

## Contents

	<i>Preface</i>	<i>page</i> vii
<b>1</b>	<b>Calculus in Locally Convex Spaces</b>	1
	1.1 Introduction	1
	1.2 Curves in Locally Convex Spaces	3
	1.3 Bastiani Calculus	7
	1.4 Bastiani versus Fréchet Calculus on Banach Spaces	13
	1.5 Infinite-Dimensional Manifolds	16
	1.6 Tangent Spaces and the Tangent Bundle	19
	1.7 Elements of Differential Geometry: Submersions and Immersions	23
<b>2</b>	<b>Spaces and Manifolds of Smooth Maps</b>	30
	2.1 Topological Structure of Spaces of Differentiable Mappings	30
	2.2 The Exponential Law and Its Consequences	37
	2.3 Manifolds of Mappings	41
<b>3</b>	<b>Lifting Geometry to Mapping Spaces I: Lie Groups</b>	48
	3.1 (Infinite-Dimensional) Lie Groups	48
	3.2 The Lie Algebra of a Lie Group	55
	3.3 Regular Lie Groups and the Exponential Map	62
	3.4 The Current Groups	69
<b>4</b>	<b>Lifting Geometry to Mapping Spaces II: (Weak) Riemannian Metrics</b>	80
	4.1 Weak and Strong Riemannian Metrics	80
	4.2 The Geodesic Distance on a Riemannian Manifold	84
	4.3 Geodesics, Sprays and Covariant Derivatives	90
	4.4 Geodesic Completeness and the Hopf–Rinow Theorem	102

<b>5</b>	<b>Weak Riemannian Metrics with Applications in Shape Analysis</b>	106
5.1	The $L^2$ -metric and Its Cousins	107
5.2	Shape Analysis via the Square Root Velocity Transform	114
<b>6</b>	<b>Connecting Finite-Dimensional, Infinite-Dimensional and Higher Geometry</b>	120
6.1	Diffeomorphism Groups Determine Their Manifolds	120
6.2	Lie Groupoids and Their Bisections	123
6.3	(Re-)construction of a Lie Groupoid from Its Bisections	133
<b>7</b>	<b>Euler–Arnold Theory: PDEs via Geometry</b>	138
7.1	Introduction	138
7.2	The Euler Equation for an Ideal Fluid	143
7.3	Euler–Poincaré Equations on a Lie Group	146
7.4	An Outlook on Euler–Arnold Theory	150
<b>8</b>	<b>The Geometry of Rough Paths</b>	157
8.1	Introduction	157
8.2	Iterated Integrals and the Tensor Algebra	159
8.3	A Rough Introduction to Rough Paths	168
8.4	Rough Paths and the Shuffle Algebra	176
8.5	The Grand Geometric Picture (Rough Paths and Beyond)	181
<i>Appendix A</i>	<b>A Primer on Topological Vector Spaces and Locally Convex Spaces</b>	186
<i>Appendix B</i>	<b>Basic Ideas from Topology</b>	206
<i>Appendix C</i>	<b>Canonical Manifold of Mappings</b>	213
<i>Appendix D</i>	<b>Vector Fields and Their Lie Bracket</b>	225
<i>Appendix E</i>	<b>Differential Forms on Infinite-Dimensional Manifolds</b>	231
<i>Appendix F</i>	<b>Solutions to Selected Exercises</b>	244
	<i>References</i>	256
	<i>Index</i>	264
