

Notation Index

- D_T defect operator of the row-contraction T , 186
 D_{T^*} defect operator of a contraction-operator T , 7
 D_{ω, \mathbf{T}^*} multivariable ω -defect operator, 285
 $H_{\omega, \mathcal{Y}}^2(\mathbb{F}_d^+)$ \mathcal{Y} -valued weighted Hardy–Fock space, 35
 $H_{\mathcal{Y}}^2$ \mathcal{Y} -valued Hardy space of the unit disk, 4, 7, 9
 $H_{\mathcal{Y}}^2(\mathbb{F}_d^+)$ \mathcal{Y} -valued Hardy–Fock space, 14, 50, 189
 $H_{\{\mathcal{U}_\beta\}}^2(\mathbb{F}_d^+)$ time-varying Fock space, 250
 M_{Θ} the operator of left multiplication by a power series Θ , 42
 W^+ Wiener class of absolutely summable power series, 104
 $\Gamma_{\omega, \mathbf{A}}[I_{\mathcal{X}}]$ ω -pre-defect operator, 116, 286
 $\Gamma_{\omega, \mathbf{A}}^{(k)}[I_{\mathcal{X}}]$ k -shifted ω -pre-defect operator, 116, 286
 $\Psi_{\omega}(z)$ the universal factor associated with the weight ω , 78
 μ_n the standard n -Bergman weight, 37
 $\mathcal{A}_{n, \mathcal{Y}}$ \mathcal{Y} -valued weighted Bergman space, 11
 $\mathcal{A}_{n, \mathcal{Y}}(\mathbb{F}_d^+)$ \mathcal{Y} -valued weighted Bergman–Fock space, 16, 30, 125, 206
 $\mathcal{C}(\omega)$ the class of ω -isometric-like operator tuples, 146
 $\mathcal{C}_s(\omega)$ the class of ω -shift operator tuples, 147
 $\mathcal{C}_u(\omega)$ the class of ω -unitary-like operator tuples, 147
 $\mathcal{G}_{\omega, C, \mathbf{A}}$ multivariable, ω -observability gramian, 113
 $\mathcal{G}_{p, n; C, \mathbf{A}}$ (p, n) -observability gramian, 354
 $\mathcal{H}(K)$ noncommutative formal reproducing kernel Hilbert space with reproducing kernel K , 29
 \mathcal{H}_T^{ℓ} lifted norm space associated with a contraction-operator T , 46
 \mathcal{H}_{Π}^p the pullback space associated with a positive semidefinite contraction-operator Π , 47
 $\mathcal{L}(\mathcal{X}, \mathcal{Y})$ the space of bounded linear operators from \mathcal{X} to \mathcal{Y} , 3
 $\mathcal{M}^{\perp\perp}$ Brangesian complement of the subspace \mathcal{M} , 46, 58, 190, 379
 \mathcal{M}^{\perp} the orthogonal complement of the subspace \mathcal{M} , 67
 $\mathcal{O}_{C, \mathbf{A}}$ multivariable observability operator, 49
 $\mathcal{O}_{\omega, C, \mathbf{A}}$ multivariable ω -observability operator, 39, 113
 $\mathcal{O}_{n, C, \mathbf{A}}$ n -observability operator of the output pair (C, A) , 13
 $\mathcal{O}_{n, C, \mathbf{A}}$ multivariable n -observability operator, 18, 166
 $\mathcal{O}_{p, n; C, \mathbf{A}}$ (p, n) -observability operator, 321, 370, 400
 $\mathcal{Y}\langle\langle z \rangle\rangle$ the space of \mathcal{Y} -valued formal power series in noncommuting indeterminates $z = (z_1, \dots, z_d)$, 26
 $\ell_{\mathcal{Y}}^2(\mathbb{F}_d^+)$ the space of square-summable vector sequences over \mathbb{F}_d^+ , 78
 \mathbb{F}_d^+ the unital free semigroup generated by d letters, 14
 $k_{\omega}(z, \zeta)$ weighted Hardy–Fock space kernel, 36

$k_{\text{nc}, \text{Sz}}(z, \zeta)$ noncommutative Szegő kernel, 30	$\mathbf{S}_{\omega, R}^*$ the right backward shift on $H_{\omega, \mathcal{Y}}^2(\mathbb{F}_d^+)$, 36
$k_{\text{nc}, n}(z, \zeta)$ noncommutative weight- n Bergman kernel, 30	$\mathbf{S}_{\omega, R}$ the right shift on $H_{\omega, \mathcal{Y}}^2(\mathbb{F}_d^+)$, 36
$\mathfrak{G}_{\omega, k, C, A}$ shifted ω -observability gramian, 137	$\mathcal{O}_{C, A}$ observability operator of the output pair (C, A) , 4, 7
$\mathfrak{D}_{\omega, k, C, A}$ shifted ω -observability operator, 137	$\mathcal{G}_{C, A}$ observability gramian, 103
	$\hat{\mathcal{G}}_{n, C, A}$ multivariable n -observability gramian, 124

Subject Index

- (p, n) -Bergman inner multiplier, 346
 (p, n) -completely noncoisometric operator tuple, 399
 (p, n) -contraction, 318
 (p, n) -contractive pair, 355
 (p, n) -hypercontraction, 319
 (p, n) -isometric pair, 355
 (p, n) -observability gramian, 354
 (p, n) -observability operator, 321, 354
 (p, n) -output stable pair, 354
 (p, n) -strongly stable, 365
 $*$ - ω -hypercontractive operator tuple, 22, 285
 N -contraction, 121
 N -hypercontraction, 121
 Z -transform, 3, 15
 μ_n -strongly stable, 135
 ω -completely noncoisometric operator tuple, 285, 287
 ω -contraction, 116
 ω -contractive output pair, 118
 ω -defect operator, 285
 ω -defect-operator $D_{\omega, \mathbf{A}}$, 116
 ω -hypercontraction, 116
 ω -isometric pair, 118
 ω -model output pair, 140
 ω -model subspace, 161
 ω -observability gramian, 113
 ω -output stability, 113
 ω -pre-defect-operator $\Gamma_{\omega, \mathbf{A}}[I_{\mathcal{X}}]$, 116
 ω -pure operator tuple, 285
 ω -strong stability, 117
 \tilde{p} -strongly stable, 365
 n -observable pair, 18
 n -output stability, 124
 n -output stable pair, 19
 p -pure, 400, 405
 p -strongly stable, 355, 365
 abstract ω -shift, 285
 admissible weight sequence, 37
 backward-shift-invariant subspace, 37
 Bergman–Fock space, 16
 Bergman–inner characteristic function, 308
 Bergman–inner family, 250
 Bergman–inner power series, 95
 Beurling–Lax representer, 70
 Brangesian complement, 6, 46
 canonical backward-shift-invariant subspace, 57, 189
 canonical forward-shift-invariant subspace, 57, 189
 Cauchy dual, 148
 characteristic Bergman–inner family, 304
 coincide in the sense of Sz.-Nagy–Foias, 296
 coisometric multiplier, 42
 completely positive map, 107
 conservative system, 4
 contractive kernel, 31
 contractive multiplier, 42, 49, 322
 de Branges–Rovnyak kernel, 43, 351
 defect operator, 7
 defect space, 7
 dissipative system, 4
 Douglas lemma, 184
