

INDEX

Site names appear in the index as they appear most frequently in the text (e.g., Autun, France instead of Augustodunum). For site names whose ancient and modern iterations are in common usage in the scholarship (e.g., ancient Puteoli, modern Pozzuoli), both names are indexed, with cross-references. In all cases, readers are reminded that Table 1 contains concordances of all ancient sites mentioned in the book's main text and their modern equivalents.

Numbers in bold refer to illustrations.
