphism-Invariant | 106 |
| 5 | Modules Coinvariant under Automorphisms of their Covers | 118 |
| 5.1 | Structure and Properties | 119 |
| 5.2 | Automorphism-Coinvariant Modules | 123 |
| 5.3 | Dual Automorphism-Invariant Modules | 126 |
| 6 | Schröder–Bernstein Problem | 141 |
| 6.1 | Schröder–Bernstein Problem for \mathcal{X} -Endomorphism Invariant Modules | 141 |
| 6.2 | Schröder–Bernstein Problem for Automorphism-Invariant Modules | 147 |
| 7 | Automorphism-Extendable Modules | 151 |
| 7.1 | General Properties of Automorphism-Extendable Modules | 153 |
| 7.2 | Semi-Artinian Automorphism-Extendable Modules | 157 |
| 7.3 | Automorphism-Extendable Modules that Are Not Singular | 161 |
| 7.4 | Modules over Strongly Prime Rings | 168 |
| 7.5 | Modules over Hereditary Prime Rings | 172 |
| 7.6 | General Properties of Endomorphism-Extendable Modules and Rings | 178 |
| 7.7 | Annihilators that Are Ideals | 183 |
| 7.8 | Completely Integrally Closed Subrings and Self-Injective Rings | 185 |
| 7.9 | Endomorphism-Liftable and π -Projective Modules | 189 |
| 7.10 | Rings Whose Cyclic Modules are Endomorphism-Extendable | 190 |
| 8 | Automorphism-Liftable Modules | 197 |
| 8.1 | Automorphism-Liftable and Endomorphism-Liftable Modules | 197 |
| 8.2 | Non-Primitive Hereditary Noetherian Prime Rings | 198 |
| 8.3 | Non-Primitive Dedekind Prime Rings | 201 |
| 8.4 | Idempotent-Lifted Modules and π -Projective Modules | 202 |
| 9 | Open Problems | 208 |
| | <i>References</i> | 215 |
| | <i>Index</i> | 222 |
