

INDEX

The numbers refer to the pages

- Amplitude of curvature, 70, 74
 Anticlastic surface, 67
 Applicable surfaces, 168
 Asymptotic directions, 83; lines, 83, 144, 250

Beltrami, 85, 220, 222, 227; theorem, 114
Bertrand curves, 34
Bianchi, Preface
 Binormal, 13
 Bonnet, 95, 105, 112, 143, 159, 235, 249, 260

 Canal surface, 50
 Catenoid, 78, 179, 180
 Central point of generator, 138
 Central quadrics, 124
 Centre of curvature; circular, 13, 17; spherical, 21, 23; for surface, 67; surface of, 148
 Centres, surface of, 148
 Centro-surface, 67, 148
 Characteristic points, 48
 Characteristics of surfaces, 40
Christoffel, 91
 Circle of curvature, 13
 Circular curvature, 11
 Circular helix, 16, 28
 Circulation, 259; theorem, 243
Clairaut, 102
Codazzi relations, 94
Combescur transformation, 36
 Complementary surface, 161
 Conclusion, 247
 Confocal quadrics, 124; paraboloids, 131
 Conformal representation, 167–171, 178
 Congruences; of straight lines, 183–199; of curves, 199–203, 252
 Conjugate directions, 80; systems, 81
 Conoid, 146
 Coplanar vectors, 5
 Cross product, 4
 Curl, of a vector, 228
 Curvature; circular, 11; spherical, 21, 23; of surfaces, 68–70; normal, 61, 62
 Curvilinear coordinates, 51, 207, 251
 Cyclic system, 206
 Cyclides, 158
 Cylindroid, 78

Darboux, 216, 220, 222
 Deformation of surfaces, 250
 Degenerate evolute, 156, 157
 Derivatives; of vectors, 7; of unit normal, 60; of point-functions, 221, 230
 Developable surfaces, 43–47, 76, 137
 Differential invariants, 220
 Differentiation of vectors, 7
 Dilation, 250
 Directions on a surface, 55; principal, 66, 67
 Director surface, 183, 252
 Directrix, 136
 Distributive law, 2, 4
 Divergence; of a vector, 225, 252; of a congruence, 253; of family of curves, 259; theorem, 238
Dupin, 73, 74, 158, 197, 211, 248

 Edge of regression, 42
Eisenhart, Preface, 215
 Elliptic point, 75; ray, 195; coordinates 211
Enneper, 85
 Envelope, 40, 48, 248; surfaces, 253
 Equidistance, curves of, 218
Euler, 72, 73
 Evolute, 30, 32; of surface, 149; degenerate, 156–157; middle, 165
 Extension, 251

 Family; of surfaces, 40, 48, 260; of curves, 248, 258
 First curvature of surface, 69, 226, 240, 241, 248
 Flux, across boundary, 259
 Focal curve, 248–249
 Focal planes; of ray, 190; of curve, 202
 Focal surface of congruence, 190, 200, 253, 254
 Foci; of ray, 189, 190; of curve, 200, 253
Forsyth, Preface, 144, 165, 210, 215
Frenet-Serret formulae, 15
 Fundamental magnitudes; first order, 53; second order, 58

Gauss; curvature, 69; formulae, 90; characteristic equation, 93; theorems, 117, 238, 240, 246, 252, 260
 Generators, 26, 44, 135–144

