Introduction 1

PART I ARTIFICIAL ECONOMICS AND MAINSTREAM ECONOMICS 5

1 The Artificial Agent 7
1.1 The Agent in Mainstream Economics 7
1.2 The Agent in Artificial Economics 9
1.3 Cognitive Science and Neuroscience 11
1.3.1 Cognitive Science 11
1.3.2 Neuroscience 14
1.4 Emotion, Reason, and Social Links: Integrated Agents 19

2 Artificial Markets 23
2.1 A Model of Artificial Economics with Movement 23
2.2 A Model of Artificial Economics with Movement and Trade 30
2.3 A Mainstream Economics Static Exchange Model 36
2.4 A Mainstream Economics Dynamic Model of Production and Consumption 41
2.5 Contrasts 47

3 Artificial Games 50
3.1 A Classic Game 50
3.2 An Artificial Evolutionary Game 52
3.3 Contrasts 59
# Contents

4 Artificial Economics versus Mathematics? 60  
  4.1 Methods and Instruments: Artificial Economics versus Mainstream Economics 60  
  4.2 Computers versus Mathematics? 61  

**PART II COMPLEMENTARY TOPICS AND DISCUSSIONS** 71  
5 Artificial Intelligence 73  
  5.1 Machine Learning Methods 74  
  5.2 Unsupervised Learning 74  
  5.3 Supervised Learning 75  
  5.4 Reinforcement Learning 80  
  5.5 Artificial Agents and Philosophy of Mind 88  
6 Artificial Evolution 93  
  6.1 Genetic Algorithms and Extrinsic Adaptation 93  
  6.2 Artificial Markets and Intrinsic Adaptation 96  
  6.3 Evolution and Economics 98  
7 Artificial Complexity 103  
  7.1 Cellular Automata 104  
    7.1.1 A One-Dimensional Cellular Automaton 104  
    7.1.2 A Two-Dimensional Cellular Automaton 108  
  7.2 Complexity and Economics 115  
8 Artificial Economics and the Agent/Structure Problem 128  
  8.1 Individualism, Structuralism, and Intermediate Postures 128  
  8.2 Artificial Economics and Agent/Structure Feedback 132  

Annexes 138  
Annex A Notions about Object-Oriented Programming 138  
Annex B Mainstream Economics: A Brief on Its Theoretical Core 140  
Annex C General Equilibrium: Static and Dynamic Models 142  
Annex D Artificial Neural Networks: A Brief on Models and Learning 150  
Annex E Uncertainty, Dynamic Programming, and Stochastic Control 157
