ELETECA DATA MANAGEMENT SYSTEM

ELEteca collects data for the teachers to help adapt their pedagogical approach, gathering information on student use of and performance on online activities and tests. Teachers can use ELEteca to generate reports on individual students and for the class as a whole.

Class Reports

These reports summarize data for the whole class collected by ELEteca, based on individual student responses, allowing teachers to make decisions about student grouping and inform further review, revision, practice, and instruction.

Individual Student Reports

- These reports provide information on what activities and tests an individual student has completed and their scores, including dates completed.
- Teachers can review an individual student's responses and time on task to gain further insight into a student's level of command of the language and provide personalized, individual feedback.

ACTIVATING YOUR DIGITAL INSTRUCTOR ACCESS

Mundo Real Media Edition includes a set of digital components and services for the teacher that enhance and complement the print material, providing what we think is the best teaching experience with the program.

ELEteca is the Learning Management System that accompanies the *Mundo Real Media Edition* Student's Book.

To activate your ELEteca resources visit **http://cambridge.edinumen.es/welcome**, and follow the instructions to create an account and activate your access code.
