

# Contents

Foreword	<i>page</i> xv
Preface	xvii
Acknowledgments	xxi
<b>1 The Evolutionary Background</b>	<b>1</b>
How Evolution Works	1
Species and Subspecies	6
Human Evolution	10
<b>2 Race before Evolutionary Theory</b>	<b>17</b>
The Ancient World	17
Medieval and Post-Medieval Europe	19
Race in Enlightenment Thought	21
Human Races in Early Zoology	24
The Early Nineteenth Century	29
<b>3 Race after Darwin</b>	<b>33</b>
Separate Origins	33
Huxley, Wallace, and Darwin	35
The Late Nineteenth and Early Twentieth Centuries	37
Postwar Developments	41
<b>4 Race in the Era of Genetics and Genomics</b>	<b>45</b>
Early Genetics	45
Door to “Racial Science” Number One: Galton and Eugenics	46

xii CONTENTS

Door to “Racial Science” Number Two: Garrod and Inborn Errors of Metabolism	47
Door to “Racial Science” Number Three: Blood Groups	48
Door to “Racial Science” Number Four: Human Allozyme Variation	48
Door to “Racial Science” Number Five: The 1960s and 1970s	50
Door to “Racial Science” Number Six: Mitochondrial Eve and Y Chromosomal Adam	54
Door to “Racial Science” Number Seven: Human Variation Panels	60
Science, Racial Science, and Racial Nonsense (Racism)	65
<b>5 Variation among Genomes, and How Humans Took over the World</b>	<b>67</b>
Early Molecular Studies of Human Variation	67
The Y-Adam and mt-Eve Stories	69
Paleogenomics	74
Genomic Shortcuts	81
The View from the Autosomes	86
Neanderthals, Denisovans, and a Third Mystery Lineage	90
<b>6 Clustering and Treeing</b>	<b>93</b>
Data Set Ascertainment	94
Treeing	95
Clustering	97
Structuring	100
PCAing	103
IBDing	107
The Bottom Line on -ing	109
<b>7 Race in Medicine and Complex Phenotypic Studies</b>	<b>111</b>
Some Background	111
The Red Herring	112
The Brick Wall	115
Tough Luck	119

<b>8 Human Adaptations</b>	<b>121</b>
Human Variation	121
Skin Color	122
High Altitudes	125
Lactase Persistence	128
Athletic Prowess and Body Shape	131
Concluding Thoughts about Human Adaptation	132
<b>9 Science, Pseudoscience, and Race</b>	<b>135</b>
“Race Science” in Context	135
Epistemological Pain: Misunderstandings of Science	137
The Bottom Line	149
Summary of Common Misunderstandings	151
References and Further Reading	155
Figure Credits	166
Index	168
