Index

- L -function of a τ -sheaf, 87
- τ -sheaf, 7
- τ -sheaf with coefficients, 63
- étale local systems, 18
- adjoint form, 8
- Anderson's elementary approach, 95
- birational map, 57
- category of crystals, 14
- characteristic element, 97
- Chebotarev density theorem, 96
- Chevalley-Warning theorem, 58
- coherent τ -sheaf, 8
- cohomology of symmetric powers, 77
- compactification of a morphism of schemes, 36
- constructible étale sheaves, 18
- crystal, 14
- derived non-additive functor, 84
- direct image, 24
- direct image with proper support, 37
- extension by zero, 31
- extensions of τ -sheaves, 100
- exterior power, 71
- exterior symmetric powers of crystals, 81
- Fitting ideal, 103
- Goss zeta function, 97
- Grothendieck group of crystals, 43
- Grothendieck-Serre duality, 111
- Hasse invariant, 60
- higher direct image, 24
- Künneth formula, 41, 111
- Koszul complex of a linear map, 73
- Leray spectral sequence, 26, 44
- nil-isomorphism, 13
- nilpotent τ -sheaf, 12
- polynomial sums, 59
- projection formula, 41
- proper base change, 29
- pullback of crystals, 21
- regular closed immersion, 113
- semi-linear form, 8
- sheaves-functions dictionary, 45
- special values of L -functions, 105
- symmetric powers of a quasi-projective scheme, 76
- symmetric tensors, 71
- tensor product of τ -sheaves, 22
- tensor product of crystals, 24
- trace formula, 45
- trace formula for L -functions, 89
- trace formula with coefficients, 67
- trace function of a τ -sheaf, 11
- Woods Hole trace formula, 45, 118