INDEX

267

- Geodesic curvature, 108, 233; distance, 113; ellipses and hyperbolas, 119; form of ds^2 , 113; parallels, 113, 259; polar coordinates, 115; tangent, 103; triangle, 116
- Geodesics, 99; torsion of, 103; curvature of, 104; family of, 249
- Girard*, 118
- Gradient of function, 220, 252
- Green*, 238, 242, 246
- Hamilton's* formula, 187–189; theorem, 196
- Helices, 16, 26, 28
- Helicoids, 65, 79, 146
- Hyperbolic; point, 75; ray, 195
- Image, spherical, 172
- Indicatrix; of Dupin, 74, 79; spherical, 28–30
- Inextensional deformation, 251
- Intrinsic equations of curve, 26
- Invariants, differential, 220
- Inverse surfaces, 162
- Inversion, 162
- Involutes, 30; of a surface, 160, 161
- Isometric parameters, 85, 86, 168, 227; representation, 168
- Isothermal, isothermic, 168
- Isotropic congruence, 198
- Joachimsthal*, 68, 106, 107, 130
- Lamé* family of surfaces, 218
- Lamé's* relations, 214, 257
- Laplacian*, 227, 252
- Level curves of a function, 220
- Limits; of a ray, 185; of a curve, 253
- Line of curvature, 67, 69, 72
- Line of striction, 138, 248, 249
- Liouville*, 92, 111, 120
- Loxodrome, 169
- Magnification, linear, 168
- Magnitudes; first order, 53; second order, 58
- Mainardi*, 94, 95
- Malus*, 197
- Mannheim*, 36
- Maps, 171
- Mean curvature, 69, 70; parameter, 194; surfaces of congruence, 193
- Measure of curvature, 69
- Mercator's* projection, 171
- Meridians, 77
- Neunier's* theorem, 62
- Middle evolute, 165; point of ray, 190; surface of congruence, 191, 198
- Minimal surfaces, 70, 176–180, 241; lines, 87
- Modulus, 1
- Moment, 5, 6; of family of curves, 258; mutual, 6, 137
- Monge*, equation of surface, 44, 52, 75, 76, 102
- Mutual moment, 6, 137, 258
- Normal; to curve, 11; to surface, 38, 57; angle, 105; plane, 11; congruence, 183, 196, 202, 253; curvature, 61, 62, 70
- Null lines, 87, 177
- Oblique curvilinear coordinates, 251
- Orthocentres of curve, 253
- Orthocentric surface, 253
- Orthogonal curves, 52, 54; surfaces, 207; trajectories, 56; systems of curves, 247
- Osculating plane, 12; developable, 45, 52
- Parabolic point, 75; ray, 195
- Paraboloids, 131–133
- Parallel vectors, 4; curves, 77, 259; surfaces, 158, 261
- Parallelism; of vectors, 4; of surfaces, 261; line of, 261
- Parallels; on surface of revolution, 77; geodesic, 113; on any surface, 259
- Parameters, 38, 40, 48, 51; of distribution, 138, 192–195; differential, 220, 222
- Parametric curves, 51
- Point-function, 220
- Polar lines, 46; developable, 46, 112, 142; coordinates (geodesic), 115
- Pole, 115
- Position vector, 1
- Principal normal, 12; curvatures, 67–70; surfaces of a ray, 185; surfaces of a curve, 253; planes, 185, 253
- Products of vectors, 2
- Pseudo-spherical surface, 155
- Quadric surfaces, 124–135
- Radius; of curvature, 13, 67; of torsion, 16
- Rectifying developable, 46, 112, 142; lines, 46; plane, 19
- Reflection of light, 197
- Refraction of light, 197
- Regression, edge of, 42
- Relative curvature, 108
- Representation of surfaces, 167
- Revolution, surface of, 77, 86, 87, 102, 168
- Ribaucour*, 156, 165
- Riccati*, 144

Cambridge University Press

978-1-316-60384-0 - Differential Geometry of Three Dimensions: Volume I

INDEX

- Right-handed screw, 3
 Right helicoid, 59, 65, 146, 147, 182
Rodrigues, 68
 Rotation, 3; of a vector, 228
 Ruled surfaces, 135–144

Saint-Venant, 34
 Scalar product, 2
 Screw curvature, 17
 Scroll, 135
 Second curvature of a surface, 69, 231, 232, 248, 260, 261
 Second order magnitudes, 58
 Self-conjugate directions, 83
 Skew surface, 135
 Slope, 220
 Specific curvature, 69
 Sphere of curvature, 21
 Spherical curvature, 21, 23; indicatrix, 28–30; image, 172, 178; representation, 172
 Square of a vector, 2
 Stereographic projection, 171
Stokes, 238, 243
 Strain, 251

 Striction; line of, 138, 248–249; points of, 253; surface of, 253
 Surface, 38; of centres, 67; of revolution, 77, 86, 102, 168; of congruence, 184, 193, 200
 Symmetric parameters, 87
 Synclastic surface, 67

 Tangent, 1; plane, 38, 39
 Tangential curvature, 109; coordinates, 175
 Torse, 135
 Torsion, 14, 264
 Total curvature, 69, 264; differential, 8
 Transformation of integrals, 238
 Triple products, 5, 6
 Triply orthogonal system, 207

 Umbilic, 70, 127, 132
 Unit normal, 12, 58; tangent, 11

 Vector curvature, 108, 217
 Vector product, 4

Weingarten, 154
