Preface *ix*

Overview **3**

1 Spectral Theory for Hilbert Space Operators **7**

1.1 Partial Isometries and Polar Decomposition 7
1.2 Compact and Fredholm Operators 9
1.3 Fredholm Index and Abstract Index 19
1.4 Schatten Classes 34
1.5 Isometries and von Neumann–Wold Decomposition 37
1.6 Toeplitz Operators with Continuous Symbols 43
1.7 Notes and Exercises 47

2 Ext(X) as a Semigroup with Identity **57**

2.1 Essentially Normal Operators 57
2.2 Weyl–von Neumann–Berg–Sikonia Theorem 60
2.3 Extensions and Essentially Unitary Operators 66
2.4 Absorption Lemma 70
2.5 Weakly and Strongly Equivalent Extensions 73
2.6 Existence and Uniqueness of Trivial Class 76
2.7 Identity Element for Ext(X) 82
2.8 Notes and Exercises 86

3 Splitting and the Mayer–Vietoris Sequence **91**

3.1 Splitting 91
3.2 Disjoint Sum of Extensions 94
3.3 First Splitting Lemma 97
3.4 Surjectivity of $(i_{A,X})_*$ 100
3.5 $\mathrm{Ext}(A) \to \mathrm{Ext}(X) \to \mathrm{Ext}(X/A)$ is Exact 108
3.6 Mayer–Vietoris Sequence 112
3.7 Notes and Exercises 114

Table of Contents
More Information

4 Determination of Ext(X) as a Group for Planar Sets **117**

4.1 Second Splitting Lemma 117
4.2 Projective Limits and Iterated Splitting Lemma 124
4.3 Ext(X) is a Group 130
4.4 γ_X is Injective 133
4.5 BDF Theorem and Its Consequences 140
4.6 Notes and Exercises 144

5 Applications to Operator Theory **147**

5.1 Bergman Operators and Surjectivity of γ_X 147
5.2 Hyponormal Operators and m-Isometries 152
5.3 Essentially Normal Circular Operators 157
5.4 Essentially Homogeneous Operators 159
5.5 Essentially Reductive Quotient and Submodules 164
5.6 Notes and Exercises 175

Epilogue **179**

- Other Proofs 179
  - Properties of Ext(X) 180
  - The short exact sequence 180
  - Arveson's proof of "Ext(X) is a group" 181
- Related Developments 182
  - Ext(A, B) 182
  - Homotopy invariance 183
  - K-theory 185
- Open Problems 187
  - Essentially normal tuples 187
  - Essentially homogeneous tuples 189
  - Arveson–Douglas conjecture 190

Appendix A Point Set Topology **193**

Appendix B Linear Analysis **201**

Appendix C The Spectral Theorem **217**
