1 Emerging Technology and Maritime Boundary Dispute Resolution	1
CLIVE SCHOFIELD, ROBERT VAN DE POLL AND NIELS ANDERSEN	
1.1 Introduction	2
1.1.1 Progress in the Delimitation of Maritime Boundaries	3
1.1.2 Evolution of Ocean Boundary-Making	7
1.1.3 Definition of Baselines	9
1.2 Maritime Boundary Delimitation and Changing Technologies	11
1.2.1 Emerging Technologies for Detecting the Edge of the Land (Baselines)	13
1.2.1.1 Charts and Changing Coasts	13
1.2.1.2 Advances in Geodesy for the Determination of Baselines, Limits and Boundaries	17
1.2.1.3 SatRecon (4DSSM) Four-Dimensional Satellite-Derived Seafloor Morphology	20
1.2.1.4 Enhanced Baselines Models, Extended Maritime Jurisdiction	24
1.2.1.5 Limitations	25
1.2.2 Emerging Technology in Maritime Boundary Dispute Resolution	27
1.2.2.1 International Cases	32
1.3 Conclusion	33
2 Renewable Energy and the Law of the Sea	35
OLIVIA WOOLLEY	
2.1 Introduction	35
2.2 Rights to Exploit Resources	38
2.2.1 Electricity Generation	38
2.2.2 Electricity Transmission	44
2.2.3 Collaboration on Offshore Renewable Electricity Generation and Transmission	45

- 2.3 Rights to Regulate 46
- 2.4 Conflict between Sea Uses 49
- 2.5 Marine Environmental Protection 54
 - 2.5.1 Climate Change, Offshore Renewables and Marine Environmental Protection 59
- 2.6 Conclusion 61

- 3 Striking an Equitable Balance under the Biodiversity Agreement: The Elusive Case of New Technologies, Marine Genetic Resources and the Global South 63**
- RONÁN LONG
- 3.1 Introduction 64
- 3.2 Significant and Substantial Legal Issues 66
- 3.3 North–South Capabilities and Disparities 68
- 3.4 Unfinished Business and Inherent Biases 74
- 3.5 Slow Road to Damascus via the UN 81
- 3.6 Questions of Terms and Objectives 83
- 3.7 Future-Proofing the Agreement through a Process of Normative Accretion 88
- 3.8 Role of Technology in Monitoring and Benefit Sharing 91
- 3.9 New Institutional Architecture 94
- 3.10 Empowering a One-Stop Information Sharing Platform 96
- 3.11 Match-making and Establishing a Technology Mechanism 98
- 3.12 Can the Agreement Strike a More Equitable Balance in the Law of the Sea? 103

- 4 Small Modular Reactors and Transportable Nuclear Power Plants 108**
- ELENA BERNINI
- 4.1 Introduction 109
 - 4.1.1 Use of SMRs at Sea 110
- 4.2 Emerging TNPPs at Sea: Strategic Usage and Description 112
 - 4.2.1 Akademik Lomonosov Floating SMR 112
 - 4.2.2 Chinese FNPPs 114
 - 4.2.3 Underwater SMR on the Continental Shelf 116
 - 4.2.4 Underwater SMR on the Deep Seabed 116
 - 4.2.5 Poseidon 117
 - 4.2.6 On the Horizon Applications of SMRs and TNPPs on Land and in Space 118

CONTENTS

vii

4.3	The Legal Regime Applicable	119
4.3.1	Nuclear Regime	119
4.3.2	Law of the Sea Regime	120
4.3.2.1	TNPPs: Ships or Installations?	121
4.3.2.2	Navigational Rights	124
4.4	Civil Liability for Nuclear Damage from TNPPs and SMRs	125
4.4.1	General Principles of the Nuclear Liability Conventions	125
4.4.1.1	Comparing the Nuclear Liability Conventions with UNCLOS	126
4.4.2	Are TNPPs Nuclear Installations? Does the Nuclear Liability Regime Apply?	128
4.4.3	Do Nuclear Civil Liability Regimes Apply to Military Nuclear Reactors at Sea?	131
4.4.4	Geographical Scope of Application and Jurisdiction	132
4.4.5	Do the Nuclear Civil Liability Conventions Apply to Injured Nonparties?	134
4.4.6	Alternative Remedies in Cases of Accidents by Nonparty States	135
4.4.6.1	Law of State Responsibility	136
4.5	Conclusion	138
5	Shipping, Distributed Ledgers and Private Maritime Law	141
	ANDREW TETTENBORN	
5.1	Sea Cargo Documentation	142
5.2	The Payment Process	149
5.3	Cargo Care and Monitoring	153
5.4	Vessel Monitoring	156
6	Maritime Cyber Security	158
	BRIAN WILSON	
6.1	Introduction	158
6.2	Technology, Systems and the Maritime Environment	161
6.3	Electronic Interference, Disruptions and Malicious Cyber Activities	164
6.4	Legal Authorities	168
6.4.1	The International Maritime Organization (IMO)	168
6.4.1.1	Maritime Cyber Risk Management	168
6.4.1.2	SOLAS and the ISPS Code	169
6.4.1.3	Automatic Identification System (AIS)	171
6.4.1.4	International Safety Management (ISM) Code	171
6.4.2	European Union	173
6.4.3	United States	174
6.4.4	National Strategies	177

