978-1-316-51619-5 — Machine Learning and Data Sciences for Financial Markets
Edited by Agostino Capponi, Charles-Albert Lehalle
Index
More Information

Index

adversarial learning, 181, 703
  market simulation, 308, 454, 472, 473
algorithmic trading
  electronic trading, 177, 182, 196
  order flow, 115
alternative data, 485, 486, 490, 546
  credit card, 23
  data-driven models, 27
  jobs reports, 530
arbitrage
  asset pricing, 149, 294, 302
artificial neural network
  learning algorithms, 154, 237
asset management
  asset pricing, 254, 298
  portfolio construction, 67, 262, 310, 634

bias in learning, 693
  adversarial attacks, 703
  complexity metrics, 638
  explainable artificial intelligence, 164, 634, 672, 709
  market simulation, 282, 697
  model risk, 699
  variable selection, 495, 664

dark pools
  electronic trading, 216
  liquidity, 216
data-driven models
  bias in learning, 179
deep learning
  artificial neural network, 379
  learning algorithms, 237

electronic trading, 108, 184, 231
  corporate bonds, 87
  Glosten–Milgrom model, 146
  market impact, 108
  market making, 87
explainable artificial intelligence, 164

finance
  cash management, 80
  financial inclusion, 5, 15
  fintech, 14–16, 81
  peer-to-peer lending, 21
  personal finance, 6, 9, 19, 75
  portfolio construction, 328
  robo-advisor, 5, 9, 11, 17, 60, 64, 69, 81
  tax management, 26, 71, 74
fintech
  finance, 14–16

game theory, 180, 192, 198
  equilibrium, 461
  Glosten–Milgrom model, 146, 198
    electronic trading, 198
  informed trading, 131
gradient descent
  learning algorithm, 206, 238
  theory of learning, 206
graphical model
  learning algorithm, 239
  theory of learning, 241

hedging, 183
  derivative pricing, 689

investment strategies
  forecasting, 102

learning algorithms, 161, 637
  artificial neural network, 61, 374, 383, 410, 455, 460, 471, 573, 689
  Bayesian inference, 662
  deep learning, 253, 273, 275, 301, 378, 436, 573, 662
  econometrics, 110, 258, 297, 496, 515
  filtering, 86, 88, 90, 96
  filtering, linear and non-linear, 127, 140
  gradient descent, 278, 355, 367, 376, 410, 439, 461, 466
  learning rates, 278, 385, 393, 396, 402, 405, 407, 440, 462, 465, 467
  mean field control, 405, 412, 419
  mean field games, 344, 369, 394, 402, 411, 457, 467
  natural language processing, 564
  optimal transport, 456, 457, 474
  principal component analysis, 297, 496, 515
  recommender systems, 7, 87, 88, 93, 95
  regularization, 319, 499, 668
  reinforcement learning, 127, 260, 365, 400, 401, 404, 692

More Information

stochastic control, 356, 359, 415, 470, 471
stochastic modeling, 463
stochastic modeling control, 418
supervised learning, 270, 569
time series, 454, 474
unsupervised learning, 68
variable selection, 495
variational methods, 432, 467, 475, 669
liquidity, 101
market impact, 104, 119, 131, 153, 180
electronic trading, 196
market making, 130, 147
electronic trading, 198
market microstructure, 130
order flow, 115, 153
loss function
theory of learning, 241
market simulation
adversarial learning, 234
bias in learning, 178, 180
mean field games, 372, 459, 460, 469
extended, 377
McKean–Vlasov control, 371, 373, 379, 381, 394, 398, 416, 418
mean field control, 369, 373, 380, 393, 396, 405
mean field term, 372
Nash equilibrium, 372
nowcasting, 483, 494, 507, 593
alternative data, 490, 546
jobs reports, 530
macroeconomy, 500, 507
optimal execution
electronic trading, 216, 244
optimization and learning
convex optimization, 320
order flow
electronic trading, 221
liquidity, 153
portfolio construction
asset management, 5, 317
rate of convergence
theory of learning, 213
weak rate of convergence, 362
regulation, 24
reinforcement learning
learning algorithms, 177, 178, 182, 235
risk management, 194, 665
factor models, 496, 663
model risk, 699
portfolio construction, 76, 79
portfolio management, 69
risk factors, 296
satellite images, 593
statistical arbitrage, 195, 232
investment strategies, 195
stochastic approximation, 205
learning algorithms, 178
theory of learning, 207
stochastic control
learning algorithms, 185
stochastic gradient descent, 206
theory of learning
gradient descent, 363
ODE method, 382
reinforcement learning, 355, 393
stochastic approximation, 207
transaction costs
electronic trading, 196
