Foreword	page xxi
Preface	xxiii
Acknowledgments	xv
<b>1 Biological Identification</b>	<b>1</b>
What is Identification?	1
Biological Identification	2
Biological Methods of Identification	3
Characterization	4
Successive Classification	5
Q vs. K Comparisons	5
Genetics and Heredity	6
Rules of Heredity	10
Chapter Summary	16
<b>2 Before DNA</b>	<b>17</b>
The Nature of Forensic Samples	17
Transfusions and Blood Types	19
Phenotypes and Genotypes	20
ABO Blood Groups and Biological Identification	21
Secretors and Non-Secretors	22
Issues with ABO Methods and a Case Example	24
Serum Proteins and Isoenzymes	26
Typing Using Gels	27
Combining Data	28

## xvi CONTENTS

The Product Rule and an Example Scenario	29
Population Data and Interpretation	32
Sexual Assault Cases	33
Limitations of Blood and Isoenzyme System Typing	33
Chapter Summary	34
<b>3 First-Generation Forensic DNA</b>	<b>35</b>
From Research Laboratory to Courtroom	35
Repeating DNA fragments	36
The RFLP Process	37
Mutation and Mutation Rates	39
The First Cases	39
Immediate Impact	41
The First Wave	43
Court Rulings and Implications	44
Other Key Cases	46
PCR	46
Initial PCR Typing Techniques	48
Chapter Summary	49
<b>4 STR Methods and Loci</b>	<b>50</b>
What are STRs?	50
Identification of Biological Sex	51
STR Typing	53
Steps in STR Typing: Collection and Characterization	56
Steps in STR Typing: Extraction	57
Steps in STR Typing: Quantitation	59
Steps in STR Typing: Amplification	59
Companies and Kits	60
Steps in STR Typing: Typing and Interpretation	62
Trusting the Method	64
The Phantom of Heilbronn	67
Interpretation	68
Sexual Assault Cases and Mixtures	72
Chapter Summary	73

<b>5 DNA Analysis and Interpretation: Single-Source Samples and Simple Mixtures</b>	<b>74</b>
Data Analysis and Interpretation	74
What is a Peak?	75
Binary Thresholds	76
Missing Peaks	77
Extra Peaks	77
What Marker Does the Peak Represent?	79
Q and K Comparison	79
DNA Databases	80
Search Results vs. Conclusions	83
Simple Mixtures	84
Is it a Mixture?	84
Mixture Ratios and Peak Patterns	85
Deconvolution	88
Likelihood Ratios	88
Case Examples	90
Chapter Summary	92
<b>6 The Curse of Sensitivity</b>	<b>93</b>
Low Copy Number	94
Stochastic Effects	94
Working with LCN	96
What is Touch DNA?	97
Sources of Touch and Trace DNA	97
Locating Trace DNA	98
Relevant Transfer, Background, or Contamination?	100
Shedders	102
Dangers of Contamination	102
It's Not Just Whose DNA It Is, But How It Got There	103
The Amanda Knox Case	104
Tools and Techniques	107
Chapter Summary	108
<b>7 From Mothers and Fathers</b>	<b>109</b>
DNA From One Parent	109

## xviii CONTENTS

Patterns of Inheritance	110
What is Mitochondrial DNA?	111
Early Cases	112
Sequence Data	112
mtDNA Analysis	113
Heteroplasmy	114
Interpretation of mtDNA Data	114
mtDNA Databases and Counting	115
Identification of the Last Russian Tsar	116
Y-Chromosome Markers	119
Thomas Jefferson and Sally Hemings	121
X-Chromosome STRs	122
Combined Use of Autosomal STRs and Lineage Markers	123
Chapter Summary	124
<b>8 Emerging Technologies</b>	<b>125</b>
SNPs	125
King Richard III	126
DNA Sequencing	127
SNP Case Example	128
Sequencing STRs	129
Linkage and Microhaplotypes	130
Why Aren't All Labs Using NGS?	131
Rapid DNA	131
Non-Human DNA	133
Case Examples	134
DNA and Marijuana	135
Microbial Forensics	135
Forensic Epigenetics	136
Chapter Summary	137
<b>9 Emerging Issues</b>	<b>138</b>
Interpretation of Complex DNA Mixtures	138
Mixture Interpretation and Cognitive Bias	139
Proprietary Software	140
Reliability	141

**CONTENTS**    **xix**

Contradictions	143
Cases and Controversy	144
Indirect DNA Searching, Familial DNA, and Kinship Analysis	146
Familial Searching	146
Investigative Genetic Genealogy (IGG)	148
The Golden State Killer	149
The Controversy	150
Forensic DNA Phenotyping	151
FDP and Missing Persons	152
Chapter Summary	153
<b>Concluding Remarks</b>	<b>155</b>
Summary of Common Misunderstandings	156
References and Further Reading	159
Figure Credits	170
Index	172