6.5	Other Potential Legal Approaches and Industry Guidance	177
6.5.1	SUA Convention	177
6.5.2	Industry Guidance	178
6.6	Conclusion: Partnerships Are the Key	179
7	International Standards for Hull Inspection and Maintenance of Robotics and Autonomous Systems	184
	TAFSIR JOHANSSON	
7.1	Introduction	184
7.1.1	Setting the Scene: RAS Terms and Concepts	187
7.1.2	Biofouling Degrades Vessel Performance	188
7.2	The International Legal Regime	189
7.2.1	IMO 2011 Guidelines	189
7.2.2	International “Standards” and the Regulatory Regime	191
7.2.3	State-of-the-Art International Standards and RAS Integration	194
7.3	Perceived Barriers and the Way Forward	202
7.3.1	Implications for the Law of the Sea	208
7.4	Conclusion	211
8	Functionalism and Maritime Autonomous Surface Ships	214
	ALEXANDROS X. M. NTOVAS	
8.1	Introduction	214
8.2	The Constitutional Nature of UNCLOS	216
8.2.1	The Prospect of Amending UNCLOS	217
8.2.2	Interpreting UNCLOS	218
8.2.3	Implementation of UNCLOS and the Modality of GAIRS	220
8.3	Elusive Definitions and Autonomous Navigation	223
8.4	Functional Flexibility in the Requirement for Ship Manning	226
8.5	The IMO MASS Regulatory Scoping Exercise	230
8.6	Toward a Goal-Based Standard Setting Approach	231
8.7	Procedural Obligations and Functional Flexibility	234
8.8	Functional Flexibility and Standard of Review	236
8.9	Conclusion	240
9	Artificial Intelligence to Facilitate Safe Navigation of Ships	243
	STEVEN GEOFFREY KEATING	
9.1	The Sea and AI	243
9.2	Defining Concepts in AI	245

CONTENTS

ix

9.2.1	Definitional Building Blocks	245
9.2.1.1	Intelligence	245
9.2.1.2	Algorithms	245
9.2.1.3	Artificial Intelligence	246
9.2.2	Manifestations of AI	247
9.2.3	AI–Human Interface Operational Paradigms	251
9.2.3.1	Human-in-the-Loop AI (HITL)	251
9.2.3.2	Human-on-the-Loop AI (HOTL)	252
9.2.3.3	Human-out-of-the-Loop AI (HOOTL)	252
9.2.4	Impact of AI on the Maritime Domain	253
9.3	Legal Duties Relating to Hydrography and Safe Navigation	253
9.3.1	UNCLOS	254
9.3.1.1	Coastal State Duties under UNCLOS	254
9.3.1.2	The Duties of the Flag State under UNCLOS	255
9.3.1.3	Flag State Governance Can Benefit from AI	256
9.3.1.4	Duties of the Master under UNCLOS	257
9.3.2	SOLAS	258
9.3.3	STCW	260
9.3.4	COLREGS	261
9.4	AI and Disaster Prevention	263
9.4.1	USS <i>Guardian</i>	264
9.4.2	SS <i>El Faro</i>	267
9.5	Final Thoughts and Conclusion	269

10 Unmanned and Autonomous Warships and Military Aircraft 272

RAUL (PETE) PEDROZO

10.1	Introduction	272
10.2	Unmanned Systems Capabilities and Mission Sets	273
10.2.1	Unmanned Aerial Systems (UASs)	275
10.2.2	Unmanned Maritime Vehicles (UMVs)	275
10.2.3	Unmanned Surface Vehicles (USVs)	276
10.2.4	Unmanned Underwater Vehicles (UUVs)	279
10.3	Unmanned Systems: Characterization and Status	282
10.3.1	Unmanned Aerial Systems (UASs)	283
10.3.2	Are Unmanned Maritime Vehicles (UMVs) Ships?	284
10.3.3	Are Unmanned Maritime Vehicles (UMVs) Warships?	290
10.3.4	Sovereign Immunity	293
10.4	Navigational Rights and Freedoms	294
10.4.1	Duties and Obligations	295
10.5	Conclusion	297

**11 Seabed Technology and Naval Operations on the
Continental Shelf 301**

JAMES KRASKA

- 11.1 Legal Regime of the Continental Shelf 301
 - 11.1.1 Concept of the Continental Shelf 303
 - 11.1.1.1 The Truman Proclamation 305
 - 11.1.1.2 Continental Shelf Convention 306
 - 11.1.1.3 Seabed Committee 307
 - 11.1.2 Seabed Nuclear Arms Treaty 308
 - 11.1.3 “Peaceful Purposes” 311
- 11.2 Military Activities on the Continental Shelf 314
 - 11.2.1 Sound Surveillance System 315
 - 11.2.2 Seabed Installations and Structures 316
 - 11.2.3 “Hydra” and Upward Falling Payloads 322
 - 11.2.4 China’s Military Activities on the Philippine
Continental Shelf 324
- 11.3 Conclusion 326

Index 327
