

LAWFUL BY DESIGN

In recent years, the procedural rules of global governance institutions have come under scrutiny from scholars worldwide and have been conceptualized as akin to domestic administrative law. However, one question has so far not been addressed: Who shapes this procedure and why? In the present work, Isabel Lischewski develops a simple matrix connecting procedure and state interest. When this matrix is applied to a sample of forty diverse institutions, fascinating patterns emerge, which are further explored through in-depth case studies. It is shown that states prefer to balance sovereignty preservation through procedure with the costs it entails. Thus, normative considerations are not the predominant basis on which this procedure is designed. The research provides original insights into the landscape of global governance procedure and cautions against a notion of “apolitical” administration law.

ISABEL LISCHEWSKI is Post-Doctoral Research Assistant at the Chair of International Public Law and International Human Rights Law, Westfälische Wilhelms-Universität Münster. She studied law at WWU Münster and Higher School of Economics Moscow. She was a recipient of a doctoral stipend of the Studienstiftung des Deutschen Volkes and a Visiting Doctoral Researcher at New York University School of Law. Her dissertation was nominated for the Study Prize of the Körber-Stiftung.

Acknowledgments

This book came into being as the result of my dissertation in law at Westfälische Wilhelms-University Münster, Germany, but, like everything in science, it would never have seen the light of day had it not been for the support, patience, and brilliance of a number of people and institutions far beyond the individual author.

Work on this project was made possible by the generous support of the Studienstiftung des Deutschen Volkes.

My doctoral supervisor, Niels Petersen, not only offered advice, mentorship, and valuable criticism at all stages of the project but also encouraged true academic freedom and opportunities for personal and professional growth, for which I am beyond grateful.

For invaluable help in bridging gaps between disciplines, I owe many thanks to my second supervisor, Thomas Dietz.

My postdoctoral supervisor and mentor, Nora Markard, is a source of advice, encouragement, and support, without which finding my own path would be a considerably more frustrating and lonesome endeavor.

I had the immense privilege of spending ten months at New York University School of Law as a visiting doctoral researcher, where I am indebted to, among many, Benedict Kingsbury, Lewis Kornhauser, Joseph H. H. Weiler, Karin Loevy, Gabriele Wadlig, Andreas Leidinger, Michele Krech, Naama Goldberg, Marcela Prieto Rudolphy, Felipe Jimenez, Teng Li, and Christopher Roberts.

At WWU Münster, the brilliance and solidarity of the community of fellow doctoral and postdoctoral students continue to make me proud. Thank you especially to my *Doktorbrüder* Felix Fouchard and Patrick Wasilczyk as well as past and present student and research assistants of the Petersen and Markard Chairs.

Furthermore, I would like to thank Michaela Hailbronner for mentorship and opportunities, and Sué González Hauck for help in drafting the book proposal. For valuable comments on additional research, I thank Anne Dienelt, Laura Hering, and Matthias Lippold, as well as Nico Krisch, Anne van Aaken, and Pedro A. Villarreal. I owe thanks to two anonymous reviewers for invaluable feedback on my book proposal.

For their friendship during turbulent times, I especially thank Benedikt Huggins, Tassilo Rinecker, Jonas Hölting, Sarah Breuer, Katharina Biegi, Christina Müller, and Lisa Köhler (in addition to designing the cover image!); and for early support, I thank Johannes Block. For friendship in addition to teaching me everything I know about content analysis, I owe special thanks to Katja Philipps. Thanks are also in order to my cats for reminding me to not overvalue productivity.

I am grateful to my ever-diligent editor, Tom Randall, at Cambridge University Press, and all people whose labor went into the various stages of making this book a physical reality.

Finally, I thank my family for their acceptance, support, and love.
